02

We are passionate about people, engineering and technology

Tech Identity and UPDT272 have joined forces to create a strategic joint venture, combining expertise in Technology, Information Systems, and Engineering. Founded on a shared commitment to innovation, we deliver cost-effective, tailored solutions that drive our clients' success. By leveraging cutting-edge tools, technologies, and multidisciplinary expertise, we ensure impactful and scalable results for the aviation industry and beyond.

We work to be your partner of excellence

- Primacy in quality over quantity;
- Human interaction with Clients and Consultants is our goal;
- We have a professional and united team;
- We maintain transparent and open communication with our Clients and Consultants, promoting mutual understanding and the effective resolution of challenges;
- We value genuine and lasting human relationships with our Clients and Consultants. Establishing authentic connections is essential to building trust and solid partnerships.

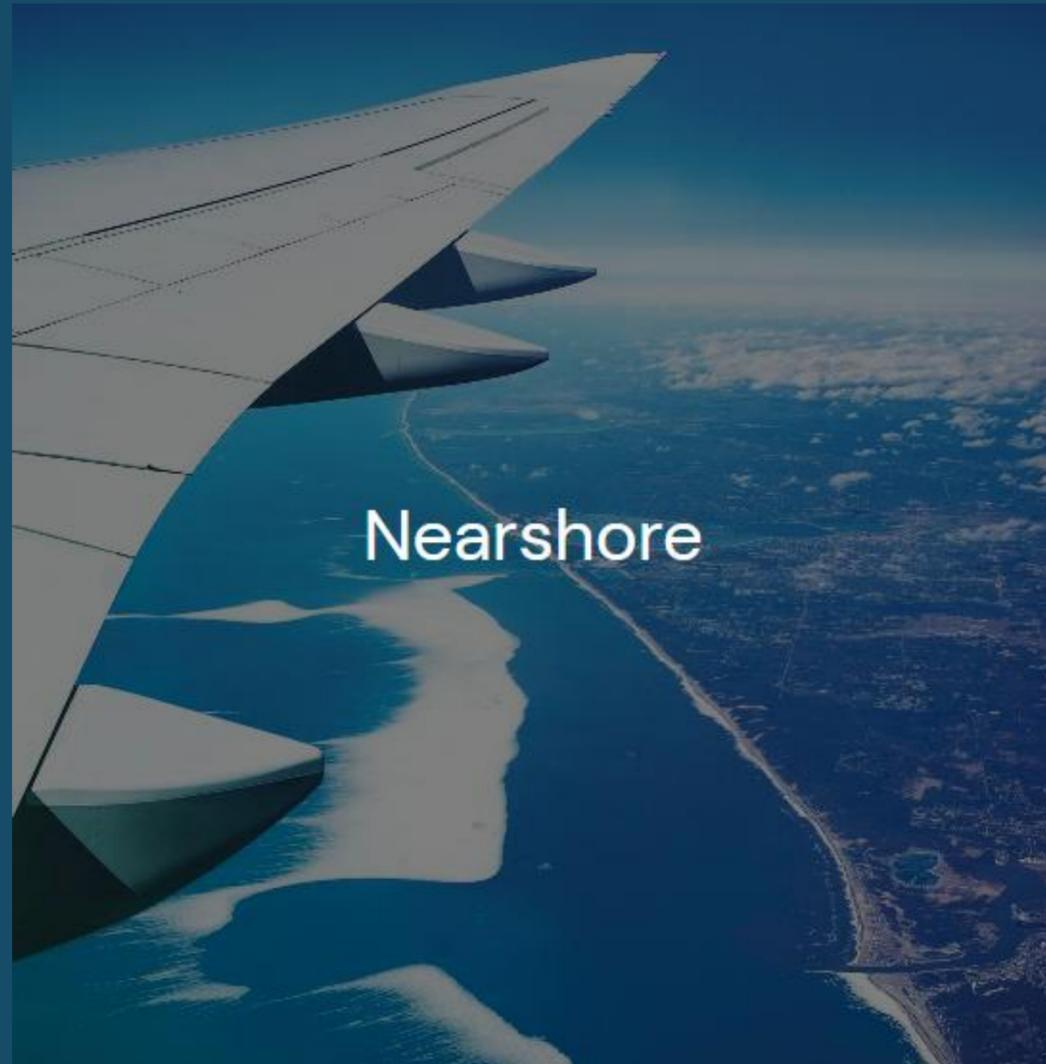

05 Services

We provide cutting-edge engineering and IT solutions, specializing in avionics, embedded systems, and digital transformation to enhance aircraft performance, maintenance, and reliability. We also deliver highly qualified professionals, including:

- Aerospace Engineers
- Production Engineers
- Design Engineers
- Project Managers
- Quality Specialists
- Maintenance Experts
- Metrologists
- Inspection Technicians

As a joint venture, Tech Identity and UPDT272 go beyond traditional IT services by integrating software development with advanced engineering solutions, particularly in avionics and embedded systems. Our team of highly experienced software engineers and industry specialists develop tailored applications to address the unique challenges of our clients in the aerospace sector. We have established ourselves as a trusted technology and engineering partner, delivering high-quality solutions with seamless integration into existing environments. With a nearshore approach, we ensure proximity, agility, and alignment with our clients' operational needs.

07

Turnkey Projects

From planning and design to project management and maintenance, we optimize complexity for our clients. Our staff is certified and experienced, ensuring the success of your projects.

R&S

We deliver specialized recruitment in avionics, embedded systems, and IT. Our tailored approach, combining thorough screening, interviews, and technical assessments, ensures the right talent for your needs. With a streamlined process, we reduce hiring time and costs, providing seamless integration into your team
