TOWARDS THE CREATION OF THE AI CONTINENT

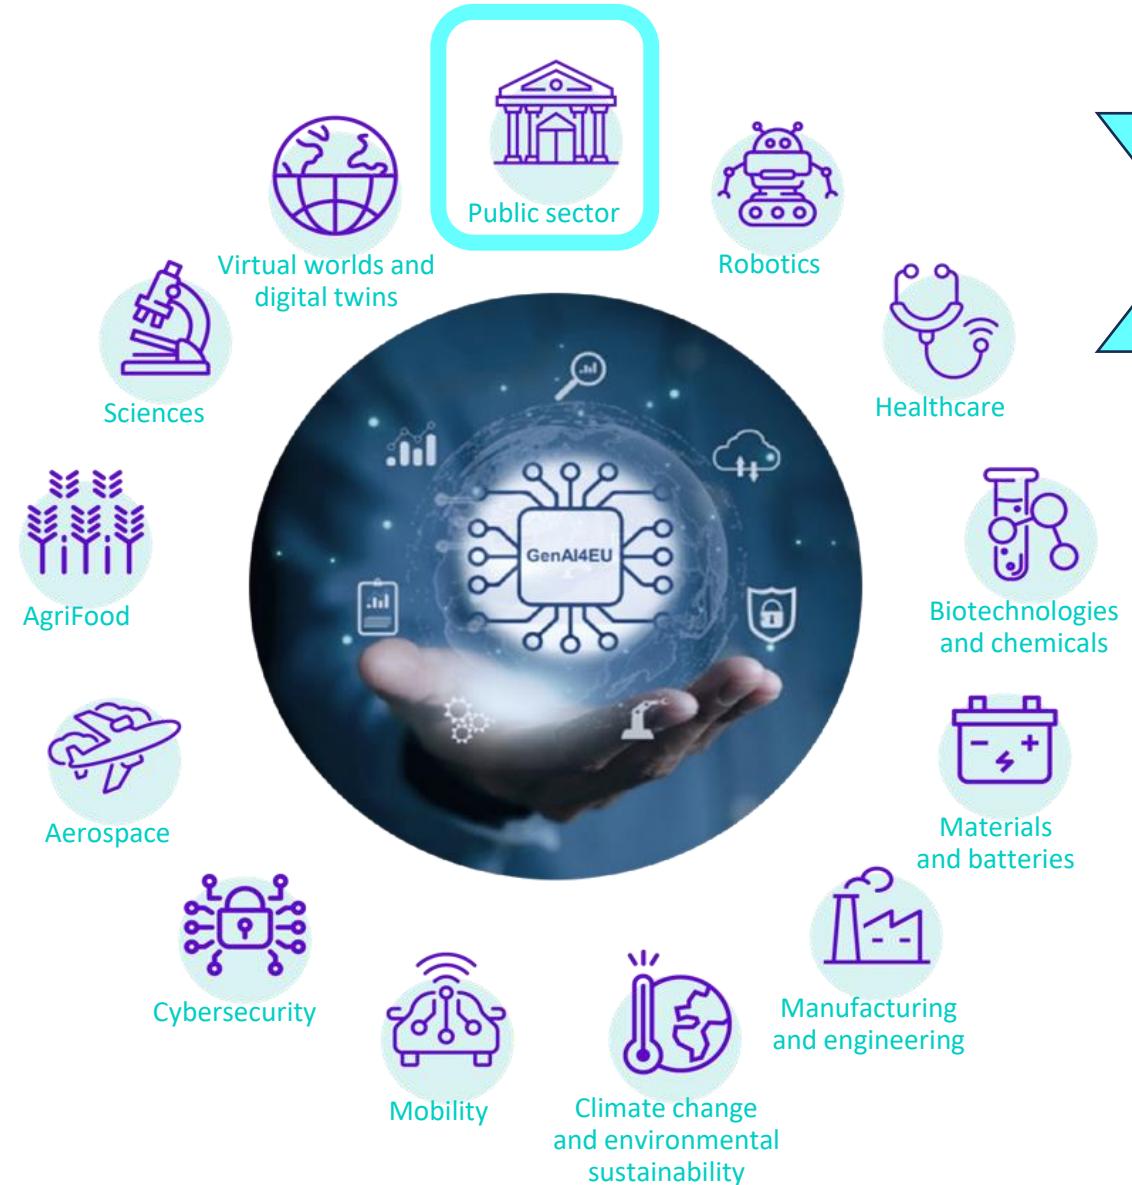

Focus on GenAI4EU Initiative

Stimulate widespread uptake of genAI
“Made in EU” across:

- strategic industries
- public sector
- Science

Startups & innovators work closely with industrial users and Public Administrations
→ attract investments + access key ingredients of AI - ***data, computing, algorithms and talent.***

€500M

€690M
in planned calls

Objective Exceeded!

Digital Europe Programme: tech sovereignty

Build digital infrastructures and capacities

in critical sectors (AI, data spaces, cloud, supercomputing, chips, cybersecurity, digital transformation of public administration, skills)

Achieve scale through collective co-investments

Given the size of investments needed, scale required, and risks involved Europe needs to pool the resources together

Regain control over Europe's value chains and ensure Europe's technological sovereignty

Better address Europe's economic and societal challenges

E.g. climate, health, mobility and public services

Ensure broad take-up of digital technologies across all regions of EU

In deploying latest technologies to offer best services to citizens and business

Support SMEs to acquire or access the latest technologies and skills

More than 400,000 EU vacancies in these fields

WP 25-27

SO2

Making Europe an AI continent

Cloud-to-edge

Data for AI Factories

ApplyAI: GenAI for Public Administration

Deploying AI EDIHs

Destination Earth

SO3

Cybersecurity

SO4

Advanced Skills

Sectorial digital academies

Masters

SO5

Accelerating the best Use of Technologies

Justice and Consumers

Safer Internet

Support to MCPs

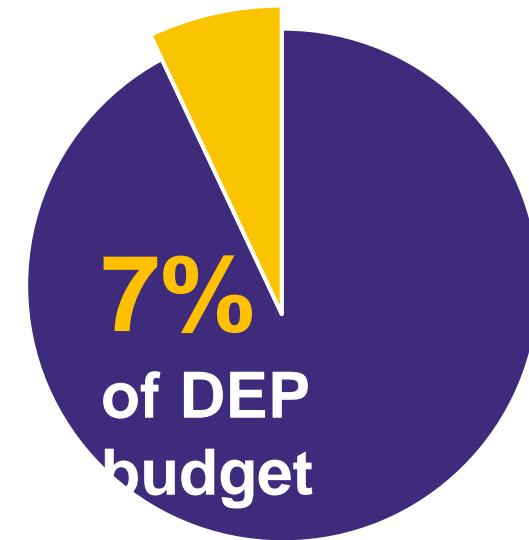

Article 12(6) in WP 2025-2027

SO2

AI Continent

Critical infrastructure with impact on key sectors like **cloud-edge node deployment, health, industry and the public sector**.

Restricted Calls – 12.6

What is Article 12.6?

It excludes:

Legal entities established in a third country or DEP associated country

- Except: EEA (status equivalent to the Member States) + Switzerland

Legal entities established in the EU territory but controlled by a third country or third country legal entities (including DEP associated countries)

- Except: guarantee by the competent authorities of their country of establishment demonstrating no contravention of security or EU strategic autonomy interests.

New Funding Opportunity for in Public administration

Topic id: **DIGITAL-2025-AI-08-SUPPLY-AI**

Title: *Apply AI: GenAI for the public administration*

Budget: EUR **21 million**

Type of Action: **Grant for procurement**

Nr of projects: up to **four projects** (EUR 5/7 million each)

Call opening: from **15 April** until **2 September 2025**

Future support from a **CSA** of EUR 2 million – 2026

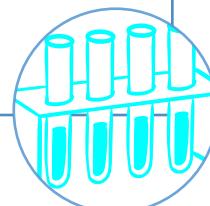

50% co-funding from Member States/PA beneficiaries required

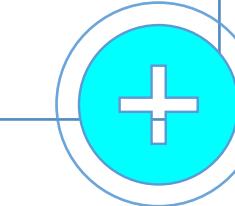

What is the Call about

Three Core Dimensions

Pilots of
European GenAI
solutions in
public
administrations

Replication of
piloted GenAI
solutions across
public
administrations
and Member
States

GenAI4EU
community of
public
administrations
in Europe

Key objectives of the Call

Simplify legal and administrative procedures

Streamline internal processes by automating routine tasks, saving time and resources

Key goal is to accelerate the adoption of scalable and replicable GenAI solutions in key functional areas

Improve decision-making with data-driven insights

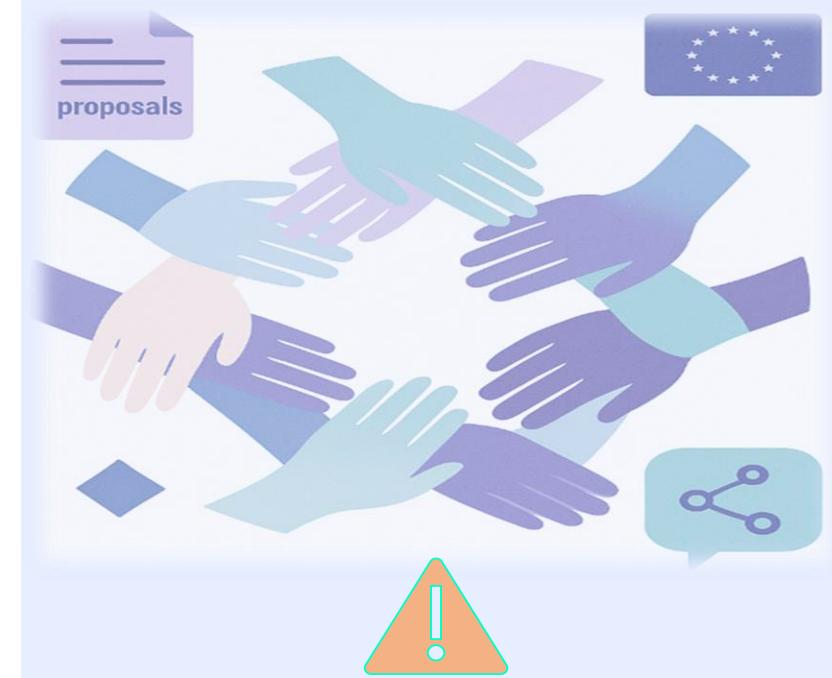

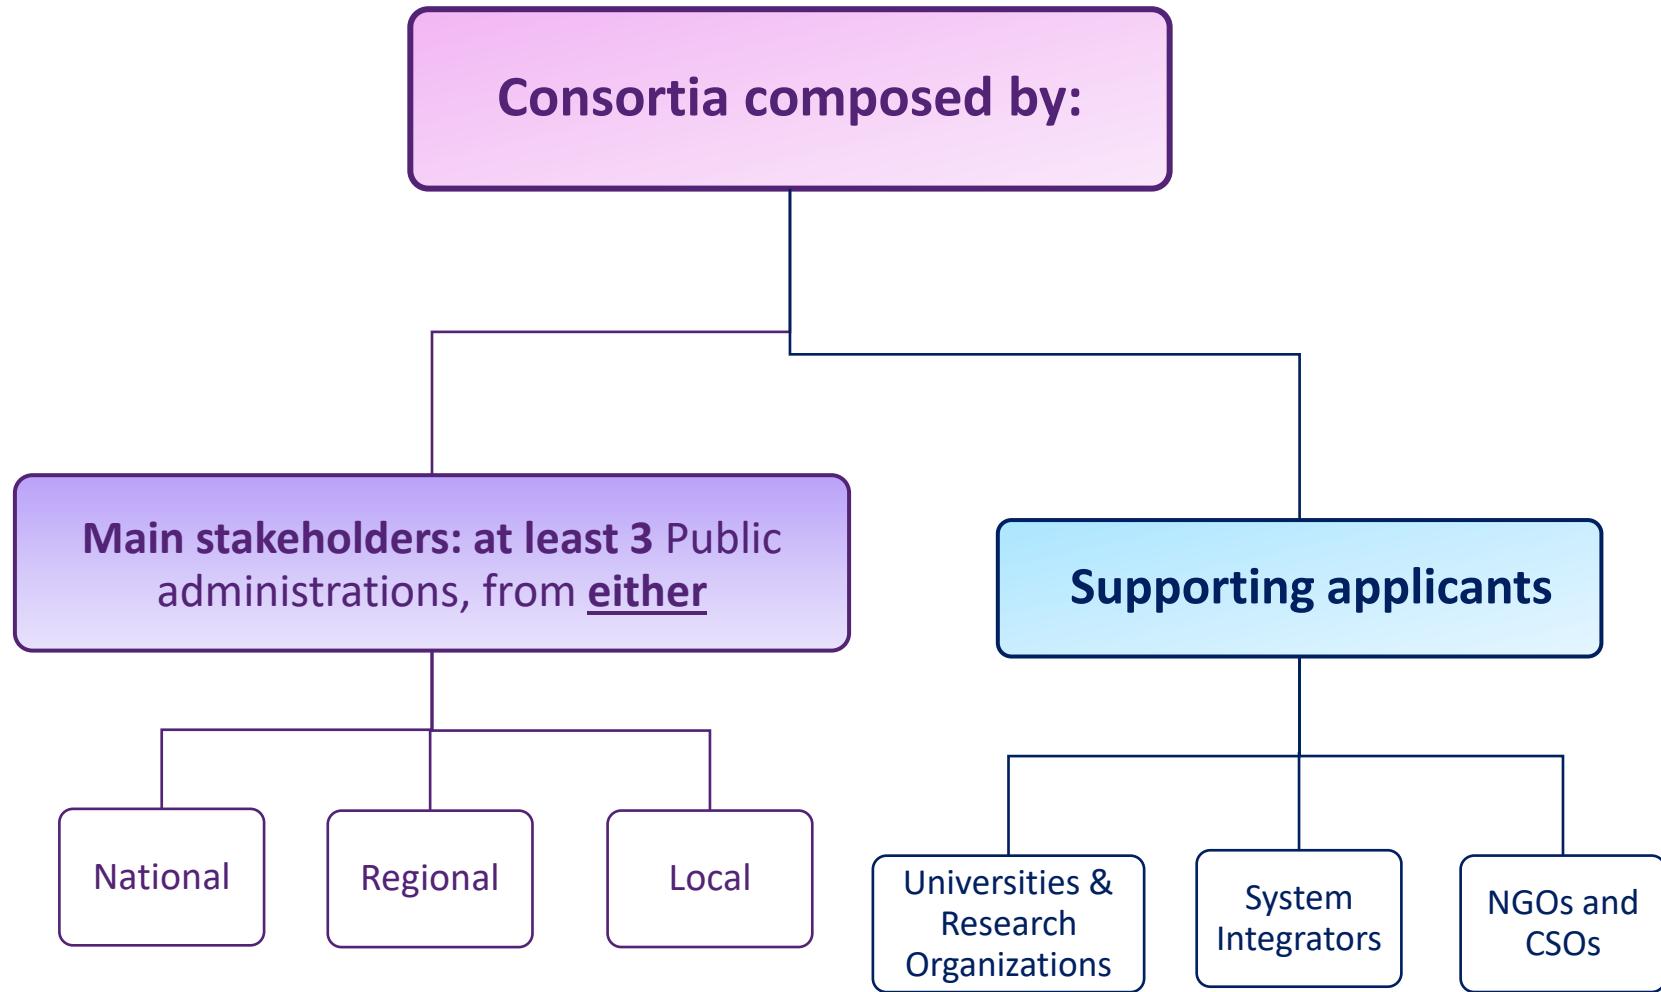

Enhance personalized citizen services

EUROPEAN ARTIFICIAL
INTELLIGENCE OFFICE

Who can participate?

- Each public administration may take part in only **one** pilot project.
- Consortia must be **multi-beneficiary**
 - minimum from two different MS/associated countries.
- This is a **grant for procurement**: GenAI solutions will be purchased by selected consortia of public administration.

Roles in the Consortium: Public Administrations vs Supporting Applicants

Public Administrations (PAs) → *Main applicants and end users*

- **Lead** the consortium
- **Define the needs and use cases** based on real public challenges
- **Procure** the GenAI solution through national public procurement procedures
- **Deploy and integrate** the solution in their operational systems
- **Ensure co-funding** and institutional commitment

Supporting Applicants

- *Technical, research, and advisory partners*
- **Support** the **design of use cases** and **technical requirements** before procurement
- **Advise** on model adaptation, integration needs, and ethical compliance
- **Assist** with piloting, and training during and after deployment
- **Help** to collect user feedback
- **Contribute** to documentation, lessons learned, and blueprints for **replication**

Focus on Grant For Procurement

Important aspects to consider for grant for procurements:

- The type of actions are described in the **work programme annex** and the call document annex – those descriptions must be followed:
 - main goal of the action consist of **buying goods or services and/or subcontracting tasks**
 - **Limited** personnel costs
- Read the targeted stakeholder section carefully
- Additional conditions might be included in **section 6 and 10** for grants for procurements
 - Consortium composition
 - Pre-financing
 - Reimbursement option for equipment costs
- The budget table should be consistent with the type of action
- Adapt deliverables to the type of action

Example Use cases

Example 1:

Smartbot for citizen interaction

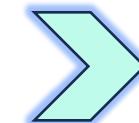

- Answering questions
- Supporting application processes
- Supporting Filling out forms

Example 2:

Support urban planning

- Analysing data
- Supporting decision-making

Large variety of possible use cases
Stay for the PITCHING SESSION!

EUROPEAN ARTIFICIAL
INTELLIGENCE OFFICE

Example Use cases

How could public administrations work together in consortia on these use cases?

Requirements

- Partners from **minimum 2** different member states
- **One generative AI solution** and approach used for all partners
- Possible customization or **adaptations for local requirements**

Examples

Local training with

- Specific languages
- Internal documents
- City infrastructure

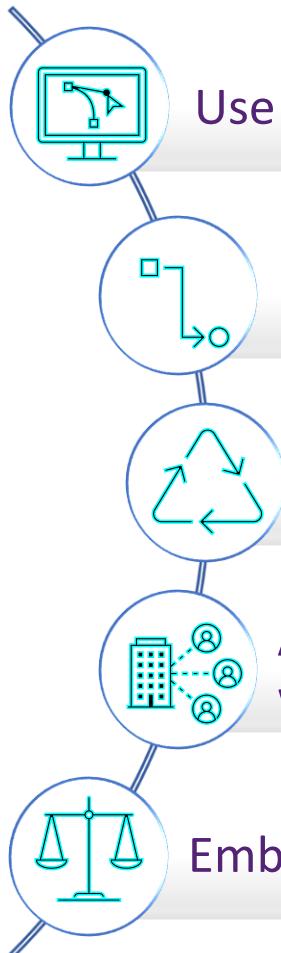

Scalability & Transferability is key!

EUROPEAN ARTIFICIAL
INTELLIGENCE OFFICE

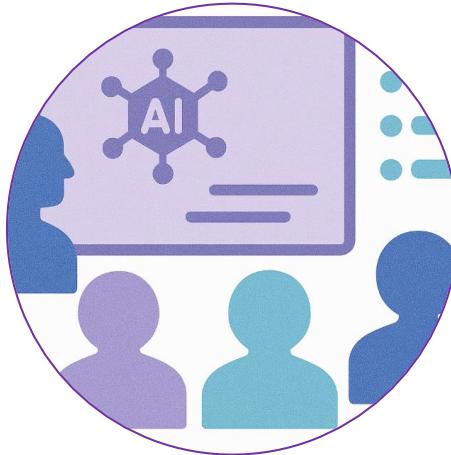

Specific Requirements for Each Pilot

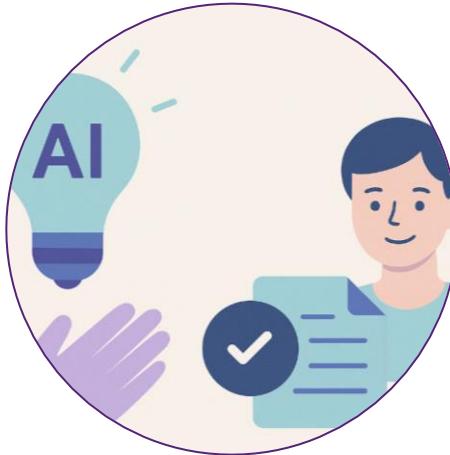

- Use **European GenAI solutions** (supporting EU technological sovereignty) –art 12.6
- Include **impact measurement** (efficiency, accessibility, cost-effectiveness)
- Be **replicable** and **scalable** to other administrations and Member States
- Address specific public administration **needs**, such as staff shortages, complex workflows, language barriers
- Embed **human oversight, cybersecurity**, and full compliance with the **AI Act**

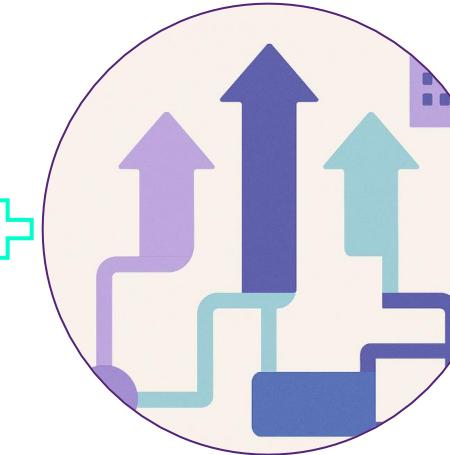

What proposals should include

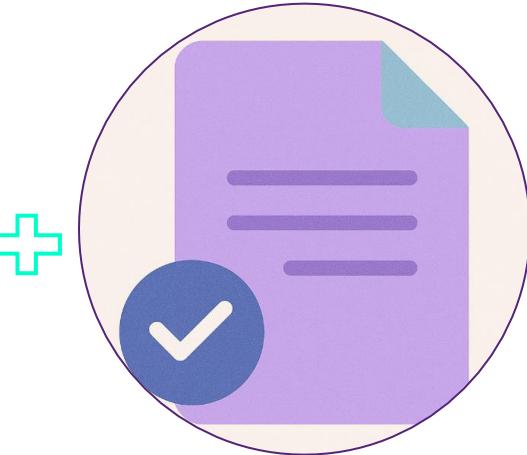

An overview of the **planned GenAI solutions** and the **specific use cases** where these solutions will be deployed across participating PA

An overview of the **expected outcomes and benefits** of the proposed GenAI models and solutions

An outline of the consortium's capacity to successfully **integrate and scale up** the proposed GenAI models and solutions

Letter of commitment from Member States or local/regional authorities confirming co-funding support if the project is selected.

EUROPEAN ARTIFICIAL
INTELLIGENCE OFFICE

What Can Be Procured? Activities Covered

Expected main eligible Activities

- Fine-tuning of European foundation models (12.6 DEP Regulation)
- Developing tailored solutions based on these models.
- Integrating them into their existing platforms, systems, and operational workflows.

Additional Activities:

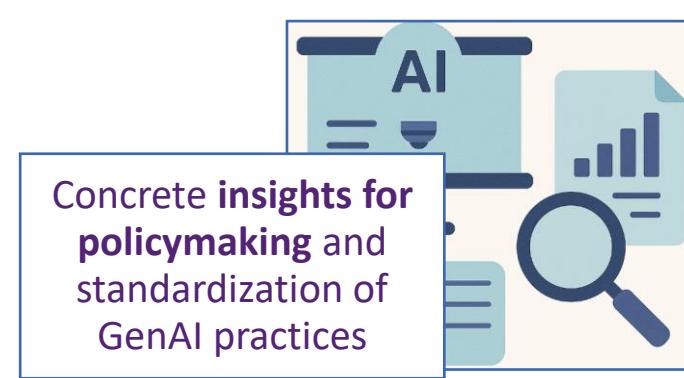

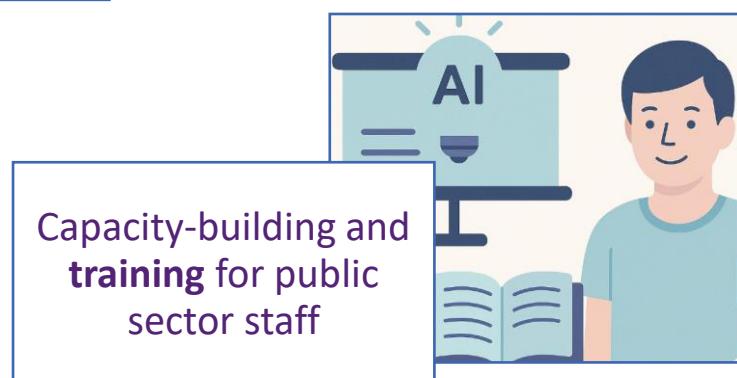

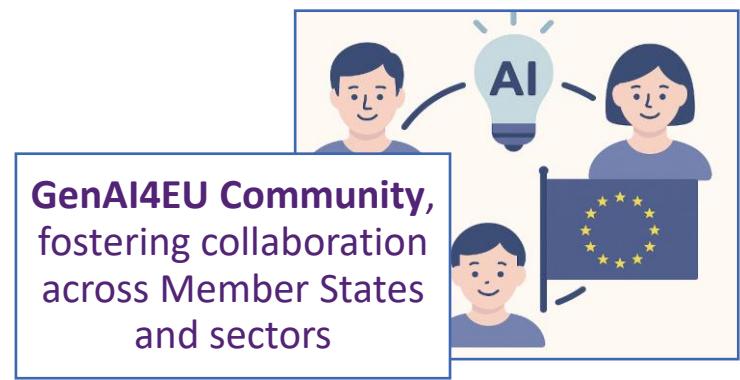

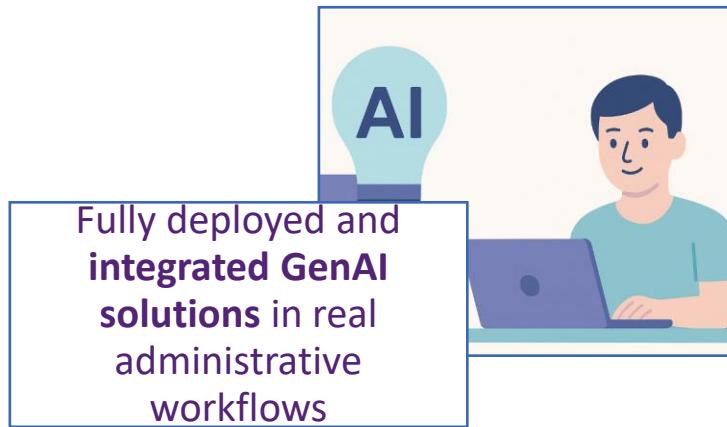

- Providing training and support for public administration staff.
- Maintenance and optimization of deployed solutions.
- Technical infrastructure required to deploy and run GenAI solutions at scale

At least 50% of the budget must go to procurement

What projects will deliver

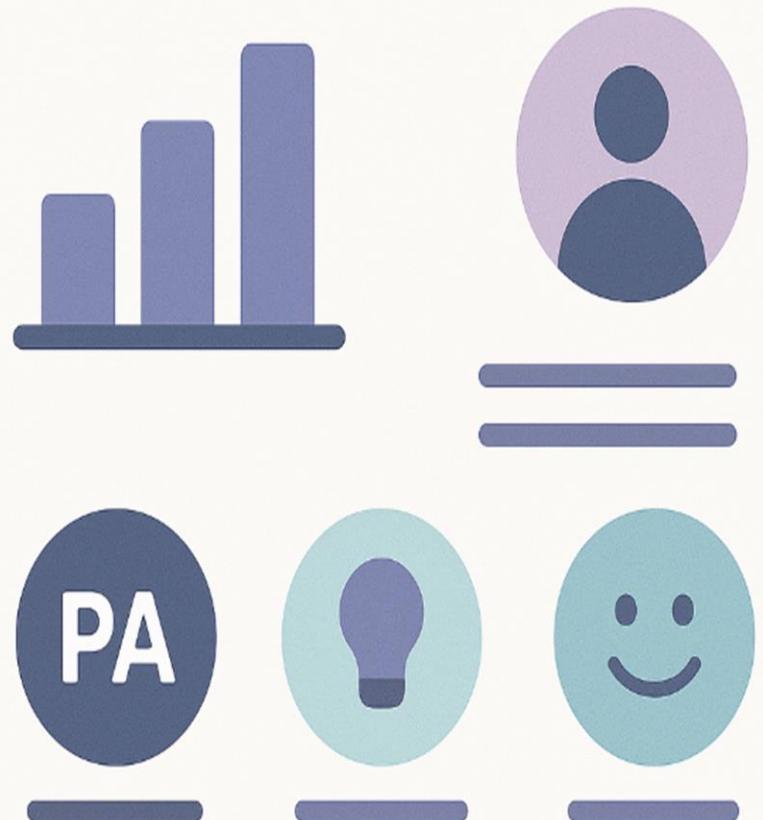

Expected Call Outcomes:

...and how we'll measure them

-  Number of PA using GenAI solutions
-  Number of GenAI-powered services delivered to citizens and business
-  Measurable gains in time and cost efficiency
-  Public employees satisfaction index
-  Number of other administrations replicating the pilots
-  Number of actionable policy insights generated
