

Accelerate Your Renewable Energy Business with **AI**

AI-powered platform delivering real-time insights, personalized strategies, and market intelligence to help you scale in global renewable markets

GREENVI AI

"Greenvi AI is an indispensable platform for Blymyer Engineers. Whenever we explore target markets in the USA, Eastern, or Southern Europe, it provides fresh insights and tailored strategies that help us build new partnerships, win clients, and position our engineering services with confidence and speed."

Greg Mazur - Director of Engineering and
owner at Blymyer Engineers Inc (USA)

OUR SOLUTION

Greenvi AI is an AI platform for renewable energy that helps executives and managers quickly find real-time, personalized market opportunities, projects, and partnerships across Europe and the USA.

WHAT WE OFFER

Renewable Project Insights

Reveals in real time which projects are launching, financed, and which companies are entering new markets.

Great for spotting opportunities before competitors do.

Renewable Energy Research

Delivers in-depth research on specific segments or projects, covering trends, financing, etc.

Essential for making informed strategic and investment decisions.

Partnership Opportunity Analysis

Automatically identifies recommended companies across European and U.S. markets and find real-time business opportunities

Perfect for gaining new clients and partnerships.

Real-Time Renewable Energy Market Reports

Generates live reports on renewable energy markets—showing active players, technologies in use, and recent funding activity.

Ideal for staying ahead with fresh market intelligence.

TRUSTED BY

WHO WE SERVE

Engineering Companies

Win more clients with tailored market strategies.

Developers

Accelerate market entry with real-time insights.

Investors

Spot opportunities early and make smarter decisions.

EPCs

Discover new projects and partnership opportunities.

Equipment Providers

Identify active markets and connect with buyers.
