

Mark Metallwarenfabrik GmbH

Deep Drawing

Deep drawing and stamp- bending of precise metal parts in high volumes

Mark Metallwarenfabrik is a family-owned business in the 4th generation located in Spital am Pyhrn, Austria for more than 100 years. We are manufacturing deep-drawn and stamp bended metal parts in high volumes – 2.3 billion parts per year. With our modern machines we can cover a wide range of parts up to 150mm length and 80mm diameter with a thickness between 0,1 and 2,5mm. As we mainly supply the automotive industry, we are familiar with the highest quality and logistic requirements.

Advantage for you!

- **Cost savings** due to short cycle time and low material consumption
- **Lowering CO2 emission** due to low material consumption
- **Increase of mechanical properties** due to metal forming process low wall thickness reduces part weight
- **Stable process** due to high precision
- **Complex geometries** feasible
- **Best process** due to different manufacturing technologies such as deep drawing, stamp- bending and turning.

Why MARK?

- Inhouse development, design and tooling
- Production on transfer-, progressive-, bending- presses and turning
- Inhouse post processes like cleaning, 100% camera- and eddy current- inspection, assembly and subassemblies
- Inhouse mechanical engineering for construction of automation and inspection machines
- Family owned business with locations in Austria, Slovenia, China and India
