

Who we are

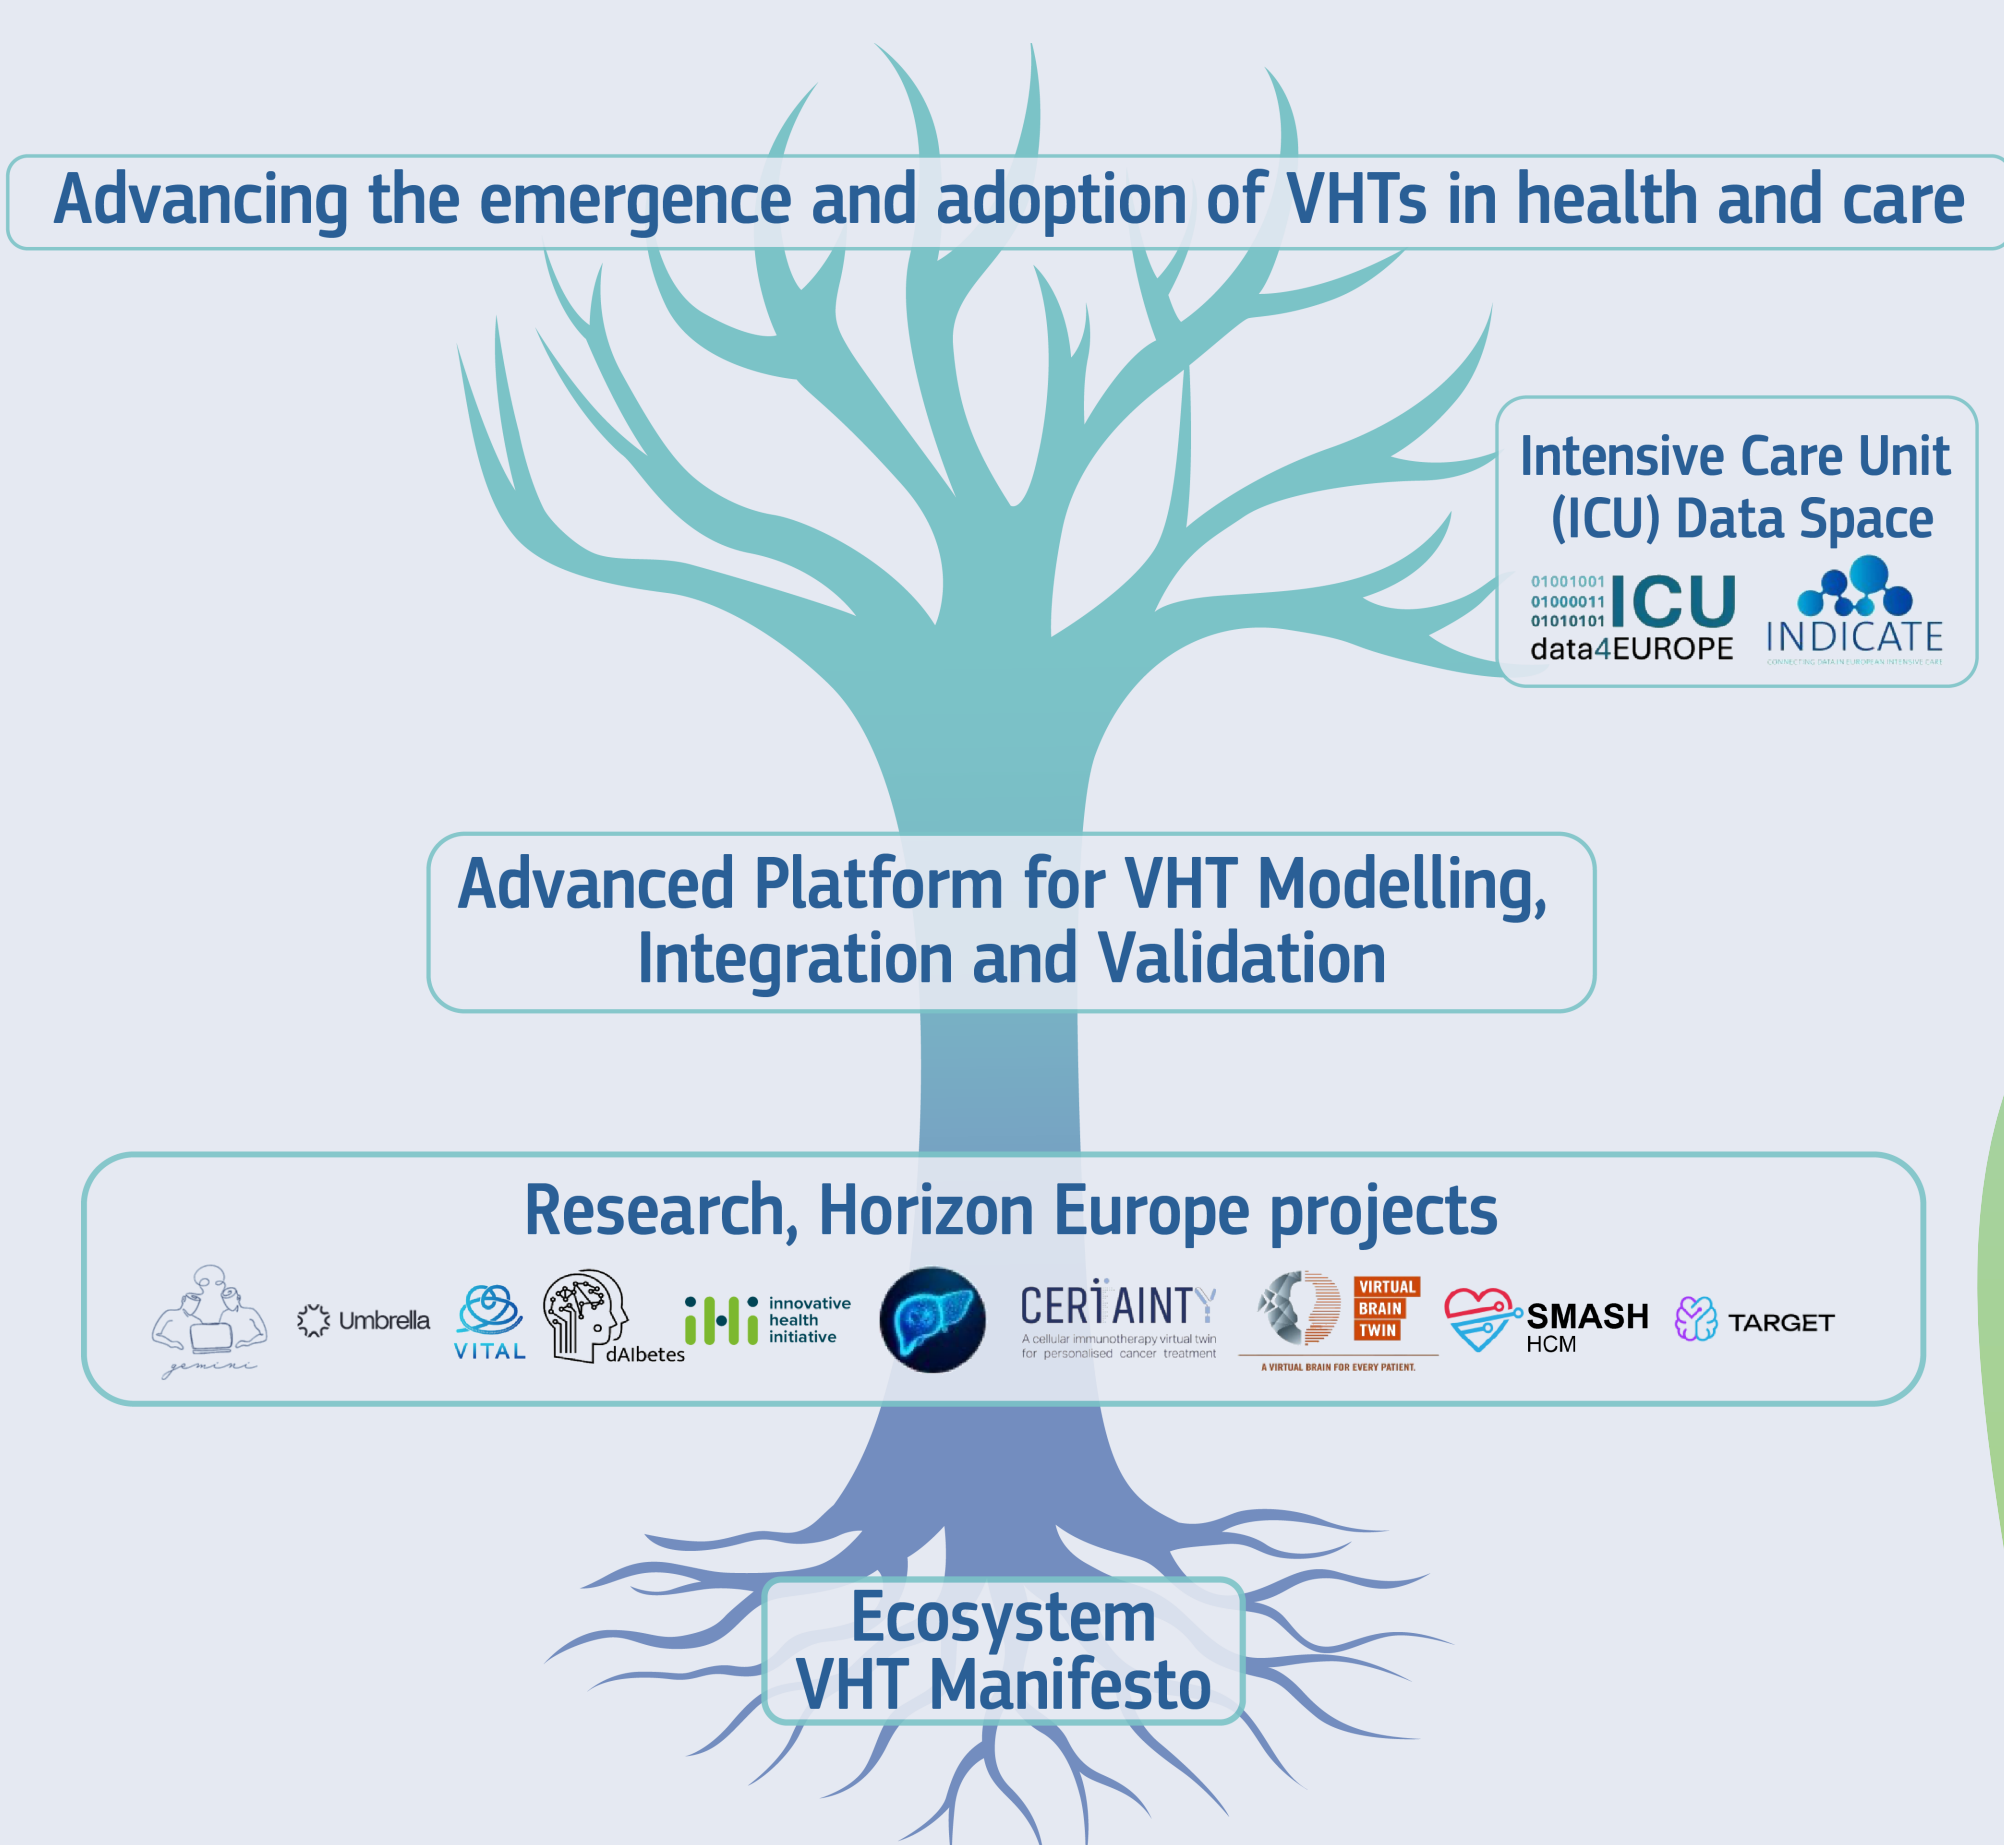

The European Virtual Human Twins Initiative connects research, clinical and industry actors, using AI, supercomputing and health data to advance personalised care.

What we are working on

The Commission is procuring a secure European platform for researchers, innovators and clinicians to integrate, validate and combine Virtual Human Twin models.

What's the one thing we need next

We need wider VHT adoption in healthcare and research, bringing VHTs closer to patients and healthcare providers, with support through the VHT Uptake Incubator for deployment, scaling, knowledge sharing and collaboration.

5 years Mission Cancer: Stronger Through Connection

BRUSSELS

29 SEPTEMBER – 01 OCTOBER
