Why Fuerteventura?

History

Structure

Participation Modalities

**The Official Chamber of Commerce, Industry, Services and Navigation of Fuerteventura**, in collaboration with the Government of the Canary Islands and the Island Council of Fuerteventura, among other stakeholders, organizes this business forum to create synergies and promote clean and sustainable energy, with networking as the central focus of the event.

A photograph of four men in business suits shaking hands in a public square. In the background, several flags are flying on tall poles, including the flags of Nigeria, Ghana, Senegal, and the United States. A modern building is visible in the background under a clear sky.

# What is Africagua?

**Africagua is an international event** held biennially in Fuerteventura, aimed at fostering the exchange between various stakeholders and initiatives related to **water and renewable energy**, with the goal of positioning the island of Fuerteventura as a key player in these sectors.

# Mission

We create synergies between Europe and Africa through effective **networking and strategic B2B meetings, facilitating international collaboration** in the water and renewable energy sectors.

We aim to raise awareness about the importance of access to these resources for global environmental, economic, and social sustainability.

# Objectives

As a leading forum for a sustainable and equitable future for all, Africagua Canarias 2025's main objective is to promote access to quality water and renewable energy, positioning the Canary Islands as a model to follow in terms of sustainability and access to these resources:

To drive the pursuit of synergies for improved development among participating countries through collaboration in the fields of water and renewable energy.

To promote the establishment of the Canary Islands and Fuerteventura as a business hub that facilitates interaction among companies, strategic partners, organizations, and other stakeholders at an intercontinental level.

To encourage internationalization through strategic alliances and business opportunities for companies and organizations from different countries in the water and renewable energy sector.

To promote the transfer of technology, knowledge, and best practices in the management of renewable resources, encouraging the adoption of sustainable solutions in different regions of the world.

To promote investment in projects related to sustainable resources, facilitating financing and access to financial resources for the development of sustainable infrastructure and technologies.

To raise awareness about the importance of water and energy resources in ensuring environmental, economic, and social sustainability.

To promote research and innovation in water and renewable energy with the support of universities, research centers, and companies.

# Why Fuerteventura?

Fuerteventura serves as a gateway and bridge to Africa due to its geostrategic location. Furthermore, the Canary Islands benefit from political stability, legal security, and a differentiated tax regime approved by the European Union, making this territory a key point of connection and agreement for such initiatives.

Congress Center.**

# History

Africagua Canarias es un Foro Internacional que se celebra de manera bienal desde el año 2011 en su primera edición.

## 2011

The first edition focused on laying the foundations for initial connections between the Canary Islands and Africa. It positioned itself as the leading forum in the water and renewable energy sector.

## 2015

Greater participation from multilateral organizations was achieved. The importance of public-private cooperation in sustainable development was emphasized.

## 2019

It takes on a more international character with the participation of representatives from Latin American countries and focuses on technological innovation and sustainability.

## 2023

It is presented with a more participatory structure focused on businesses, highlighting the internationalization of Canary Islands companies. It set a participation record with over 300 attendees.

## 2013

The participation of African countries was consolidated, and relations between the continents were strengthened. The internationalization of Canary Islands companies was actively promoted.

## 2017

It is established as a reference forum for 15 African countries in the field, emphasizing the importance of joint collaboration in project implementation.

## 2021

Hybrid edition, adapted to the post-pandemic situation with both virtual and in-person sessions.

# Structure

This international forum is structured around current **presentations, technical panels with subject-matter experts, B2B meetings, networking opportunities, and success stories.**

Through the presentations and technical panels, the aim is to provide participating companies with a global perspective on topics related to the sector.

B2B meetings and networking will play a particularly important role in this edition, which places greater emphasis on business participation.

# Participation Modalities
