Discover the unique quality of Essências Brazil products  
Cultivated in the midst of exuberant nature and high  
quality water

# WHO ARE WE?

ESSÊNCIAS BRASIL was conceived and built with the mission of sharing honey, pollen, propolis extract, essential oils, and vegetable oils with the world, guaranteeing 100% purity. Its raw materials are grown in organic plantations irrigated with water sourced directly from the mountain springs of farms located in Chapada dos Veadeiros, Cavalcante-GO.

From the personal experience of one of its founders, beekeeper Ronaldo Ramos, who has won awards for the best honey in Brazil twice, came the desire to share the benefits of honey, pollen, propolis, and essential and vegetable oils with the world.

Furthermore, the company aims to support the rural community of Cavalcante-GO, including the Kalungas, the largest remaining quilombola group in Brazil.

The Kalungas were invited to participate in the initiative, having the opportunity to plant seedlings on their land for the production of essential and vegetable oils, thus reducing their current vulnerable situation.

## PRODUCTION CAPACITY

Honey: 20 tons

Propolis Extract: 1 ton

Pollen: 2 tons

Essential Oil: 1 ton

Vegetable Oil: 1 ton

PARTICIPANT IN THE

CERTIFICATIONS:

(Honey)

# Honey Honey

We are the bridge from nature to your home
