

Free Microsoft 365 licence assessment. **Verify your potential savings.**

Ntracko flags licences you may pay for twice, such as E3 next to E5 or Power BI Pro next to E5. It also flags licences still assigned to disabled accounts. Different people assign licences at different times, so often nobody sees the overlap.

Ntracko only reads your licence data and never changes anything. For each finding you see how much it costs a month and a year. You decide what to remove.

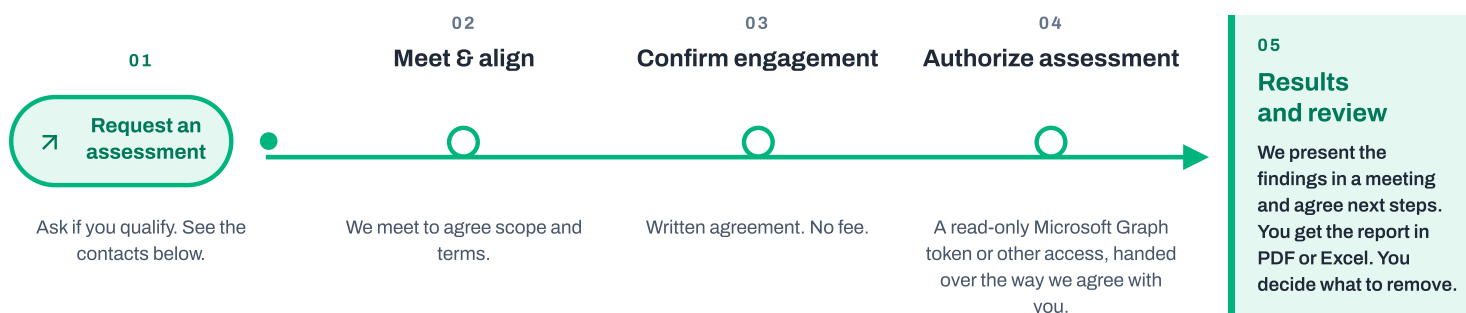

PRIVATE PREVIEW RESULTS: 10 TENANTS

\$7M+ /yr Potential savings found in the 10 tenants together

\$4M+ /yr Licences assigned to disabled accounts in the same 10 tenants

At Microsoft public list prices. Not a guarantee.

THE OFFER: ONE MEETING, ONE ASSESSMENT OF YOUR TENANT. FREE FOR SELECTED ORGANISATIONS.

Your time: about 3 hours in total. About 1 hour of one administrator, plus up to 2 hours with our team at steps 02 and 05. The review of results at step 05 is a free consultation.

EXAMPLE: ONE FINDING, SAMPLE DATA

In this example, **197 users hold more than one Microsoft 365 base suite**, 189 of them enabled. Potential impact at public list prices: **USD 5,824.50 a month, USD 69,894 a year**. Sample data, not a real customer.

COMING SOON

Ntracko self-service

A SaaS app in which your administrator runs the tenant audit and sees the potential saving.

Interactive demo

The Ntracko interface on sample data, with no access to your tenant.

Ask if you qualify.

We offer the free assessment to a small group of organisations. Contact one of the people below to check if yours qualifies. We will propose a time for the meeting.

For organisations with 150 or more licensed users. More: ntracko.com

TECHNICAL QUESTIONS · MICROSOFT MVP

Jan Chlebek

jan.chlebek@cloudsonmars.com

QUESTIONS YOU MAY HAVE

What access do you need, and can Ntracko change anything?

Read-only Microsoft Graph permissions that your administrator approves. Ntracko never changes assignments. The access token expires on its own. Jan Chlebek shares the exact list of permissions.

Is it really free?

Yes, for a small group of organisations. In return we ask for honest feedback and, if you are happy with the results, a reference in whatever form suits you. Any paid work later is agreed with you in advance.

Where does Ntracko run, and who sees our data?

Ntracko runs in Microsoft Azure, in the Poland Central region in the EU. Our team sees your findings while checking your report.

We have E5, the admin center and our own scripts. What does this add?

The admin center shows what is assigned. Ntracko checks those assignments against more than 1,000 rules and puts an amount on each finding. If it finds little, that is a useful result too.

Who at Clouds On Mars runs this?

The Ntracko team, part of the company you already work with. It uses only the access your administrator approves for this assessment.
