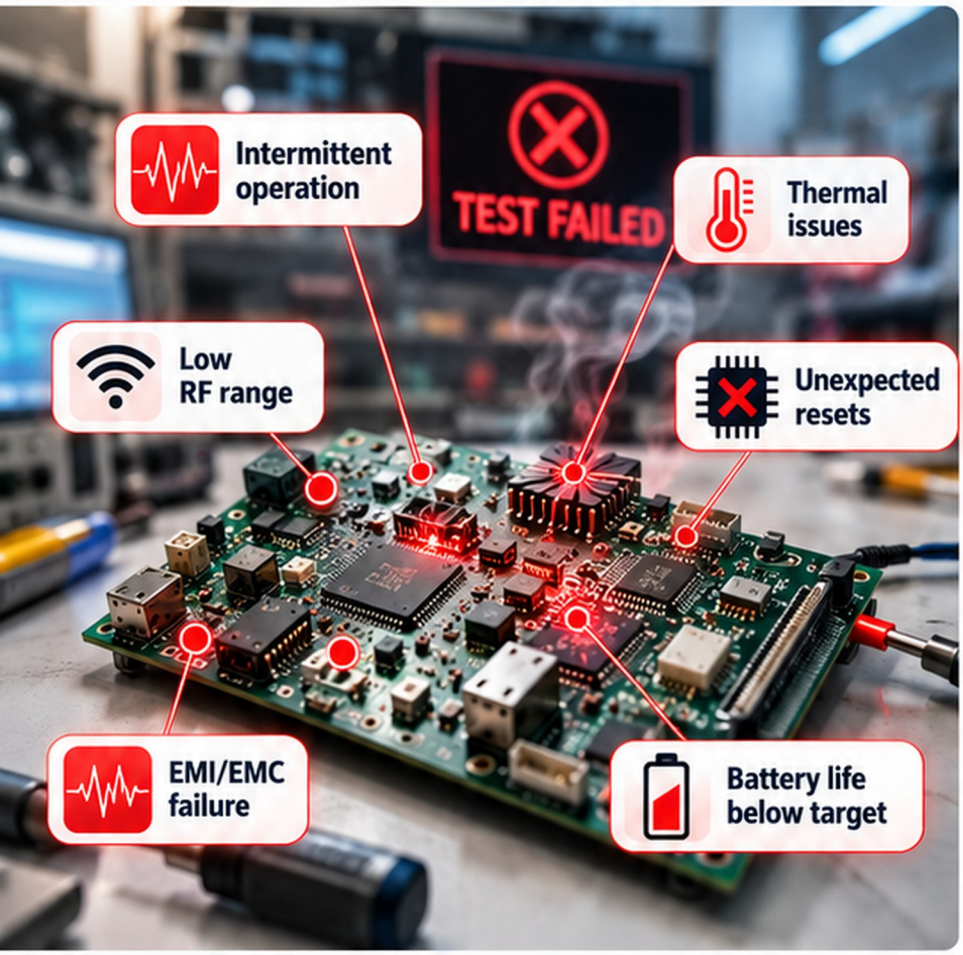
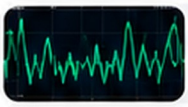
PCB MUST

REAL SOLUTIONS FOR REAL HARDWARE CHALLENGES

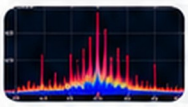
IDEAS
DESIGN
PROTOTYPE
PRODUCTION

When Your Hardware Isn't Ready for Production





- Prototype works — but intermittently

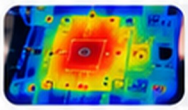


- EMI/EMC failure

- RF range below expectation

- Unexpected resets

- Battery life below target



- Thermal issues

- Component obsolescence

- Manufacturing yield issues

- PCB requires redesign

- Developed by another freelancer but cannot reach production

PCB Must provides independent review and redesign support to get you production-ready.

- ARCHITECTURE REVIEW
- SCHEMATIC REVIEW
- PCB REVIEW
- ROOT-CAUSE INVESTIGATION
- REDESIGN SUPPORT
