ABOUT US

Founded in 2005, **Gérance Informatique** is a company specialized in cybersecurity, with offices in Tunis, Abidjan, and Paris, and active across the EMEA region. We help businesses define, implement, and manage the security of their information systems, relying on the best technologies on the market.

Our mission: to design, deploy, integrate, administer, and manage enterprise cybersecurity.

As partners to our clients, we place listening and consulting at the heart of our approach, in order to design customized and innovative solutions.

The key strength of **Gérance Informatique** lies in the expertise of its teams, its commitment to quality, and its culture of innovation essential levers to ensure optimal client satisfaction.
