

PRECISION. QUALITY. RELIABILITY.

ABOUT US

- **Origins:** PRORING Latvia was founded in November 2013, initially specializing in flywheel restoration. Over time, we expanded our operations, focusing on CNC machining, which is now our main activity.
- **2024. Turnover:** €1.4 million, representing 40% growth compared to the previous year.
- **Team:** 25 skilled employees.
- **Growth strategy:** We are focused on expanding outside of Latvia into other EU markets and building long-term relationships with clients.

OUR SERVICES

TURNING

We use CNC lathes equipped with sub-spindles, live tools, and Y-axis movement for non-standard or high-volume production.

We also operate manual lathes for parts up to three meters long.

MILLING

We operate CNC milling machines for efficient large-scale production, as well as manual milling machines for smaller volumes, repair solutions, or prototyping.

Our CNC machines can process parts up to 2.5 meters in length and 1.0 meter in width.

GRINDING

We also have machining equipment for surface, round, and cylindrical grinding capable of achieving 0.005 mm precision.

PRODUCTION PROCESS

TECHNOLOGY & QUALITY CONTROL

PLANNING

Our production is optimized and managed using the Monitor ERP system, ensuring efficient workflow.

PROGRAMMING

We use Fusion 360 for both 3D modeling and CNC programming, enabling precise and smooth processing.

QUALITY

With the latest CNC equipment and ISO 9001-certified quality control, we guarantee high-quality parts.

WHY CHOOSE US?

FLEXIBILITY

We aim to build long-term relationships with our clients based on our performance.

RELIABILITY

We can deliver both prototypes and large-volume orders, exceeding 1000 units.

QUALITY

With modern CNC machinery and ISO 9001-certified quality control, we ensure top-level precision and consistency.

QUOTE IN 24 HOURS JUST SEND YOUR DRAWING

Whether it's a prototype or full production run, send us your drawings or specs - we'll respond with a clear price and lead time, within 24 hours.
