Enjoy the benefits of partnering with us:

Specialized Expertise
Teams experienced with clinical data, medical imaging, lab systems, and secure patient flows.

More Value per Build
Efficient delivery models let you invest more in quality, adoption, and innovation not overhead.

Compliance from Day One
 HIPAA, HL7 FHIR, ISO 13485, GDPR built in from the start, not bolted on later.

Speed Without Chaos
We launch MVPs in 4–6 weeks without cutting corners or creating long-term risks.

Romania - your health tech development HUB

Romania stands out as a software development destination due to its EU membership, strong IT education, and deep expertise in health-tech solutions.

Healthcare-Experienced Talent
Our team includes developers and architects with deep experience in regulated healthcare environments.

Collaborative by Design
We work in sync with U.S. teams, with aligned expectations, shared values, and real-time collaboration.

Compliance You Can Build On
H7L FHIR, HIPAA, GDPR and more baked into how we design, build, and deliver.
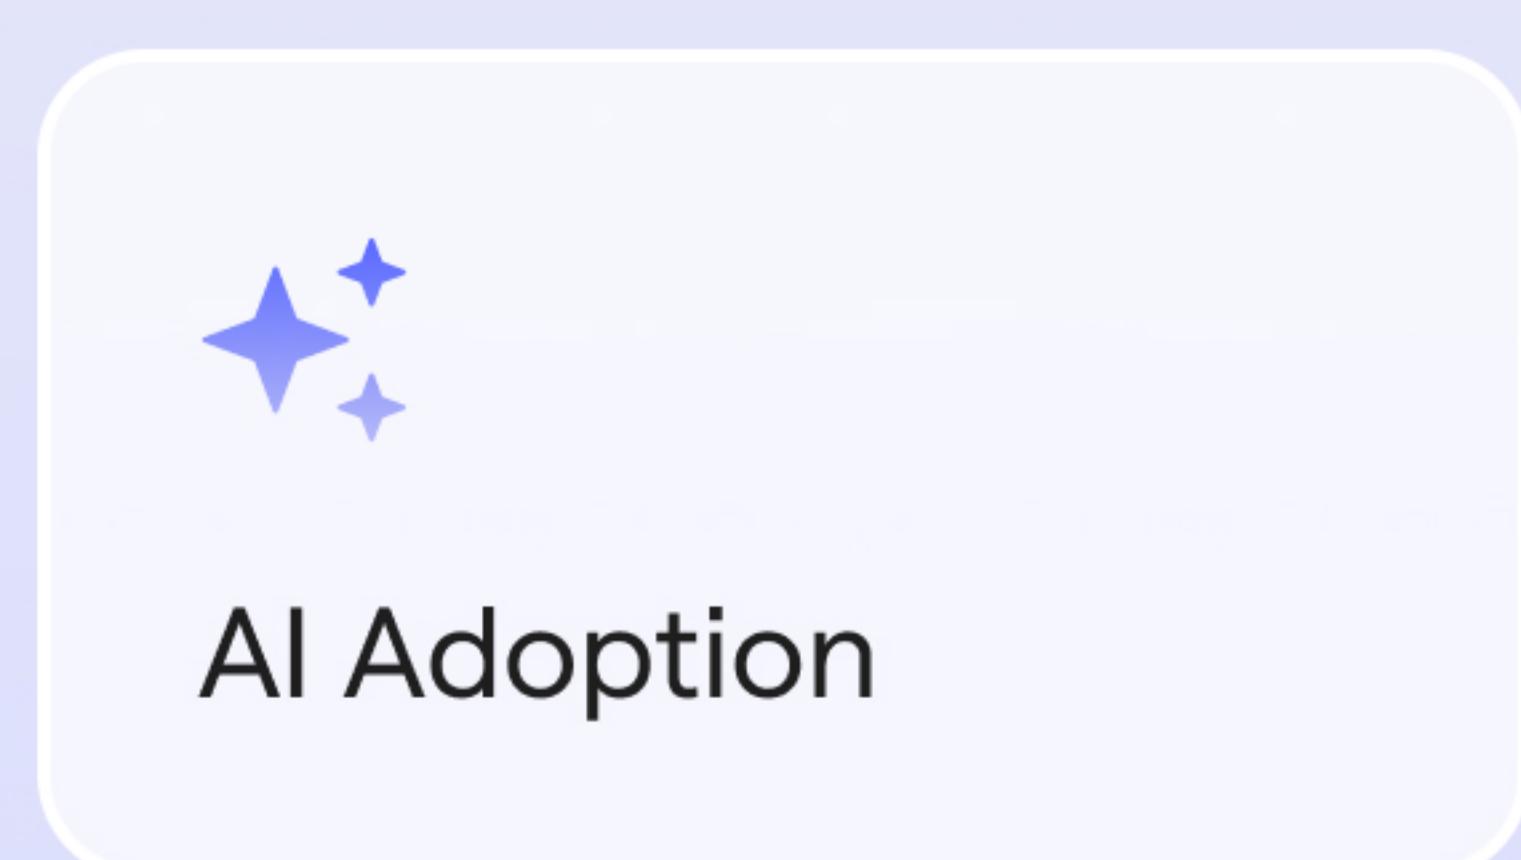

Life Value ®

Why Healthcare Innovators Work With Life Value

Life Value builds calm, compliant software that fits into complex healthcare environments with no disruption to care delivery.
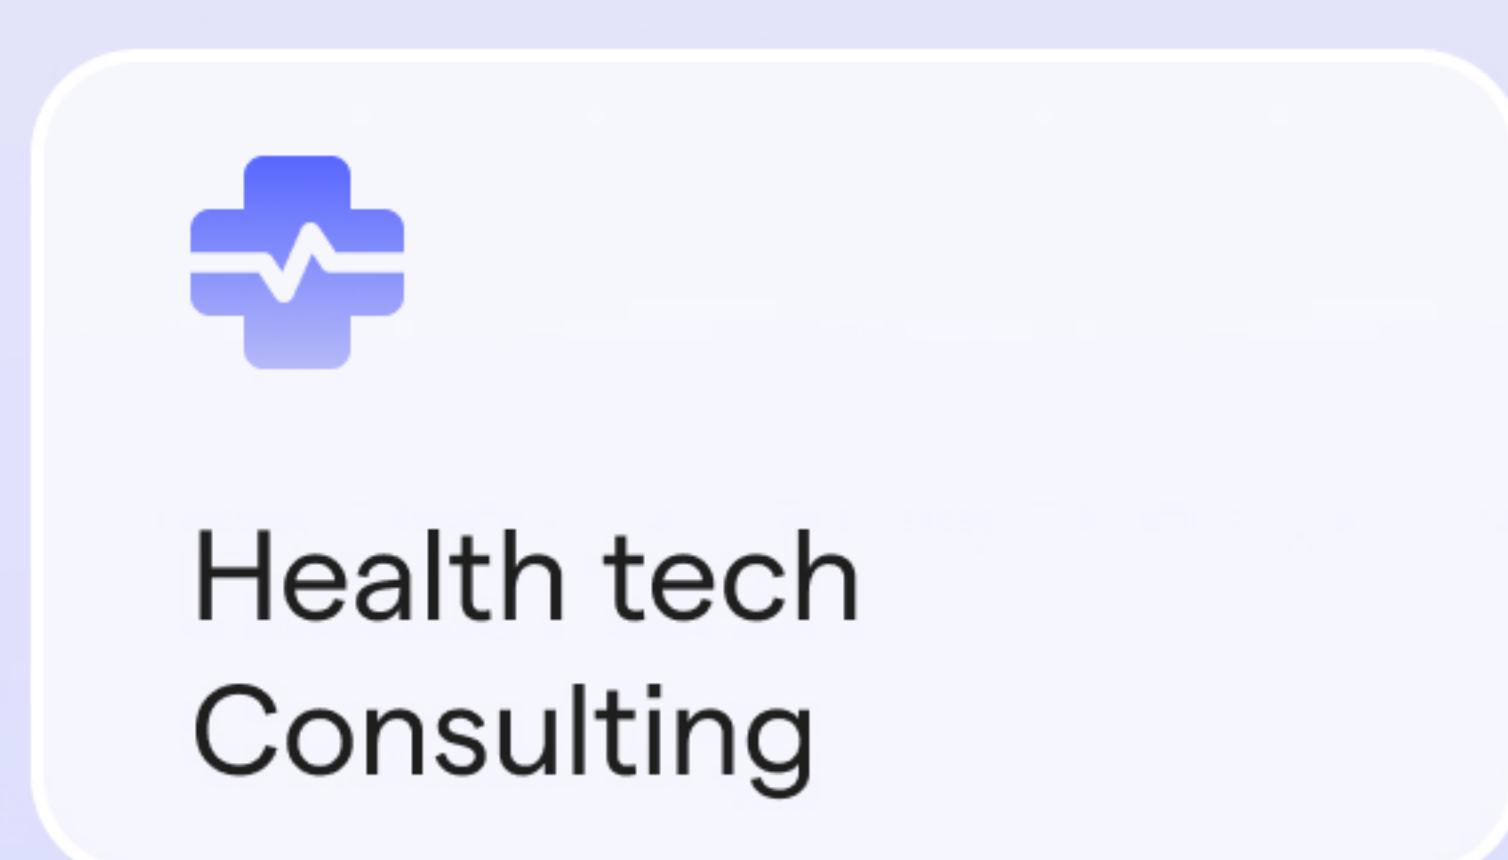

Where We Deliver Impact

1. AI-Driven Medical Applications
2. IoT & Wearable Tech Integration
3. Medical Imaging Software
4. EHR/EMR Systems
5. Telemedicine & Remote Patient Monitoring
6. Secure Data Management & Interoperability
7. HIPAA, MDR, FDA, ISO 13485, ISO/IEC 27001:2022 GDPR-Compliance

Real-World Results from Life Value Projects

➔ Fasten: Making Health Data Portable

What it is: An open-source, self-hosted, personal health record aggregator. It integrates 100,000s of insurers, hospitals, and clinics and lets patients share their data via SMART Health Cards and QR links.

Our role: Life Value leads product development for Fasten's on-prem version. We're building for scale, privacy, and compliance with current efforts focused on Germany's EPA standards.

➔ Lab App: Faster Diagnostics Without the Overhead

Challenge: Manual test handling introduced delays and human error in at-home urine diagnostics.

Solution: Life Value built a 3-step web app for barcode scanning, image uploads, and real-time lab results integrated with patient notifications and telemedicine support.

Results:

✓ Faster test turnaround time

✓ Reduced false positives by **30%**

✓ **25%** higher patient retention

✓ **30%** shorter development cycle

✓ **40%** lower cost than in-house dev
