SOLUTIONS

More UNITEC solutions for your business.
More business for your citrus fruit.

Gentle fruit handling

Technologies designed for careful handling **to prevent mechanical damage to the product**, ensuring the best for your business.

Reliability in quality selection

Highly precise quality selection to allow you **to respond to every market request**, on every supply, every time.

High level of automation

Automated systems developed **to greatly reduce the need for labor** involved in the different phases of your fruit handling process.

Significant reduction in handling costs

Solutions that **increase the efficiency** of a processing phase or an entire line, allowing you to achieve **considerable savings on handling costs**.

Traceability

The exclusive **UNI TRACER software package**, entirely designed by UNITEC, allows you **to record and manage the traceability of different batches** throughout the entire process.

MORE VALUE⁺

The more accurate the quality selection,
the more future for your business.

UNITEC technologies dedicated to citrus fruit enable to select the valuable or non-valuable characteristics of any kind of citrus fruit with high reliability and precision, while totally safeguarding the integrity of each fruit.

UNITEC solutions give you the possibility to guarantee absolute consistency of the quality offered to your customers and to increase operation margins drastically reducing sorting costs.
