

## WHY CHOOSE US?

As both hardware manufacturers and software developers, we specialize in providing comprehensive solutions for monitoring and managing a wide array of environmental and operational parameters. Explore our cutting-edge offerings designed to enhance your connectivity and control.

## IOT SOLUTION SERVICES

### VEHICLE TRACKING

Track and manage your fleet with precision using our IoT vehicle tracking solution, providing real-time location updates, route optimization.

### ENERGY AND VOLTAGE MONITORING

Monitor energy consumption and voltage levels remotely with our IoT solutions, empowering you to optimize energy usage and minimize downtime.

### DOOR/LID OPEN AND CLOSE MONITORING

Boost security instantly alerting you to door/lid status changes for proactive responses to unauthorized access or service confirmation.

### PARKING MONITORING

Efficiently manage parking spaces and improve utilization with our IoT parking monitoring system, offering occupancy detection, space availability notifications, and security enhancements.

### TEMPERATURE AND HUMIDITY MONITORING

Use our sensors to monitor temperature and humidity for ideal conditions in sensitive operations, with extensive reporting and alerting on set conditions.

### WATER INGRESS MONITORING

Detect and mitigate water ingress risks using our IoT sensors, which offer early warnings and help prevent damage to infrastructure and equipment.

### TILT MONITORING

Ensure stability and safety by remotely monitoring changes in tilt and orientation with our IoT-enabled tilt sensors.

### LEVEL SENSING OF TANKS

Our IoT-enabled level sensing technology offers monitoring of tank levels, enabling efficient inventory management

## PRESSURE MONITORING

Our IoT pressure sensors deliver accurate pressure readings, enabling you to maintain operational efficiency and safety across various industrial environments.

## ILLUMINATION LEVEL MONITORING

Optimize lighting conditions and energy usage with our IoT sensors that monitor illumination levels, allowing you to create a comfortable and efficient workspace.

## INTERFACE WITH 3RD PARTY DIGITAL OR ANALOG PROTOCOLS

Integrate our IoT solutions with third-party digital and analogue protocols, enabling data collection from your digital assets.

Experience the power of connectivity with IoT Solutions. Contact us today to learn more about how our IoT technology can transform your operations and propel you into the future of smart monitoring and management. Let's embark on this journey together towards a more connected and efficient world.
