- AS A PIONEER
IN MATERIALS
CIRCULARITY -

CTP - Chaussée d'Antoing 55, 7500 Tournai - Belgium

ACCREDITED
RESEARCH CENTRE

The CTP is a **Centre of Excellence** at the service of companies in the environmental and materials fields.

As a leader in circular economy, we are pushing the limits of the treatment and recovery of solid materials, in particular ores, industrial by-products and post-consumer wastes, by providing **innovative and profitable solutions** for the industry.

25+ YEARS OF EXPERTISE

EMPLOYEES **45+**

9.000 M² PILOT HALLS

CUSTOMERS **300+**

50+ PUBLIC & PRIVATE PROJECTS

MINERAL PROCESSING

From the extraction of underground resources to the recycling of wastes, our expertise in characterisation and process engineering will serve your developments

EXTRACTIVE METALLURGY

Extraction and recovery of metals from primary or secondary materials by hydrometallurgy or pyrometallurgy

WASTE VALORISATION

Development of innovative industrial solutions to promote the circularity of materials

LABORATORIES ANALYSES

Determination of elemental composition, mineralogy and evaluation of recovery potential

R&D AND INNOVATION

Are you looking for **innovative solutions** for **recycling** your industrial waste?

CTP accompanies you in R&D, focusing on solutions and process profitability.

As an expert in materials recycling and circularity, whether for minerals (demolition waste, slag, contaminated soil, etc.) or derivatives (composites, construction waste, etc.), our Centre offers tailored, pragmatic research to address the challenges of dwindling mineral resources and carbon footprints reduction.
