Data security

Data protection is the top priority. The highest security standards are implemented to ensure information remains safe, compliant, and accessible only to authorized users.

Security compliance

Our security protocols comply with recognised international security standards.

Microsoft Azure

Cloud security

Customer data is securely hosted across multiple Microsoft Azure data centers mainly in North Switzerland.

Network Security

- Network vulnerability scanning
- Third-party penetration tests
- DDoS mitigation

For more details, full security specifications are available upon request.
