

We install shop shelves in your shop to display our products.

Our TEGO racks can be placed by the meter and are provided with all necessary sales-promoting accessories such as color stickers, shelf speakers, headboards, cartridge trays, color cards, demo tiles, etc.

The composition of the rack is always determined in consultation with the customer. The placement can be done by the customer himself or with the assistance of our sales representative.

Would you like a DL Chemicals rack in your store? Then contact your representative.
