

HACKTHEBOX

SOLUTION OVERVIEW

Cyber Mastery: Community Inspired. Enterprise Trusted.

Great cybersecurity teams aren't born in classrooms; they're forged through continuous, community-validated skills development. Hack The Box turns learning into a habit-forming experience, attracting the most advanced security talent and keeping them razor-sharp every day.

Unmatched content library

New, updated courses and labs released weekly to keep the pace with the evolving threat landscape.

Community-fueled innovation

The best worldwide security experts work for HTB as the collective intelligence and passion that fuels all we build.

Enterprise-grade features & offering

Programs mapped to industry frameworks and backed by robust reporting and analytics to prove outcomes at scale.

A platform ecosystem designed for cyber workforce readiness

Hack The Box transforms cyber teams into threat-ready organizations by offering hands-on training, team exercises, and performance analytics in a deeply engaging platform.

As the world's largest cybersecurity community, HTB combines gamified learning, collaborative knowledge sharing, and pioneering AI features to elevate human capabilities—turning skill development into a strategic advantage in today's high-stakes, complex security landscape.

What outcomes can our customers achieve with HTB?

We raise your threat readiness by transforming technical teams into a mission-ready workforce, so every organization can stay ahead of tomorrow's threats.

Validate Operational Readiness

Validate cybersecurity capabilities and operational readiness against real-world threats by replicating adversarial behaviors or attacks in threat emulation programs – so your teams are confident, capable, and prepared from day zero.

- Real-world attack simulations and live-fire team exercises.
- Purple-minded scenarios and cyber ranges.
- Real-time offensive & defensive content releases on latest vectors and vulnerabilities.

Cyber Workforce Development

Speed up onboarding and talent development with adaptive, role-specific training paths and assessments to accelerate practical skills for job readiness – powered by AI and fueled by real-world challenge content.

- Adaptive and custom curriculum management.
- Gamified, tailored workforce assessments (CTF) and ranges.
- Role-specific plans and certificate programs, aligned to industry frameworks (MITRE, NIST, DoD 8140).

Achieve Strategic Resilience

Resilience isn't about being indestructible; it's about how fast and how well you rebuild or evolve. HTB operationalizes that mindset with continuous realistic exercises that align people, process, and tech with long-term business-continuity targets and new regulations.

- Advanced reporting and analytics on skills progression.
- The most comprehensive content library in terms of knowledge domains and technologies covered.
- Collaboration and cross-functional platform features or exercises.

Bespoke solutions to quantify risk and stay ahead of adversaries

Hack The Box solutions are used by a variety of teams and industry verticals to achieve outcomes that cover all cyber and business domains.
