Our Tool to assess the uniqueness of an R&D project, support its exploitation by identifying competitors & alternatives and designing scaling up strategies and action plans.

NSB's AI-based tool: C-Tech Navigator

Application scenarios in European R&D projects:

Project preparatory phase:	accelerate and guarantee comprehensive prior art analysis
Support the exploitation process – initial phase:	quickly identify existing or potential alternatives
Support the exploitation process – during the project:	run competitive analysis, identify promising markets and new partners (research, industrial, commercial), suggest adjustments (where relevant)
Last “mile” of the project:	identify all possible future alternative scenarios in terms of further developments, required investments, upscaling options

Our Competences: how we make the difference

R&D Decision Support

R&D implementation & execution support

Market & adoption readiness

Market entry & scaling

Partnership development:

Industrial partners and end-users from our network

Pilot design, coordination and assessment

Market research and analysis and Economic viability assessment
