Lovekravt

Skills and services

Our battle-tested skills and coordination make us a reliable partner for high-level digital productions. Our services include,

- ❖ AI/AR/XR/VR experiences
- ❖ Interactive exhibitions
- ❖ Metaverse implementations
- ❖ Generative/AI content

01

Team
Nirmala Shome

Strategist / Product Management / Research

Ex - Fabricant

From the digital playgrounds of Spotify and Google to the frontiers of web3 fashion, Nirmala is a globe-trotting tech dynamo who's spent 17 years furiously learning, adapting, and building cool stuff that authentically grows.

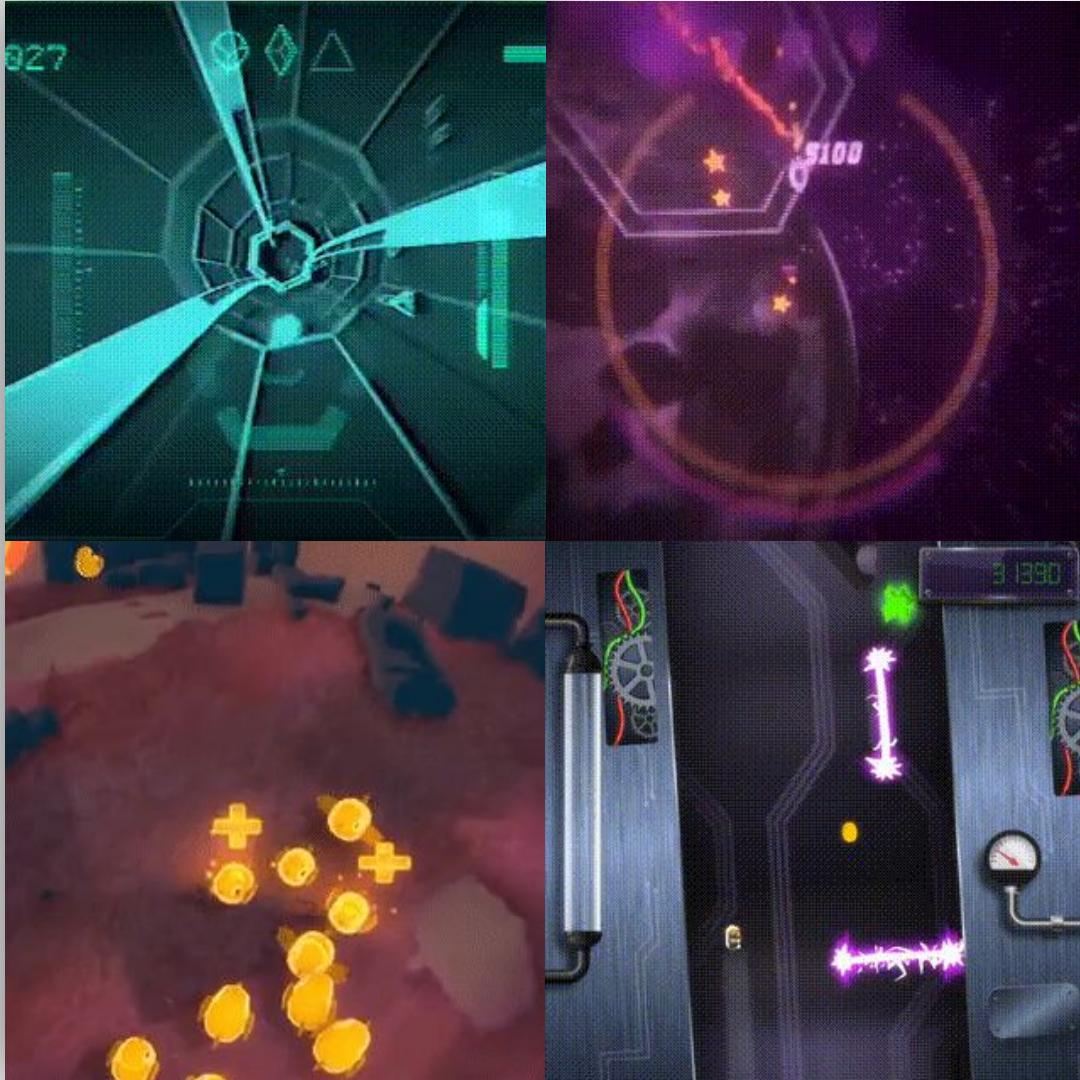

01

Team
Robert Mooijman

Game Design / XR Specialist / Digital Production

Ex - Capitola CTO

“Thrilled to apply my
gamification skills to Lovekravt’s
projects!”

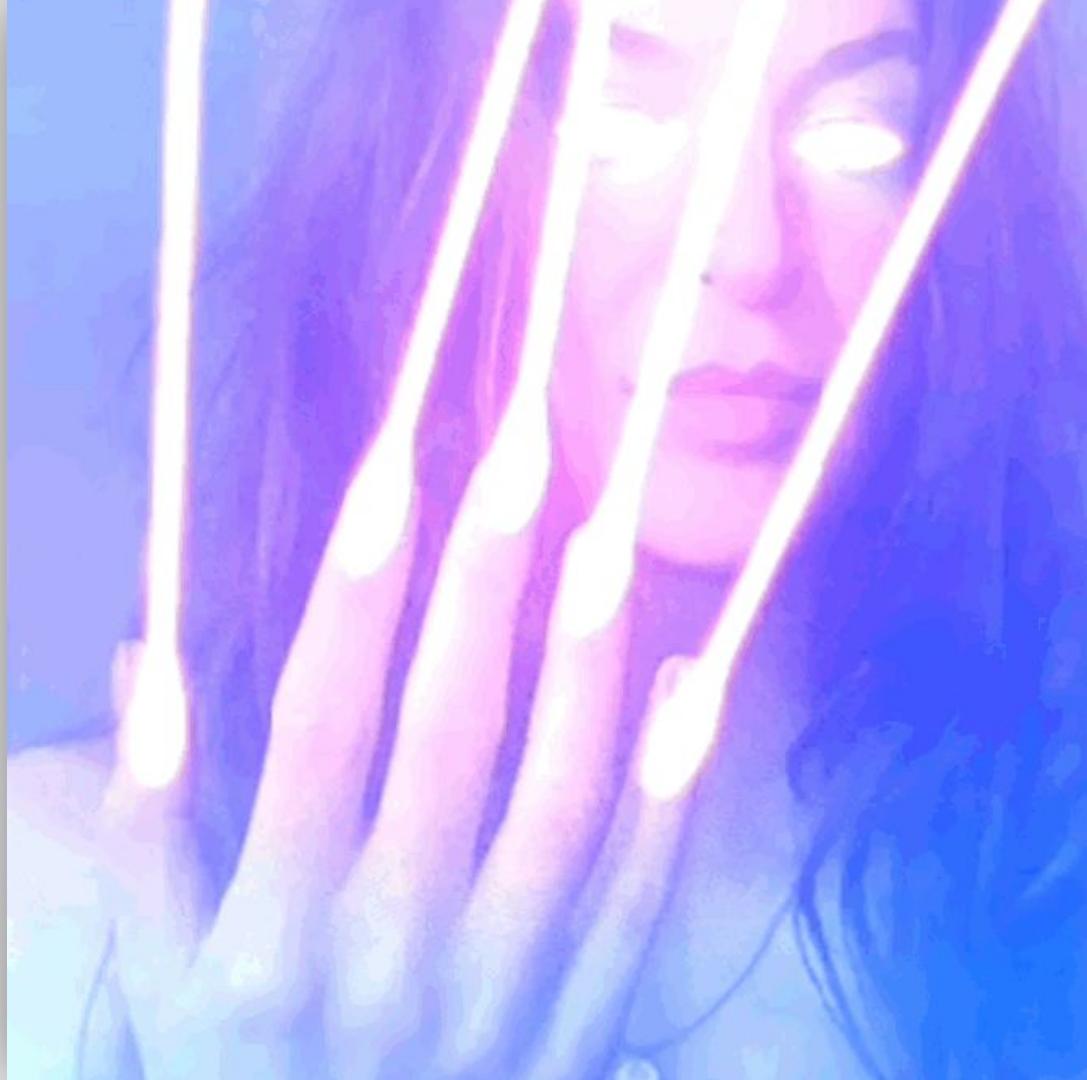

01

Hi, I'm Sara!
Aka Alphawhale

AI Creative /
XR Developer /
Concept Artist /
Snapchat Partner

“No need to cope with reality,
let's augment it!”

03 OUR TECHNOLOGY

AI CHAT BOT PIPELINE

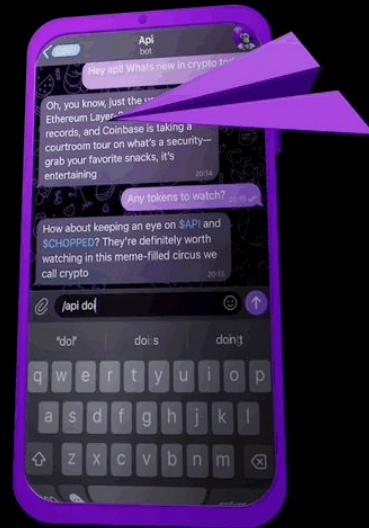

BotCast: AI Chat Bot Pipeline & Management

Lovekravt has developed technology for a bespoke AI chatbot system that combines character-driven player interactions with a governed management and insight layer.

Players can interact with unique AI characters in both individual and group settings, while admins can gain a new level of granularity to understand, monitor, and manage behaviour across products and platforms — all within a secure, privacy-first, and fully governed environment.

Botcast Characters

Chat integration

03

CASE STUDY KRYPTONITE

Kryptonite | Full AI Chatbot Pipeline

Originally developed in a highly regulated, community-driven ecosystem with similar scale and moderation requirements, this system demonstrates our core capabilities.

Capabilities

- Custom 3D characters with real-time personality and dialogue
- Group and 1-to-1 chat across platforms (YouTube, Telegram, Discord, in-app)
- Moderation and admin tools with AI-driven insights
- Adaptive conversation pacing and tone control

Outcome

Delivered higher-quality engagement and enabled new forms of character-led interaction at scale.

THE KRYPTO NITE

Krypto-Nite BOTcast Show

Introducing: The KryptoNite Show, a 7-minute live-streamed AI-hosted BOTcast delivering daily crypto news, technical analysis, and entertainment, fuelled by its utility token \$KRYPTO.

here!**

KRYPTO-NITE SHOW COMMUNITY

ENGAGEMENT

Krypto-Nite Show isn't just a show; it's a community-driven experience where the audience participates in the conversation through interactive commentary and likes during the Show! Engage in real-time with our hosts and fellow viewers on the Q+A section and the Token analysis submission, where premium viewers can propose subjects, share thoughts, and contribute to the direction of the show.

Idmor
Let's keep pushing forward! Every RT counts!

Crypto00011
Wow

Is it AI project?

Idmor
Yep, it's an AI project focused on delivering crypto news with a twist of humor. Pretty cool, right?

Crypto00011
Yeah

Any new kols coming?

Idmor
Not sure about new KOLs at the moment, but we're all about keeping things fun and engaging! Keep an eye out.

JP Kumar
Any influencers joining??

AI | XR GAME CHARACTERS

AI Enhanced XR Game Characters

This AR technology was customised for an immersive AR football game, enabling real-time, voice-based character interactions.

Capabilities

- Real-time character dialogue via voice
- Persistent memory of player scores and interactions
- Context-aware responses in a real-world setting
- Scalable interaction across multiple players

Remembers scores, names and other information throughout the gameplay.

Voice chat in live AR environment

Showcases how characters can be extended into immersive use cases.

Full walkthrough.

Come in Please
Buy More

What if we could use AI to look at history in a different way?

COME IN PLEASE BUY MORE: THESE WORKS ARE FAKE BUT SHOULD HAVE EXISTED.

These speculative fashion illustrations of Black Parisian women from the 18th and 19th centuries that are not portrayed in 'Costume Parisien' (1797 – ca. 1830): the showcase for the latest fashion trends. These prints show how inspiration was found outside Europe, as with the madras headscarves from the Caribbean.

Using artificial intelligence (AI), we tell this undocumented story and explore ways to make gaps in history accessible.
