

TTTechAuto

Safe computing platforms for automated driving and beyond

Marc Lang and Patrik Fiegl

Advancing safe technologies, improving human lives

A global Auto-Tech leader from Austria

1.200+ Highly-skilled software engineers

20+ Years of cross-industry experience in development of safety-critical systems

60+ Network of OEMs, Tier 1s and technology partners

22 Patent families for system safety

Member of TTTech Group, privately held Austrian high-tech company

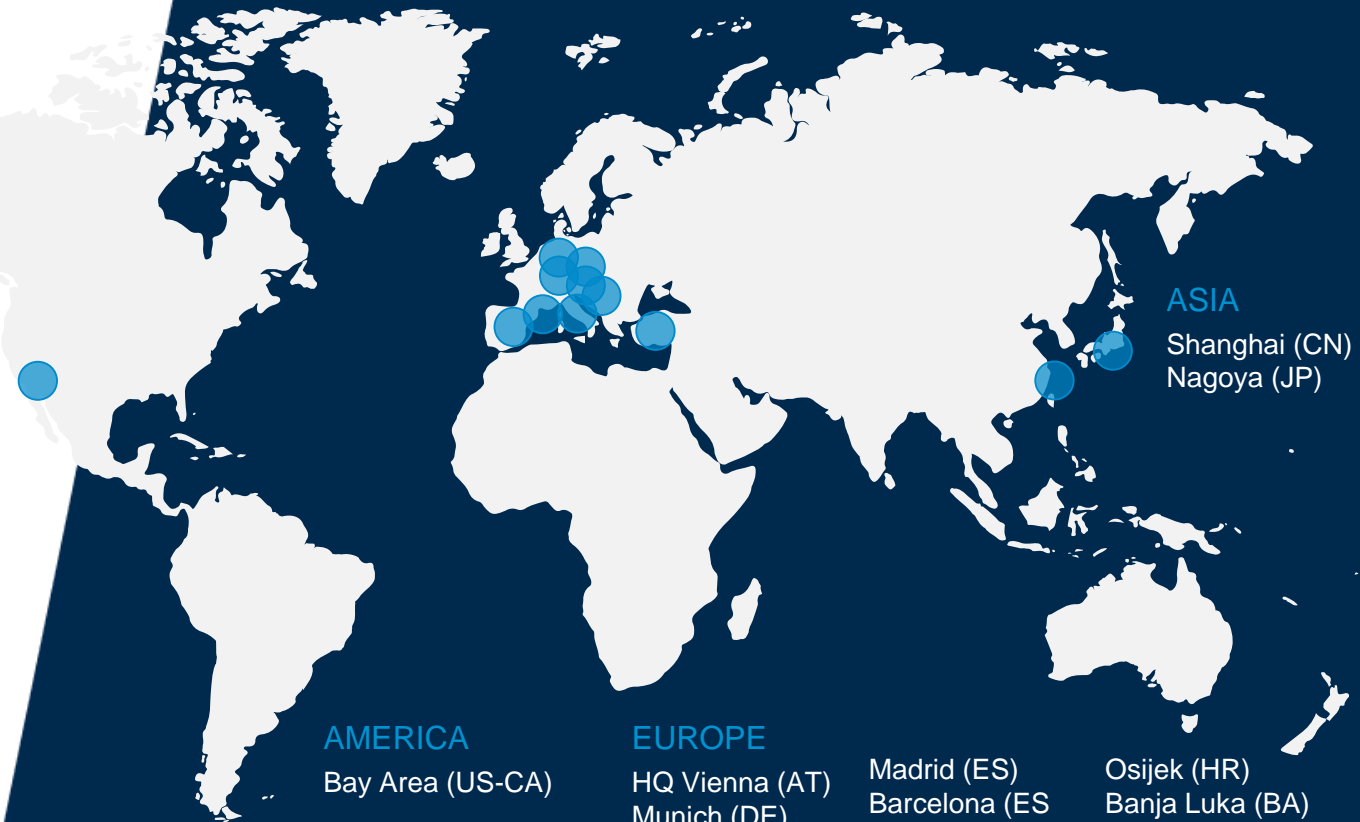

Innovation leader – from of groundbreaking academic research to series production

Ecosystem leading industry & research partners

International footprint with **12** locations

TTTech's DNA: Safe System Design

Development and deployment of safety-critical avionics networks, for e.g., Boeing 787, Airbus A220 (fly by wire), NASA Orion spacecraft, ESA Ariane 6

>1 billion flight hours

23 different aircraft types

700 million passengers

First series-proven ASIL D safety software platform for ADAS Domain ECUs in the market

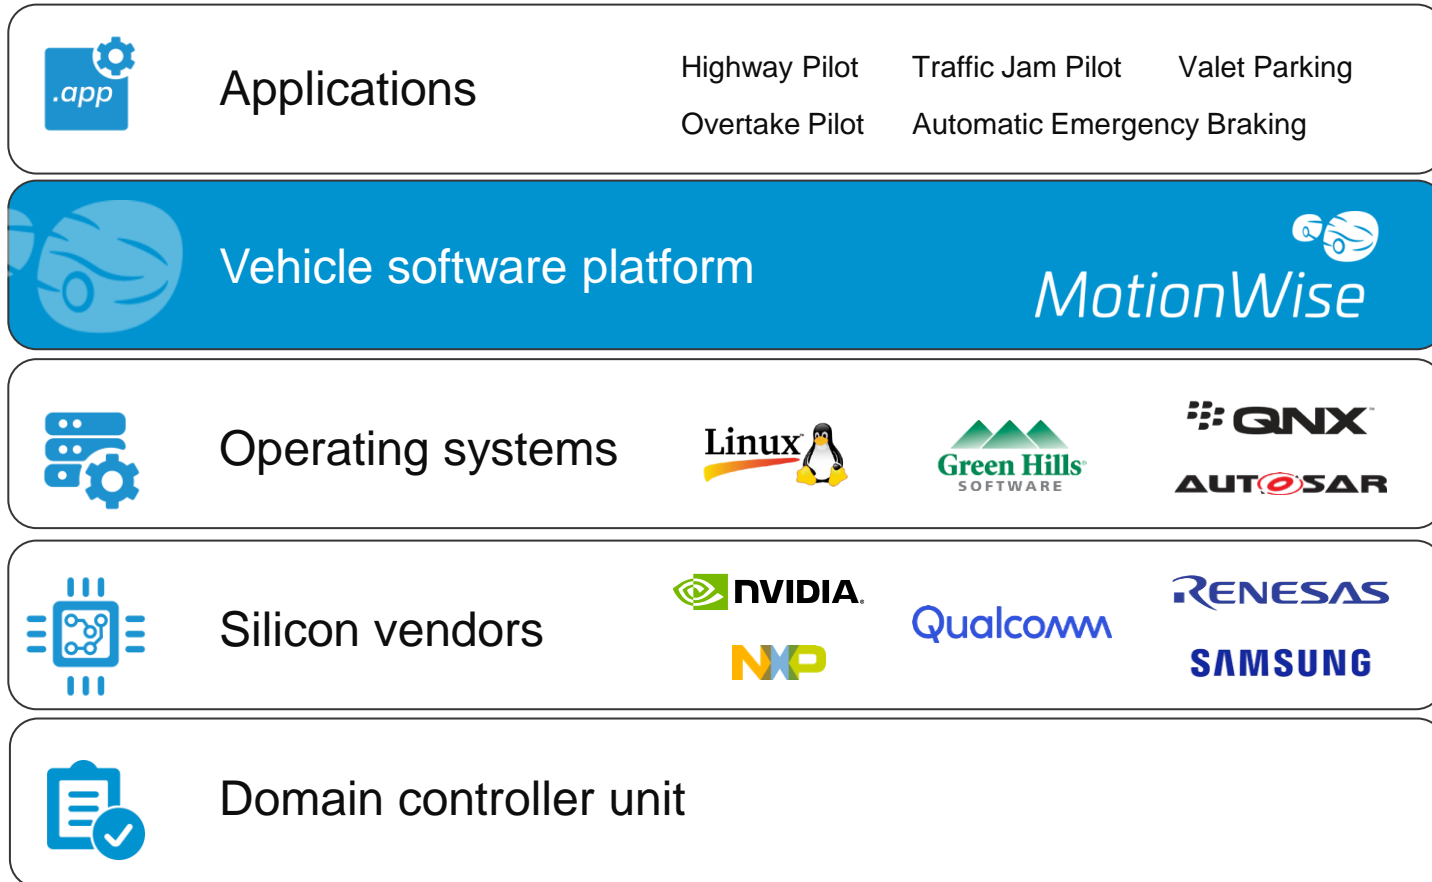

>2 million vehicles

Transforming leading research into market-shaping, safety-critical aviation products and advanced driver assistance system (ADAS) platforms.

TTTech Auto MotionWise – the safe software vehicle platform for automated driving, based on experience in the development and deployment of safe and reliable critical avionics systems/networks.

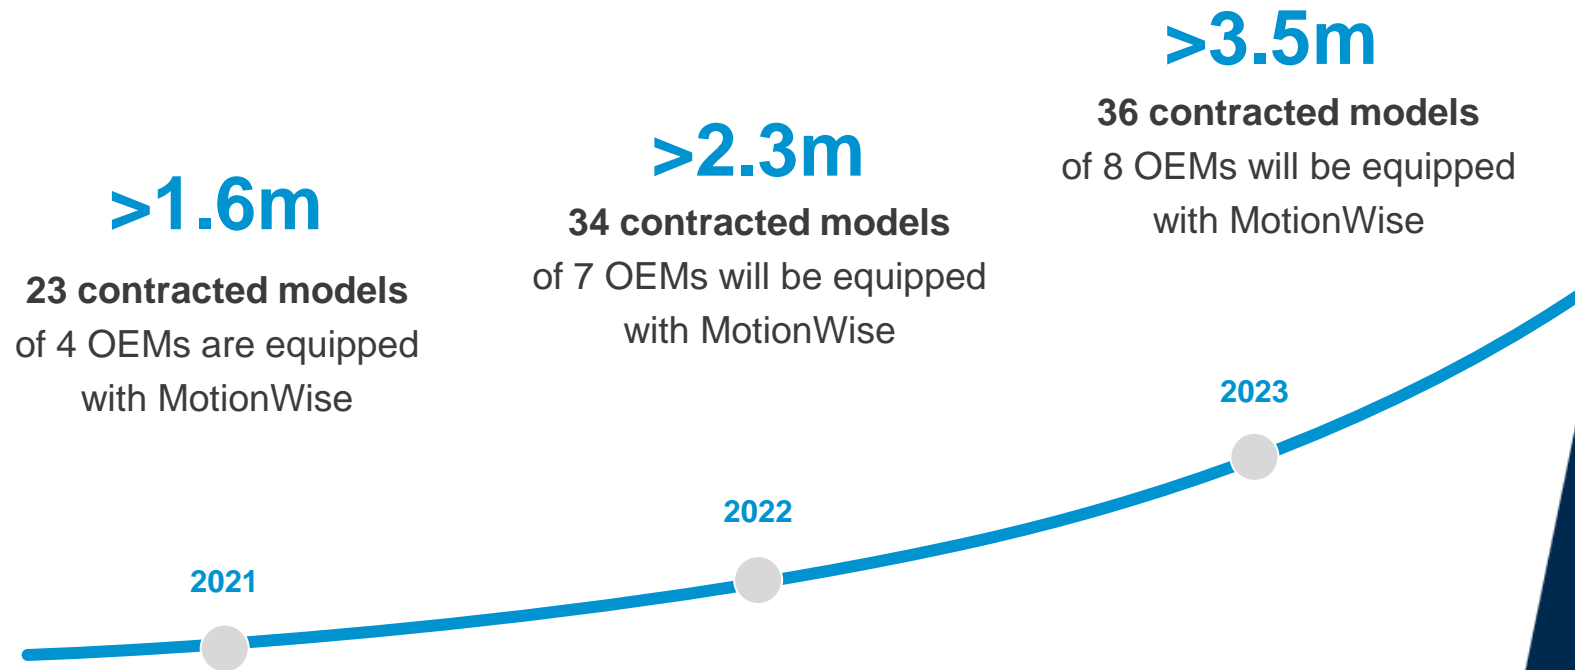

Vehicle software architecture

MotionWise

The leading
vehicle software platform
deployed already on more than
2.000.000 cars.

MotionWise already in series production

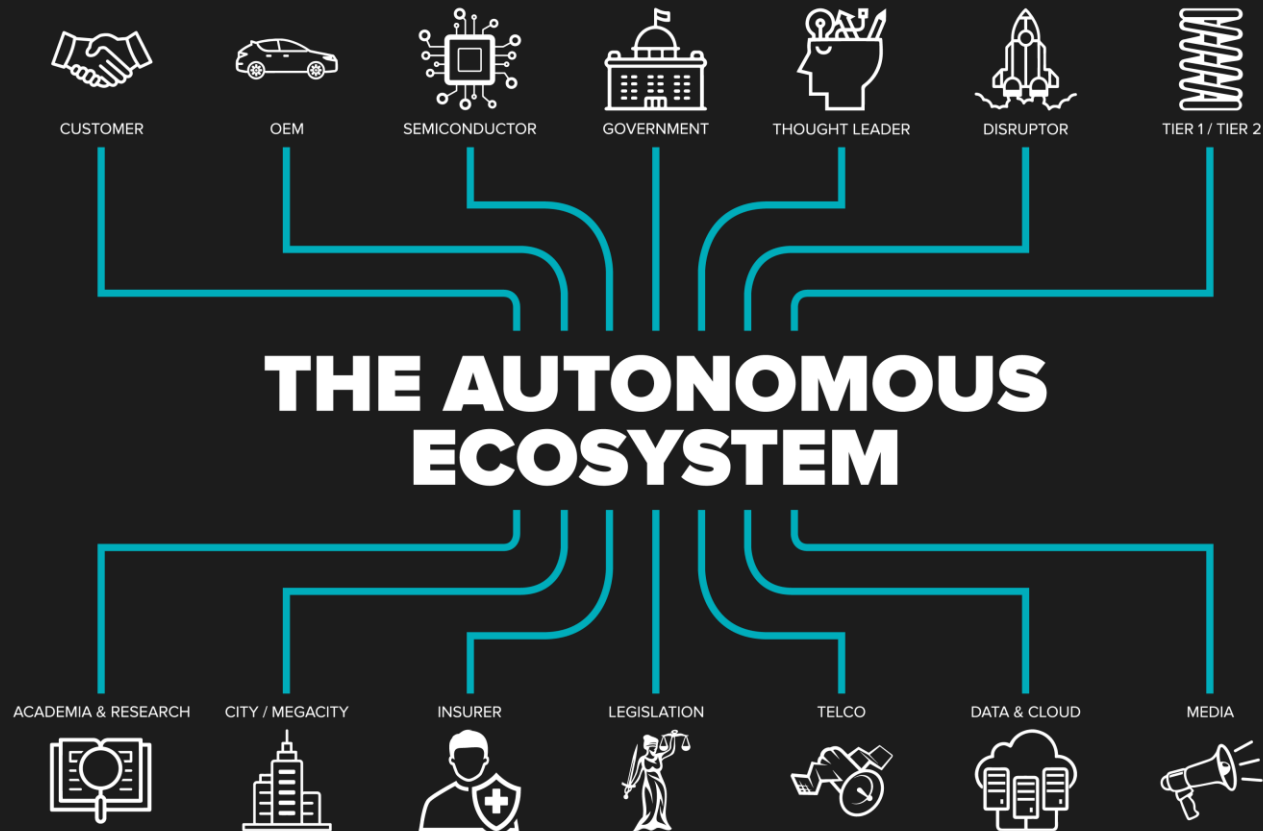

Contracted vehicle volumes with TTTech Auto's MotionWise platform on the road since 2014.
