

**PLADENT**

Adhesive tapes and foams specialist

# COMPANY PRESENTATION

# ABOUT US

**PLADENT d.o.o.** is a family business with more than **30 years** of experience

**Core business:**

- ✓ **Converting** of **adhesive tapes** and **foams**
- ✓ **Vacuum forming**

Since 1992, the company has maintained **creative solutions** at the highest level of quality. We are distinguished by many years of **experience, ingenuity, quick response, adaptability** and a non-standard approach to the challenge.

# ABOUT US

We are located in  
**Central Region of  
Slovenia**

2 km from motorway  
5 km from airport  
15 km from Ljubljana

- ✓ **Reliable & Timely delivery**
- ✓ Warehouse allows regular customers one-day dispatch without pre-order

# Pladent in numbers

10%

## YEARLY GROWTH

Average increase in the number of employees, new costumers and market shares

4.2

## MILLIONS TURNOVER

Investments in research and development 3 %

40%

## EXPORT SHARE

European and non-European market

30

## EMPLOYEES

With different educations and experiences

4500

## m2 OF PRODUCTION PLANT

New production plant with warehouse (1300 storage places) and offices.

400+

## MATERIALS

One/two-sided adhesive tapes (3M, Tesa, Nitto,...), foams (PE, PUR, EPDM, EVA,..), felt etc.

1000+

## DIFFERENT PRODUCTS

Labels, sealing gaskets, tapes, packaging, transport trays, protection, foam tubes etc.

35+

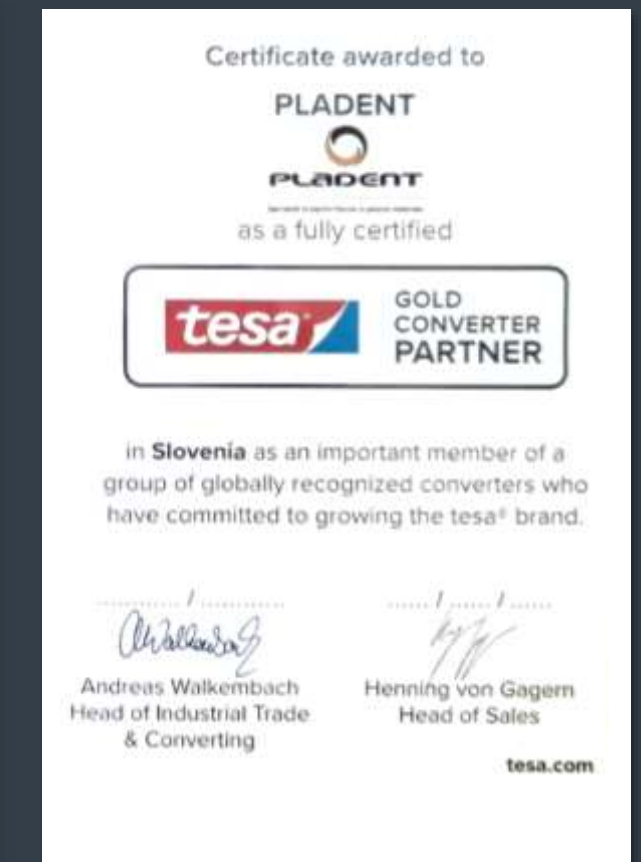

## MACHINES

Different technologies: Kiss-cut, die-cut, laser-cut, rotary presses, slitting, vacuum forming, lamination...

# QUALITY

- ✓ We continually upgrade our **ISO 9001** quality standard registration, which assures our commitment to the quality of our products and production facilities.
- ✓ We are **ISO 14001** certified.
- ✓ We are official **3M Preferred Converter**
- ✓ We are official **Tesa Gold converter partner**
- ✓ We **consistently upgrade the quality** of our products and production processes to meet our customers' expectations in terms of product quality, quality control and short delivery times.
- ✓ We introduce **new technologies and product quality control** into all production processes.

# MAIN MARKETS

## HOME APPLIANCES

Sealing gaskets, sound and vibration damping, labels for adhering electronics, etc.

## AUTOMOTIVE

Sealing gaskets, reflective foils, protective foils, labels for adhering electronics, etc.

## CONSTRUCTION

Sealing gaskets, self-adhesive profiles, decorative labels, etc.

## PACKAGING

Transport trays, blisters, boxes, foam inserts, protective packaging etc.

## OTHER

Electrical, medical, carpentry, leisure, sport, food, fashion, prototyping etc.

**MATERIALS**

# OUR MATERIALS

## FOAMS

EPDM, PE (chemically & physically cross-linked), open-cell, PUR, SILICONE, CR, NBR, EPE, ...  
WITH or WITHOUT ADHESIVE

## DOUBLE-SIDED ADHESIVE TAPES

Acrylic foam tapes (VHB), transfer tape, tissue tape, Fire-retardant tape

## OTHER

Surface activators (primers), spray adhesives, cleaners felt, dual-lock, profiles, tubes

## ONE-SIDED ADHESIVE TAPES

Protection, masking, marking, sealing, packaging, fastening, aluminium, duct tapes

## PLASTIC

Protection foils, PS, A-PET, ESD, PC, ABS edge-banding tapes

# CORE TECHNOLOGIES

# OUR TECHNOLOGIES

## Slitting

Slitting machines are used for slitting soft and semi-grid materials on rolls (foams, adhesive tapes, felts, etc.).

## Rewind slitting

In rewind slitting, a whole roll is placed into a slitter rewinder and then passes through a series of blades at a time.

## Die/kiss-cutting

Roll-to-roll kiss cutting is used to cut the top layer of a material without cutting through a backing attached material.

## Laser cutting

In laser cutting the material is cutted according to the drawing pattern. Perfect for complex shapes and sampling.

## Lamination

Lamination is the technique of combining multiple materials into one composite material.

## Tube welding

Foam tubes are used for vibration and noise reduction, insulation, scratch protection and against external influences.

## Assembly

We offer assembly of different small components, especially in combination with inhouse produced products.

## Vacuum forming

Vacuum forming is a versatile technology that can be used for different products: transport trays, blisters, packaging etc.

The background features a pattern of overlapping circles in various shades of gray and blue, creating a sense of depth and movement. At the bottom of the image, there is a horizontal bar composed of five distinct color segments: green, teal, light blue, yellow, and red.

**WHAT CAN WE DO?**

# Our products

**Adhering, sealing**

**Attaching small parts,  
assembly**

**Wiring, protection**

**Transport protection**

**Emblems**

**Adhering control panels,  
circuits**

**Temporary or permanent  
surface protection**

**Industrial trays**

# OUR PRODUCTS

# WHY WORK WITH US?

## EXPERIENCE

30 years of experience and excellence in the field of plastic casting, processing and converting of single-sided and double-sided adhesive tapes and foams.

## SAMPLING

Laser, 3D printer and CNC with oscillation enable us to produce sample batches.

## SMALL SERIES

A versatile machine park allows us to produce large and small batches..

## IN-HOUSE TOOL SHOP

For the purpose of tool making, maintenance and sampling.

## SHORT DELIVERY TIME

Stock of regular items for fast delivery.

## ADAPTABILITY

Rapid response to material changes or changes in product shape.
