

The background of the image is a dark, star-filled space. In the lower half, the Earth is visible, showing its blue oceans and white clouds. A prominent feature is a thick, wavy line that starts in the upper left, curves over the top of the Earth, and then descends towards the lower right. This line is composed of two colors: a bright cyan on the left and a dark purple on the right. The text 'AURAVISION' is centered below the Earth, in a white, sans-serif font.

AURAVISION

## AURA VISION: Smartly **SUSTAINABLE**, Simply **SUPERIOR**

Aura Vision, a Barcelona-based brand, was born from a team of passionate professionals with a deep-rooted understanding of the video industry. Recognizing a gap in the market where high-quality displays were either prohibitively expensive or lacked the necessary performance, Aura Vision was created to offer a superior alternative.

Driven by a commitment to Innovation, Sustainability, and Quality, Aura Vision is dedicated to pushing the boundaries of display technology. By combining cutting-edge engineering with a focus on energy efficiency, we deliver premium products that are both visually stunning and environmentally friendly.

## WHY AURA VISION?

### HIGH QUALITY

Aura Vision products are created following the highest standards to bring the best image quality on the market.

Premium image quality with an affordable price.

### SUSTAINABLE

Aura Vision is committed to contribute to a more sustainable world.

Our recent products are being developed to bring the power consumption to the lowest in the market.

### INNOVATIVE

Aura Vision is always thinking ahead into the future.

From being pioneers on the Flip Chip COB technology, to being the first to mass produce 0.4mm pixel pitch.

# PRODUCTS

# COMET-C

## Indoor Fine Pitch Micro LED Display

The COMET-C Series from Aura Vision represents a significant leap forward in sustainable display technology. Designed with a commitment to environmental responsibility and visual excellence, this series offers exceptional performance while minimizing its ecological footprint.

### FEATURES:

- Micro LED with Flip Chip COB: The Future of Display Technology
- 24/7 Reliability: Ensuring Uninterrupted Operation
- Low Power Consumption: Energy Efficient and Cost-Effective
- Cold LED - Cool and Efficient
- Sharper Images: Crystal-Clear Visuals
- Low Moiré Effect: Crystal-Clear Images
- Accurate Color Reproduction
- Wide Viewing Angles: Consistent Image Quality
- High Contrast Ratio: Deep Blacks, Brilliant Whites
- Low Blue Light Emission LED Video Wall: A Healthier Viewing Experience
- Easy Maintenance: Full Front Access

# NEPTUNE

## Indoor Fixed Installation LED Display

Neptune Series redefines the possibilities of display technology, offering a perfect blend of performance, durability, and versatility. Designed with cutting-edge features, these displays are ideal for a wide range of applications, from commercial signage to digital art installations.

### **FEATURES:**

- SMD GOB Technology: A Reliable and Durable Solution
- Neptune Series: Energy-Efficient LED Displays
- Flexible Installation: Modular Design for Endless Possibilities
- Lightweight Panels: Easy Installation and Reduced Load
- 0° to 90° Curved Displays: Expanding Your Visual Horizons
- Energy-Efficient LED Displays
- Smooth and Fluid Visuals
- Easy Maintenance and Versatile Installation
