

# REUSABLE PACKAGING & ASSET POOLING

Unlocking sustainability and efficiency in  
industrial supply chains

[www.yantrapacks.com](http://www.yantrapacks.com)

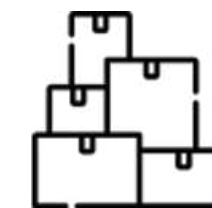

# PIONEERING INDIA'S CIRCULAR SUPPLY CHAIN REVOLUTION

We make supply chains efficient, effortless & profitable

Incorporated as Yantraksh Logistics Private Limited in 2018, Yantra Packs delivers circular supply chain solutions by renting out reusable supply chain assets. With a strong footprint across sectors, we help businesses reduce waste, lower costs, and streamline logistics.

Country-wide network  
with 11 warehouses

600,000+ assets under  
management

Prevents 1.1 million kg  
CO2e per month

Supply chains today are under immense pressure to deliver more with less—less cost, less waste, less time.

Yet, inefficiencies in packaging, lack of real-time visibility, and expensive return logistics continue to challenge operations. At the same time, customers and regulators are demanding more sustainable practices.

Traditional one-way systems are no longer enough. Businesses need intelligent, circular solutions that reduce environmental impact while improving operational efficiency. The future of supply chains lies in models that prioritize reuse, data-led optimization, and scalable infrastructure—enabling resilience, cost savings, and a lower carbon footprint.

# OVERCOME SUPPLY CHAIN CHALLENGES

High CAPEX in supply chain assets

Poor asset lifecycle management due to losses and damages

Excess stockholding due to poor traceability

Budgets vs Priorities

## Static Hire

Reliable supply chain asset availability for storage, staging, and in-factory material handling.

## Transit Hire

Secure, packaging asset for efficient, damage-free inter-plant or customer deliveries.

# OUR SERVICE MODELS

Yantra Packs delivers reusable packaging solutions tailored to critical supply chain needs — storage and transportation.

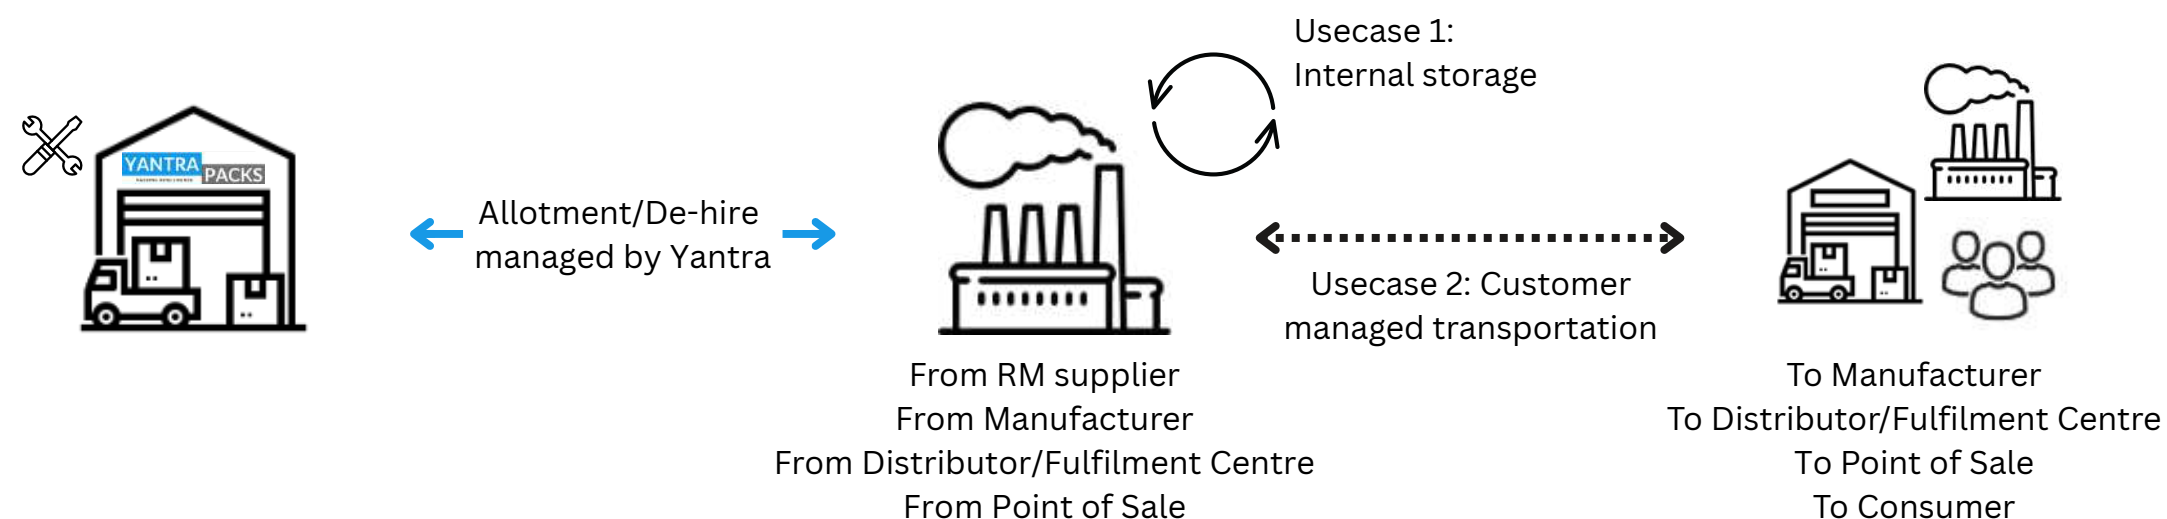

Through our shared-use rental model, businesses access a ready pool of high-quality, durable assets without upfront capital investment. Whether optimizing warehouse storage or ensuring safe transit of goods, Yantra enables higher asset utilization, reduced environmental footprint, and improved cost efficiencies across the supply chain.

# STATIC HIRE

## Ideal for internal storage and short-distance self managed supplies

Offers businesses a cost-effective, scalable way to access high-quality supply chain assets without ownership hassles. With flexible tenures, reliable supply, and zero maintenance burden, static hire ensures uninterrupted operations while freeing up capital for core business growth.

### How it works?

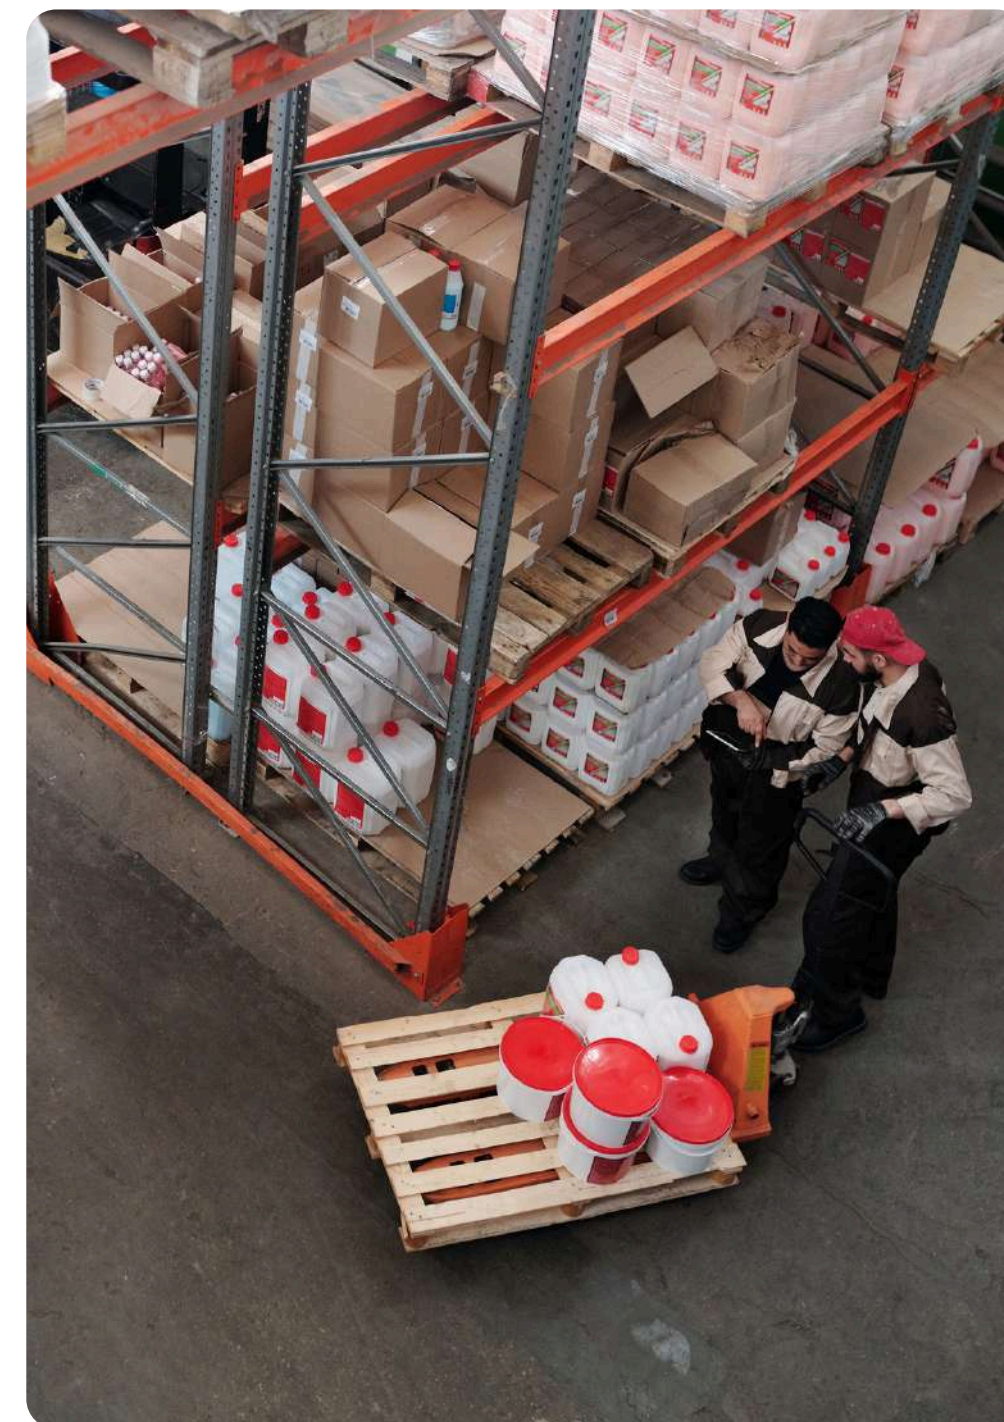

### Key Contract Terms

- Flexible tenure: 6 months to 5 years
- Monthly fixed rent
- Instance-based fee for:
  - allotment/de-hire
  - repair & reconditioning (flexibility for blending into rent)
  - reducing** charge for loss or damage beyond economic repair :

### Key SKUs

- Wooden pallets
- Plastic pallets
- Non-foldable plastic crates
- Plastic Totes
- Metal trolleys and pallets

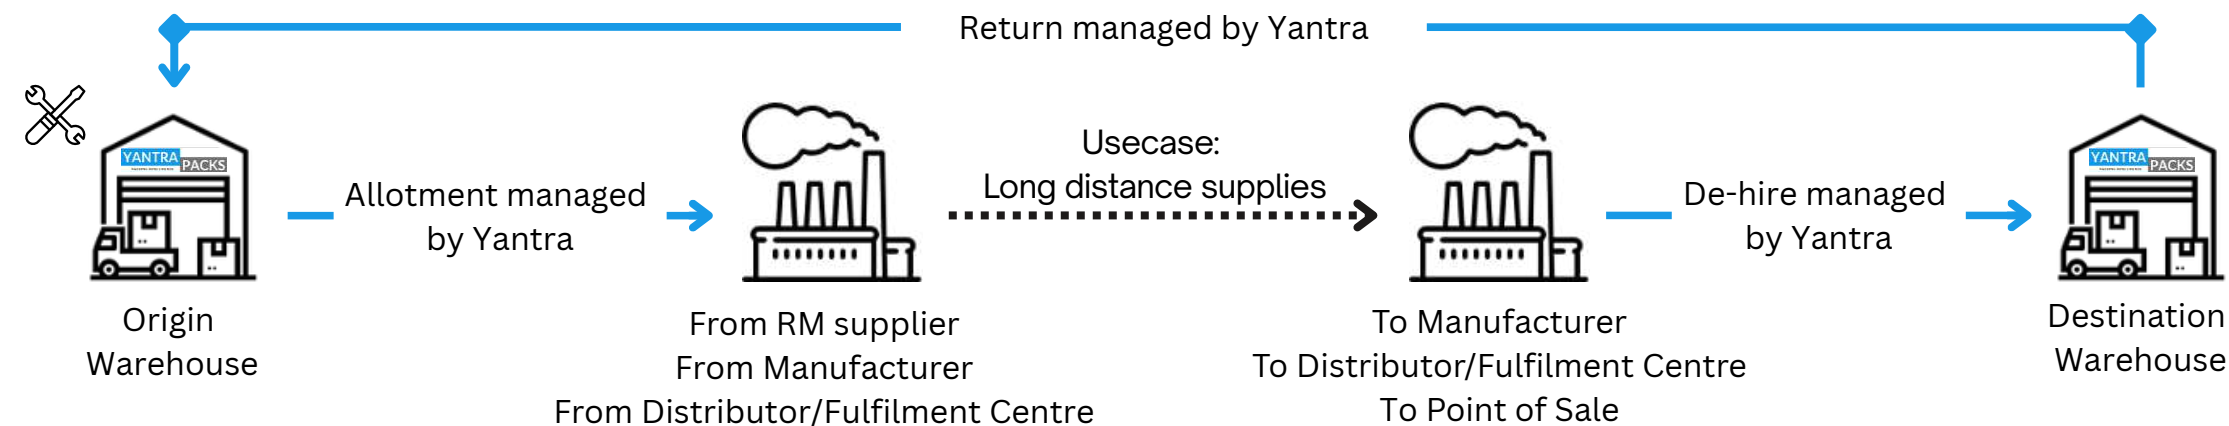

# TRANSIT HIRE

## Ideal for transportation

Offers efficient, returnable packaging for goods in motion. Businesses benefit from reduced damage, optimized reverse logistics, and cost savings without the need to invest in owned assets and capabilities, making every shipment smarter and more sustainable.

### How it works?

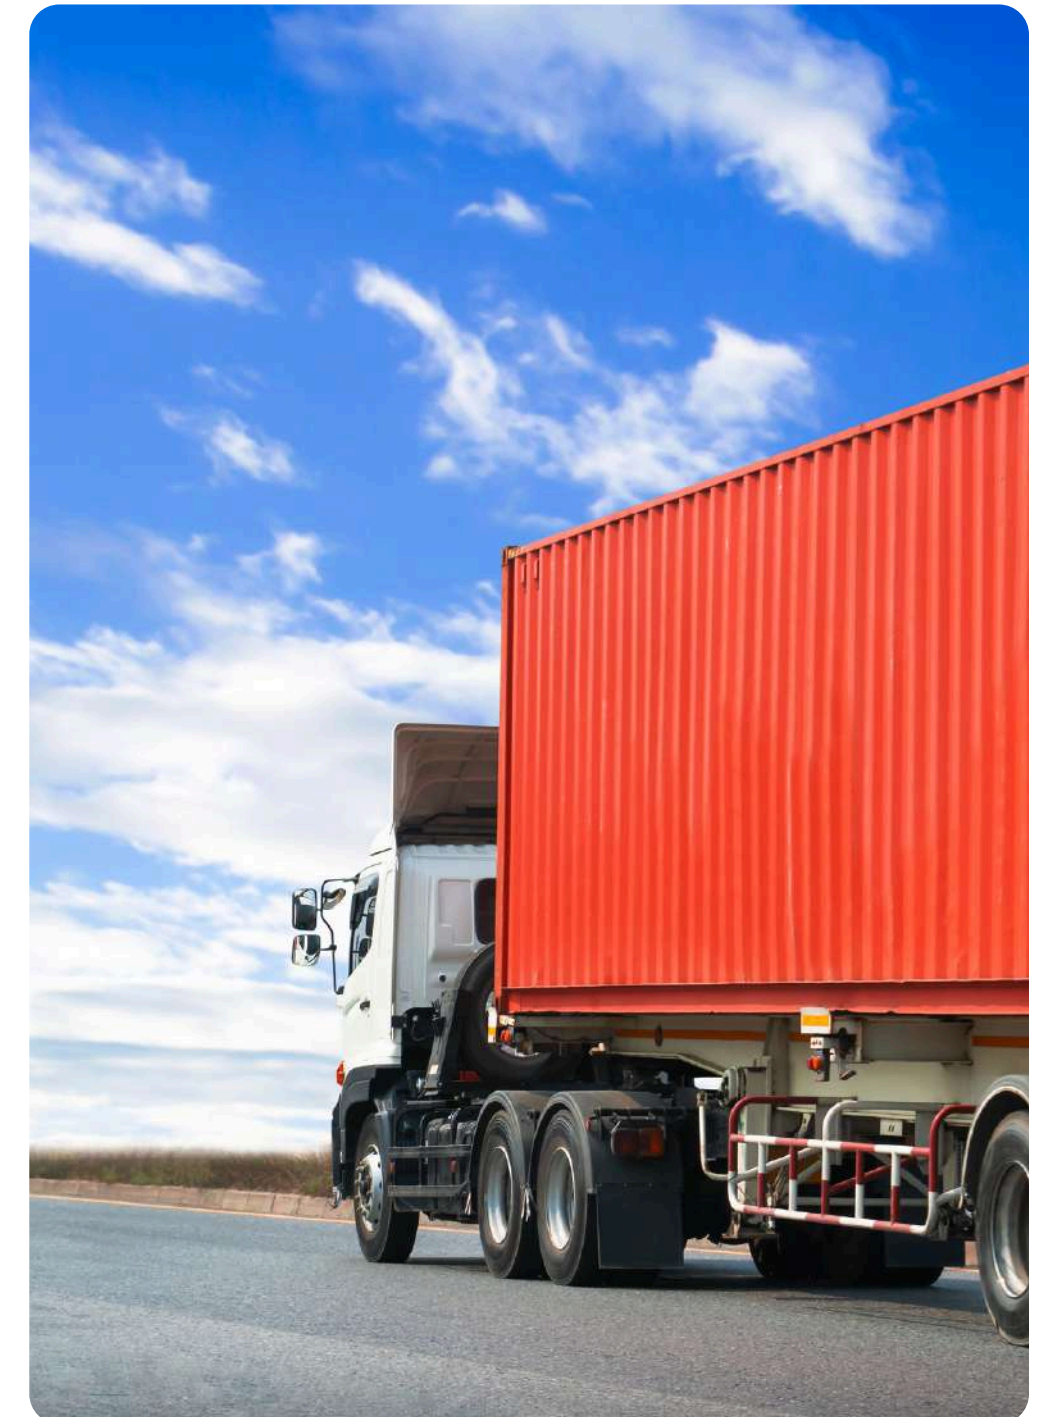

### Key Contract Terms

- All-inclusive trip cost for asset rental and management (reverse logistics, warehousing and repair & reconditioning)
- Flexible tenure: 2 to 5 years
- Consistent nodes and cycle time
- Volume flexibility upto 10%

### Key SKUs

- Foldable plastic crates with inserts/dunnages
- FLC with inserts/dunnages
- PLS with inserts/dunnages
- Metal stillages with inserts/dunnages

Reusable Containers

Reusable Pallets

Material Handling Equipments

At Yantra Packs, we help businesses build sustainable, efficient, and future-ready supply chains through a wide range of solutions. Our reusable packaging portfolio—crafted from durable materials like plastics, wood, and metals—caters to both storage and transport needs. Through a

consultative approach, we study each product and its supply chain to design solutions that enhance efficiency, durability, and cost-effectiveness. By aligning packaging with operational goals, we enable enterprises to reduce costs and transition toward resilient, eco-friendly logistics models.

# PRODUCT CATEGORIES

# REUSABLE CONTAINERS

Durable, stackable, collapsible  
for efficient transportation and  
storage.

Foldable/Non-foldable  
Crate

PLS Box

Foldable Large Container

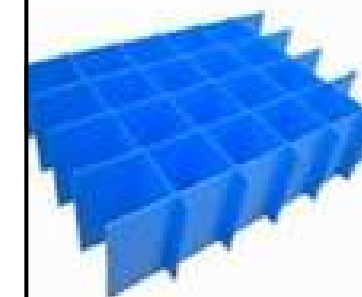

Cold & Ambient  
Utility Box

PP Box

Metal Stillage & Trolley

PP Insert

Vacuum  
Forming Tray

# REUSABLE PALLETS

Strong, sustainable base for easy storage and transport operation.

Wooden Pallet

Plastic Pallet

Metal Pallet

# TRAKKIA

Technology for better control  
on supply chains assets

Event based workflow for  
end-to-end asset  
management

Serialised RFID tagging on  
assets for autonomous  
identification of asset at  
receipt/dispatch

Robotic Process  
Automation to improve  
asset availability and  
serviceability

Comprehensive audit trail  
and lifecycle management

Actionable reports for  
intelligent supply chains

# ACHIEVE NET ZERO PACKAGING OPERATIONS

Yantra Packs powers net-zero packaging operations through reusable solutions that **cut GHG emissions by up to 88% per use**. By eliminating single-use packaging waste, we enable sustainable supply chains that align with long-term climate goals and responsible resource use.

- Recycling: asset tracking in pooling minimizes loss and theft, allowing for efficient recycling and resource conservation in a continuous cycle
- Virgin plastic reduction: asset poolers collaborate with manufacturers to cut down on virgin plastic use, promoting sustainable production

- Shared resources: sharing of reusable supply chain assets amongst several users lowers system wide inventory - businesses can do away with maintaining buffer stock
- Increased packaging stability: improved packaging stability and protection during transit prevents product damage, thus removing the need for return logistics, reproduction of damaged products & forward logistics
- Increased Shelf Life: shelf life is considerably enhanced on account of expert maintenance - containers are serviced after each trip/cycle

- Promotes reusability: reusable assets in asset pooling eliminates the need for single-use packaging leading to less waste generation
- Shared resources in a closed loop system: reusable supply chain assets are used multiple times and shared between different industry players - increases utilization and eliminates empty/dead miles (poolers have clients on several nodes of transport and therefore can find return load)

OPT FOR RENTAL

Significant saving on total cost of ownership of upto 19% through outsourcing as against insourcing

Factor	Factor Type	Buy	Rent
Upfront Investment	Financial	High CAPEX	Minimal entry cost (OPEX)
Cash Flow Impact	Financial	Strain on working capital	Predictable periodic payments
Depreciation & Accounting	Financial	Added to balance sheet, affects ROI	Off-balance sheet, improves ROCE
Maintenance Costs	Financial	Entirely on buyer	Included in rental
Idle Asset Risk	Financial	Buyer bears underutilization cost	Pay-as-you-use, minimal idle burden
Asset Disposal Cost	Financial	Scrap/recovery cost at end of life	Not applicable
Operational Flexibility	Qualitative	Fixed assets limit adaptability	Scale up/down based on need
Time to Deploy	Qualitative	Long procurement and setup cycle	Ready-to-use from day one
Innovation Access	Qualitative	Locked into current asset design	Access latest, standardized solutions
Asset Management Burden	Qualitative	Internal tracking, repair, audit required	Technology enabled; repairs managed by Yantra
Sustainability Goals	Qualitative	Limited visibility on reuse or lifecycle	Supports circular economy efforts
