

Lombiq Technologies Ltd.
Budapest, Hungary

We help companies build enterprise-grade, mission-critical web applications for regulated environments.

We are a software development company with more than 10 years of experience focused on web development and training services specializing in the Orchard Core framework and .NET applications.

What is .NET and Orchard Core?

.NET is Microsoft's enterprise application platform used by enterprises, banks, insurers, and governments for secure, scalable systems with long-term support. Orchard Core is a cutting-edge open-source framework built on .NET. It helps teams build secure, multi-tenant web apps with many enterprise-grade features already built-in.

Company background

Founded in 2013, Lombiq is a senior .NET engineering team and a leading contributor to Orchard Core. We've delivered projects for 180+ organizations across 26 countries, including Microsoft, WTW, the Smithsonian Institution, Live Nation, and multiple undisclosed Fortune 500s. Beyond delivery, we operate DotNest (the Orchard Core SaaS) and run university and professional training programs for Orchard Core.

Our mission

We are on a mission to build reliable, durable web software and enable our clients to own it: open-source, maintainable, secure, and ready for highly competitive and regulated environments. Our role is to deliver, transfer knowledge, and support your teams for the long term.

OUR TEAM

Lombiq's team consists of highly skilled experts from diverse backgrounds:

SERVICES

Software development

Designing, building, and modernizing web applications on .NET, often powered by Orchard Core.

Typical outcomes: well-documented, standards-based code, verified by automated & manual QA; built collaboratively to your specification.

Focus areas: ASP.NET Core, Orchard Core, Azure, integrations, accessibility, performance

Consulting

Doing architecture reviews, security/performance audits, rescue missions, and migration roadmaps. We also offer Orchard Core consulting, including website and application development, and code review.

Training

Our team of dedicated experts is here to help groups and individuals who want to learn about Orchard or simply broaden their coding knowledge. Our Orchard Dojo website contains several training sessions to help beginners become experts.

Where do we help the most?

- **Greenfield platform builds**
- **Modernizing legacy systems**
- **Project rescue and stabilization**
- **Security and compliance hardening**
- **Multi-site, multi-tenant platforms**
- **ERP, CRM, and other integrations**

WORKING WITH YOU

Team

11 **Core** engineers + ~10 **External** experts.
Senior .NET + Orchard Core;
expand on demand.

Lead times

< \$10k: start **immediately**
< \$100k: ~2 **weeks**
Larger: 2–4 weeks (full team mobilized)

Delivery pace

Typical ~100 **person-days** in **6–8 calendar weeks** (working in parallel, including QA).

Engagement models

Fixed-scope, or Time & Materials.
Clear milestones, intermediate releases,
and demo cadence. Continuous
communication during the whole project.

Scale-up & resourcing

Add capacity for peaks; keep a lean core
for continuity.
Principle of least privilege, quality
assurance, and coding standards.

Handover

Docs, runbooks, and training so your
team can own the system.
Open-source, no vendor lock-in, code
and app hosted under your control.

Need to start next month or ramp up mid-project?

We'll propose a low-risk plan in one call.

OUR PRODUCTS

DotNest — Orchard Core SaaS

Spin up secure Orchard Core websites for fast pilots, agency websites, enterprise micro-sites, or headless CMS APIs. It has more than 6,000 sites showing the maturity of Orchard Core at scale.

Hastlayer

A tool that converts .NET code into native hardware, boosting performance and reducing operating costs to a tenth. It is suitable for High-Performance Computing (HPC) tasks; for developers who don't want to abandon Microsoft technologies.

UI Testing Toolbox

A ready-to-use QA toolkit for .NET applications with automated cross-browser UI tests, visual and accessibility checks, and built-in ZAP security scans. Perfect for teams that care about **security, compliance, and quality**.

Orchard Dojo

Tutorials and courses used in our enablement/training.

We build and maintain an ecosystem of open-source modules and tools, that we use to deliver quality products more predictably, and a clean handover with code you fully own.

- **10+ years building on this stack**
- **200+ open-source projects**
- **180+ organizations served, 26 countries**

WHAT DO OUR CLIENTS SAY?

Toby Dodds, Technology Director
— Smithsonian Center for Folklife
and Cultural Heritage

“This spring, we completed a redesign of all our three main websites (festival.si.edu, folklife.si.edu, folkways.si.edu). It was an enormous task that pushed our organizational capacity to its outer limits. Rebuilding websites while maintaining existing sites is grueling and absolutely requires additional highly skilled assistance. We were fortunate to be able to lean on Lombiq along the way to clear hurdles that were too high for us to clear ourselves alone. On multiple occasions, Lombiq was available to us on short notice and even at odd hours. For this reason, we are forever grateful for their skilled and prompt assistance and guidance. In short, I can’t say enough about the high-caliber service provided by this firm of brilliant developers and kind individuals. I would wholeheartedly recommend them to anyone looking to partner or enlist similar services as I’ve described above.”

**Prasanna Joshi, Enterprise Architect
and Digital Development Manager**
— City of Santa Monica

“Lombiq is very helpful to get us where we are today. Lombiq not only provided development consulting but also answered our developers’ questions on time. They were instrumental in helping us set up an Azure environment for the Website. Lombiq also assisted in creating short-term and long-term solutions for our approach. We continue to rely on Lombiq’s expertise as we move to the next phase of the project.”

**Bryan Pritchard, Sr. Director
Digital Development & Content
Production — Live Nation**

“There was this pesky problem that surfaced randomly when we enabled a feature on one of our sites and caused recurring (though short) downtimes. Since there was enough work on our plate already we reached out to the Lombiq team to help us fix the issue, which they soon did! We’ll continue to be in touch with Lombiq as our Orchard experts.”
