MOB-ENERGY

OUR CUSTOMERS' CHALLENGES

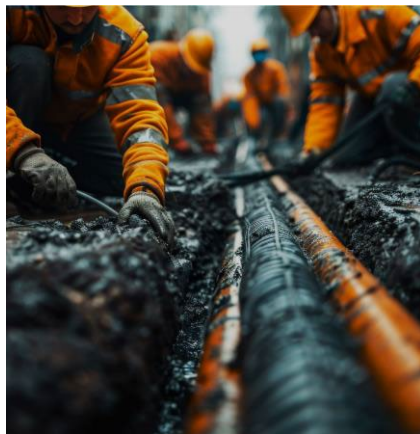

INERTIA vs ACCELERATION

« My fleet is large. It electrifies very quickly.

I need a solution that's quick to install and scalable.»

Laurent Z.
Fleet Manager

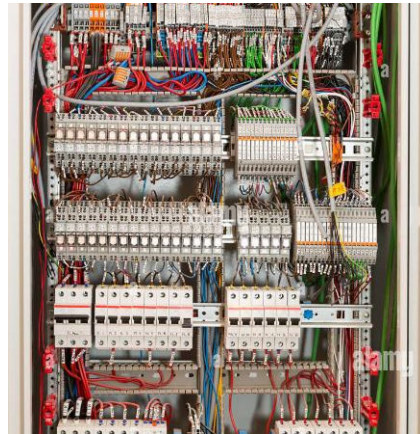

COMPLEX WORKS

« Deploying the charging stations I need to install requires trenches and hundreds of meters of cable pulling.

Costs and timescales explode.»

Eric C.
Facility Manager

MISSING POWER

« I have only 40kW left on my main electrical board, but I have 15 charging stations to install.

I'm afraid deadlines will push the project back to next year. »

Edwin P.
Energy Project Manager

MANAGING UNCERTAINTY

« I'm being asked to invest today, but my needs are going to change.

I need a future-proof solution, adapted to my current needs and the constraints of tomorrow. »

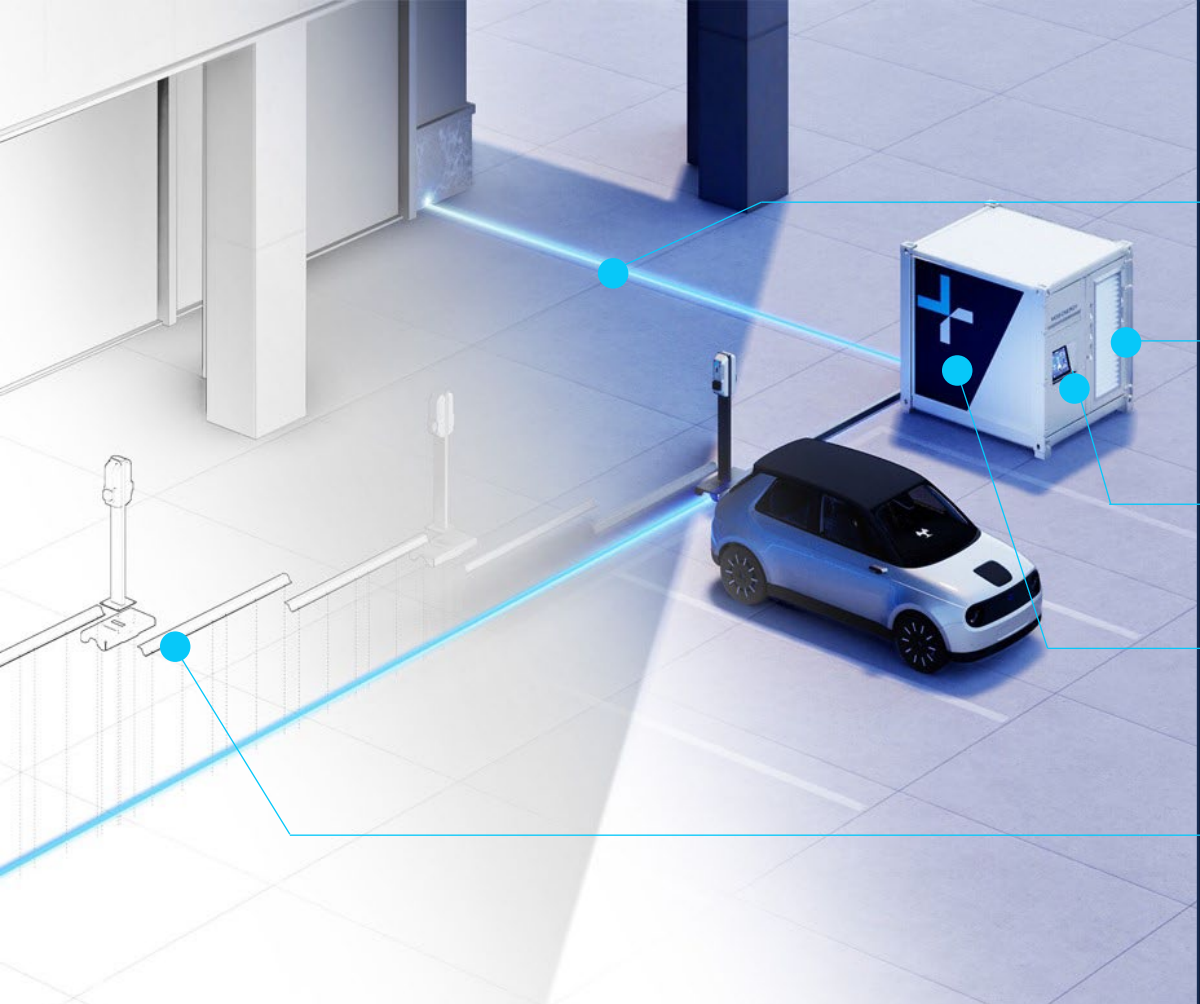

Céline D.
Resources Manager

EIKO

**SCALABLE ENERGY AND POWER
OPTIMIZATION PLATFORM FOR
ELECTRIC VEHICLE CHARGING AND
INTELLIGENT STORAGE**

THE EIKO PLATFORM

- 01 SIMPLE CONNECTION**
One network connection, equivalent to one charging point
- 02 EIKO MANAGES POWER**
The EikoPower power module distributes energy where it's needed.
- 03 USERS PLACE ORDERS**
With EikoXperience, users tell when they will leave and how much energy they need
- 04 ORDERS ARE PRIORITIZED AND OPTIMIZED**
Thanks to the EikoFlow scheduling algorithm
- 05 POWER IS DISTRIBUTED OVER A SINGLE ABOVE-GROUND CABLE**
The EikoLink can manage up to 25 charge points

IN SUMMARY

SAVE MONEY, NOW.

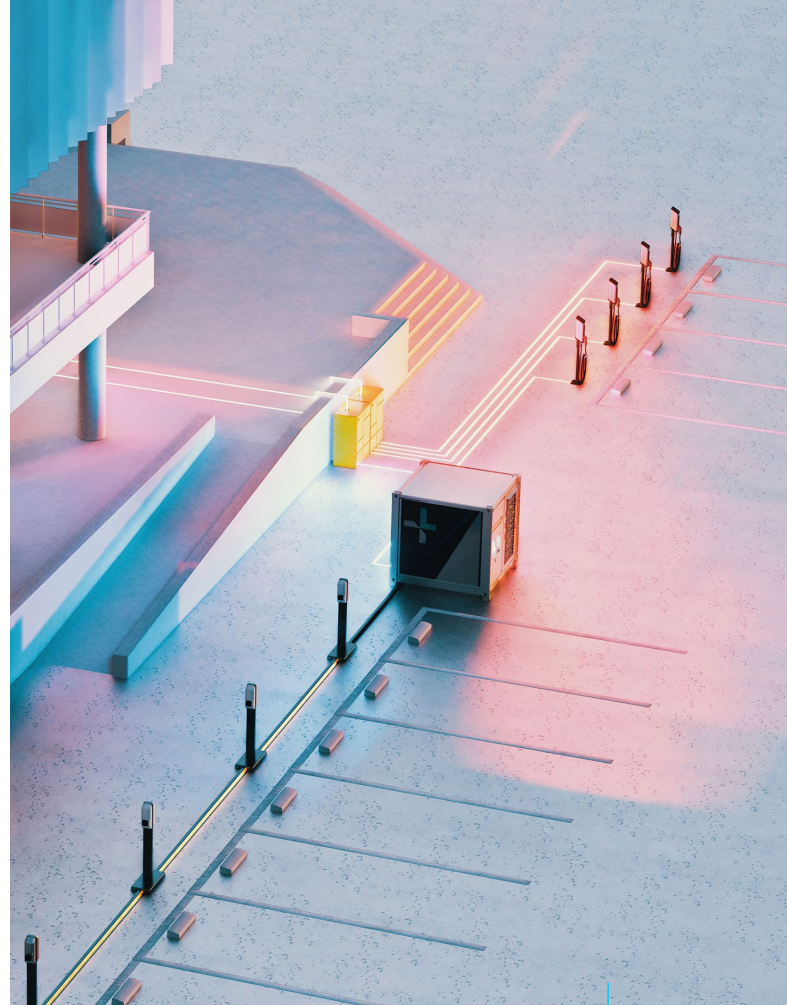

-  Cut out the heavy earthworks
-  Avoid power increase work

SAVE (LOTS OF) TIME.

-  Deploy in less than 5 days
-  Upgrade in 1 day and move if needed

SELF-FINANCE YOUR INFRASTRUCTURE.

-  Integrated monetization, by TPE or badge
-  Batteries finance your investment (off peak tariffs)

THANK YOU

**LET'S TALK ABOUT
YOUR PROJECTS.**
