

COATING, FIREPROOFING AND INSULATION FOR INDUSTRIAL
PLANTS, ENERGY, OFFSHORE AND INFRASTRUCTURES

CARING FOR DETAILS,
REGARDLESS THE SIZE

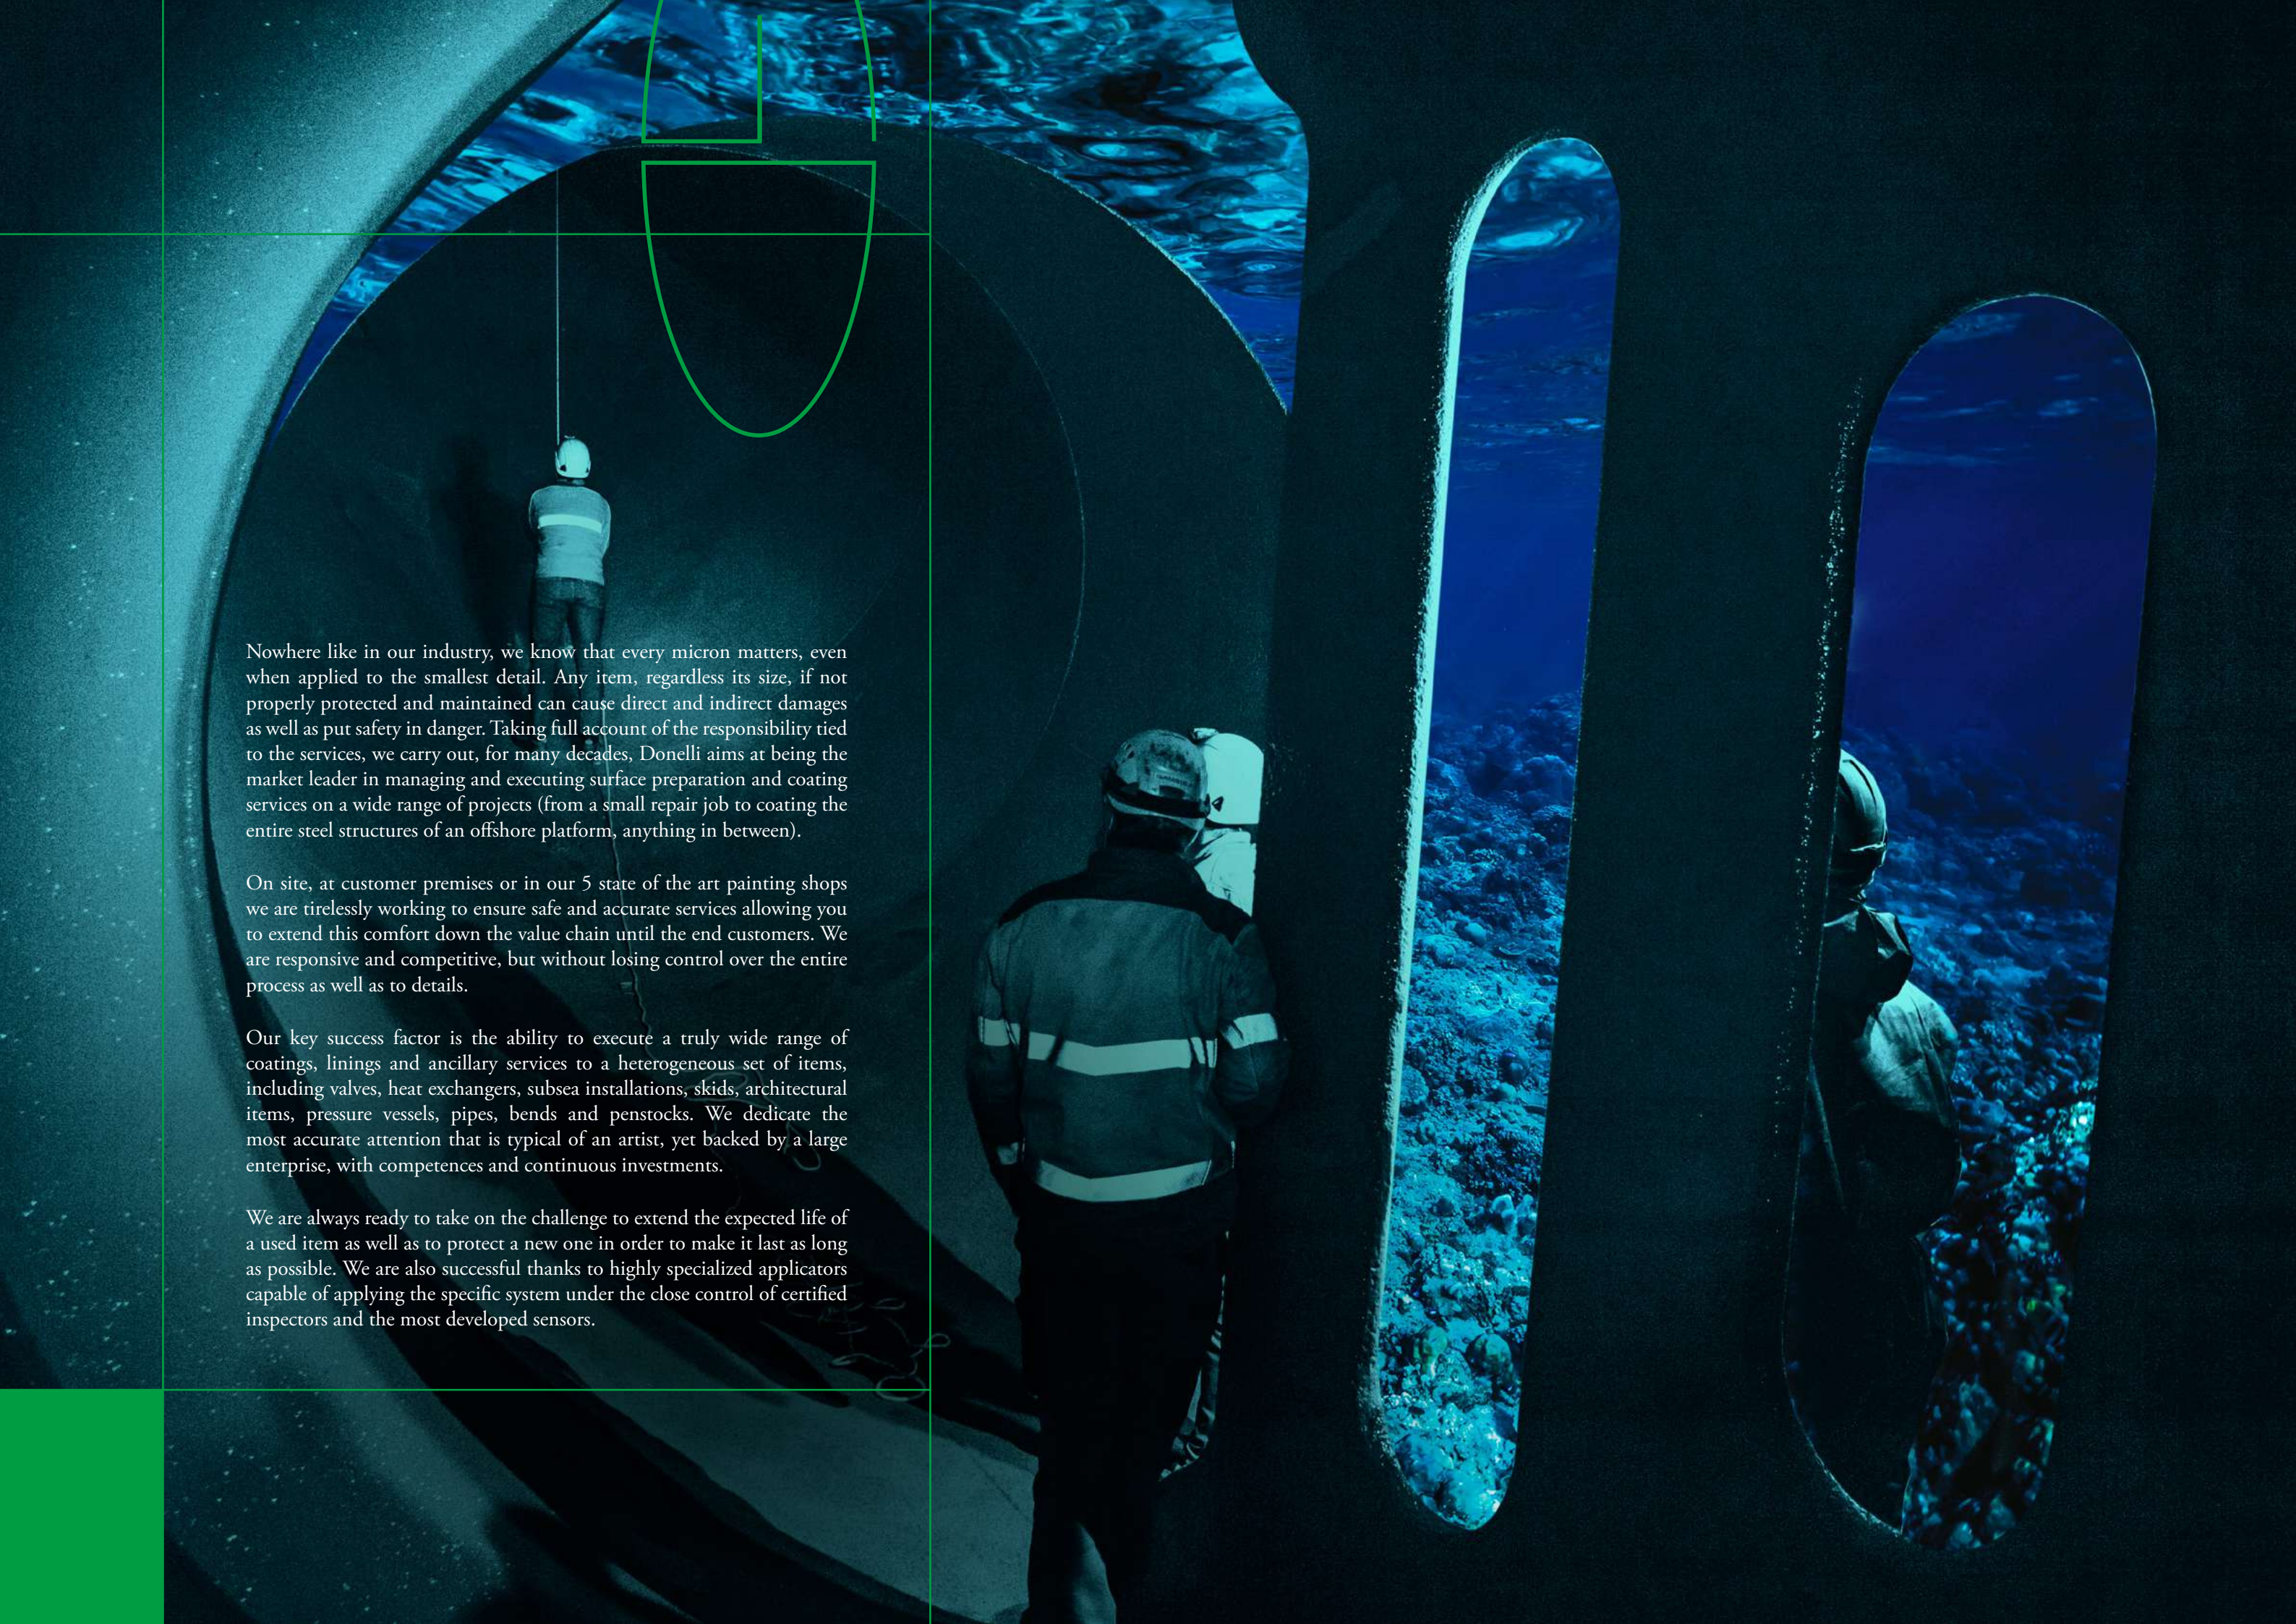

ON SITE

DONELLI

CORROSION PROTECTION
APPLICATIONS SINCE 1911

Nowhere like in our industry, we know that every micron matters, even when applied to the smallest detail. Any item, regardless its size, if not properly protected and maintained can cause direct and indirect damages as well as put safety in danger. Taking full account of the responsibility tied to the services, we carry out, for many decades, Donelli aims at being the market leader in managing and executing surface preparation and coating services on a wide range of projects (from a small repair job to coating the entire steel structures of an offshore platform, anything in between).

On site, at customer premises or in our 5 state of the art painting shops we are tirelessly working to ensure safe and accurate services allowing you to extend this comfort down the value chain until the end customers. We are responsive and competitive, but without losing control over the entire process as well as to details.

Our key success factor is the ability to execute a truly wide range of coatings, linings and ancillary services to a heterogeneous set of items, including valves, heat exchangers, subsea installations, skids, architectural items, pressure vessels, pipes, bends and penstocks. We dedicate the most accurate attention that is typical of an artist, yet backed by a large enterprise, with competences and continuous investments.

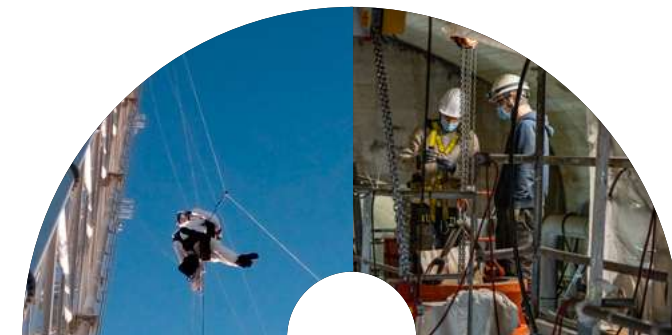

We are always ready to take on the challenge to extend the expected life of a used item as well as to protect a new one in order to make it last as long as possible. We are also successful thanks to highly specialized applicators capable of applying the specific system under the close control of certified inspectors and the most developed sensors.

Hydropower industry

Applications:

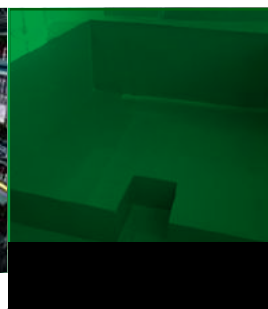

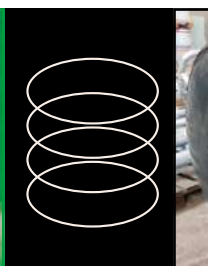

- Maintenance of metal structures;
- Automatic internal blasting and lining;
- External coating in confined space;
- Water dam maintenance;
- Automatic external UHP water jetting.

Power generation and transmission

Applications:

- FGD ducts lining;
- Scaffolding-free maintenance;
- Cold applied tapes;
- Tubesheet and water box renovation;
- Secondary containment protection;
- Concrete rehabilitation;
- Repairs on 3LPE;
- Tank bottom rehabilitation;
- TSA / TSZ;
- Elastomeric membrane waterproofing;
- UHPWJ maintenance works;
- Heat exchangers inspections.

One for all, all for you.

Among the most annoying feelings of managing important projects is that, normally, you are bounced from one person to another multiple times before getting things done. Donelli allows you to avoid all this by putting you in a position to speak with a single contact person at your disposal. In this way, you can stay updated in real time on the progress and simply communicate all your requests, which we will carry them out in the best possible way.

Thanks to a solid organization and the availability of a fleet of over 2,000 mobile specialized equipment, we are able to carry out any “on site” project. Furthermore, being able to count on the support of the entire organization, we can also adopt mixed strategies and carry out “in shop” treatments during prefabrication and/or on easily transportable pieces, reducing externalities at your sites. Ask for Donelli: we are taking care of everything else.

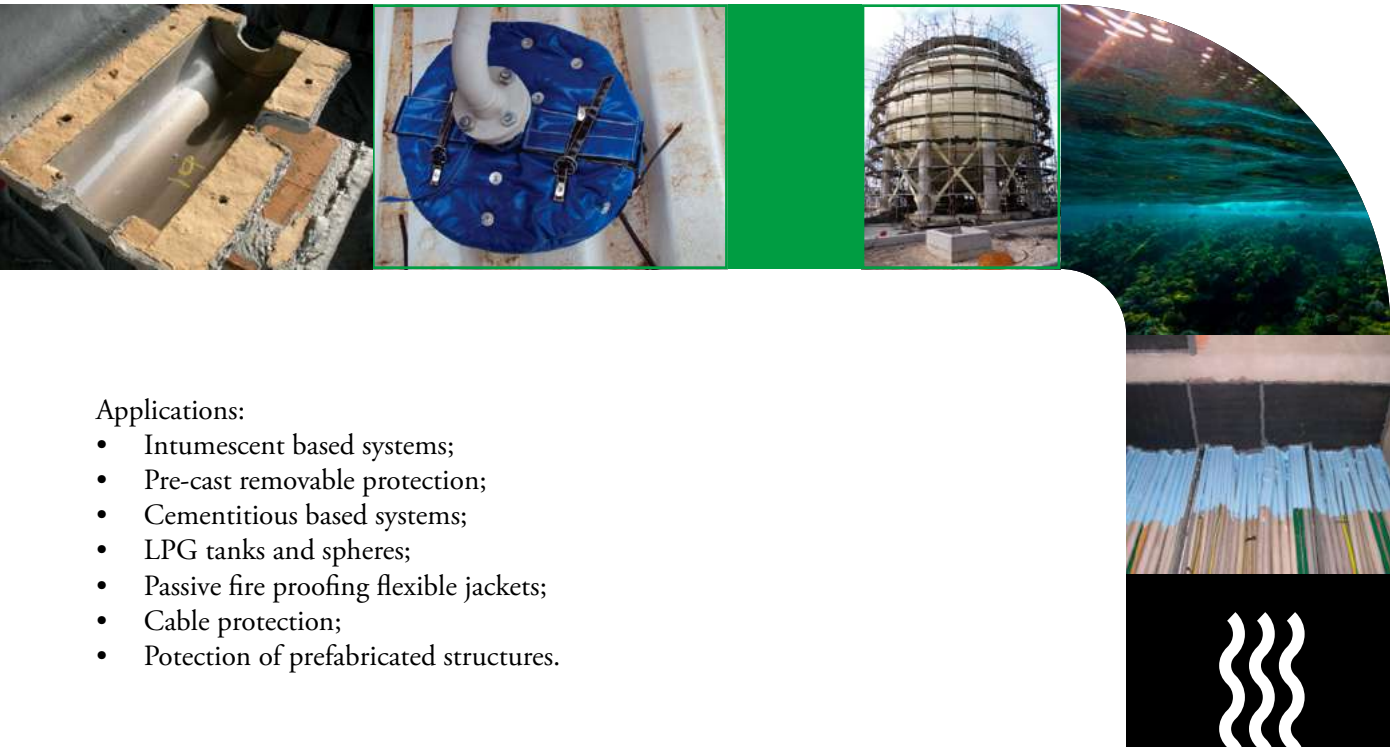

IN SHOP

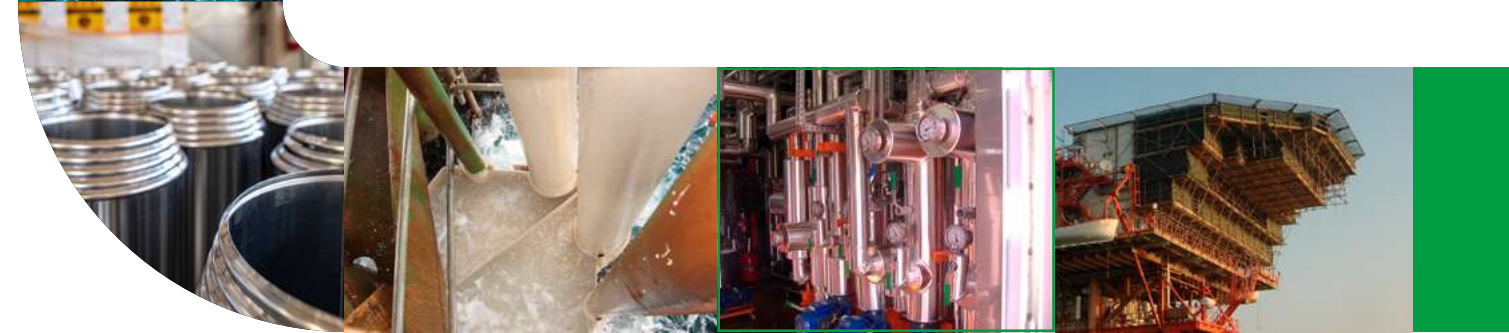

Passive fire protection and cryogenic protection

Approved applicator of: Chartek (Akzo Nobel - International Paint), Thermo-lag, Pyroclad X1 and Pyrocrete (Carboline), Pitt-Char NX (PPG), Firetex (Sherwin Willams), Fendolite (Cafco), Jotachar (Jotun).

Applications:

- Intumescent based systems;
- Pre-cast removable protection;
- Cementitious based systems;
- LPG tanks and spheres;
- Passive fire proofing flexible jackets;
- Cable protection;
- Protection of prefabricated structures.

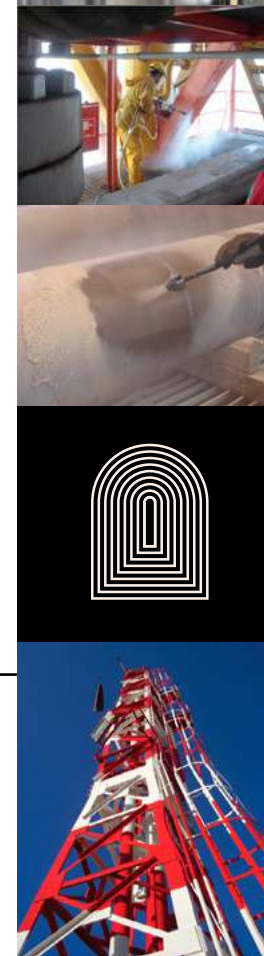

Offshore

Donelli leverages on a team of OPITO/BOSIET qualified applicators and inspectors and offshore suitable equipment

Applications:

- Scaffolding;
- Field joint coating;
- Riser maintenance;
- Riser coating;
- HVAC insulation;
- UHPWJ maintenance works;
- Flange encapsulation with Metaline;
- Hydro-blasting with non metallic water soluble media;
- Helideck anti-skid coating;
- Flare maintenance.

Automotive industry

Applications:

- Cataphoresis tank lining;
- Cataphoresis tank maintenance;
- Maintenance air treatment unit.

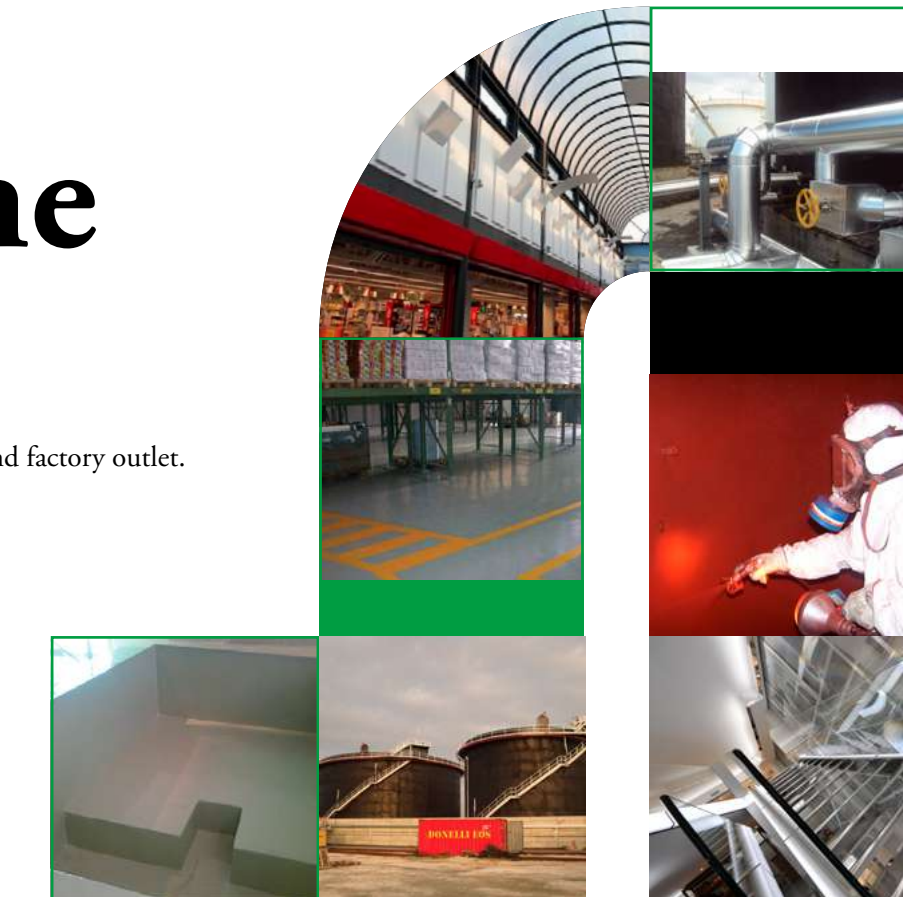

Food and wine industry

Donelli is also capable of supplying turn-key renovation projects for stores and factory outlet.

Applications:

- Sales point restyling;
- Concrete pools;
- Internal lining with food grade coating;
- Industrial flooring;
- Antibacterial coating of HVAC equipment.

Building construction

Applications:

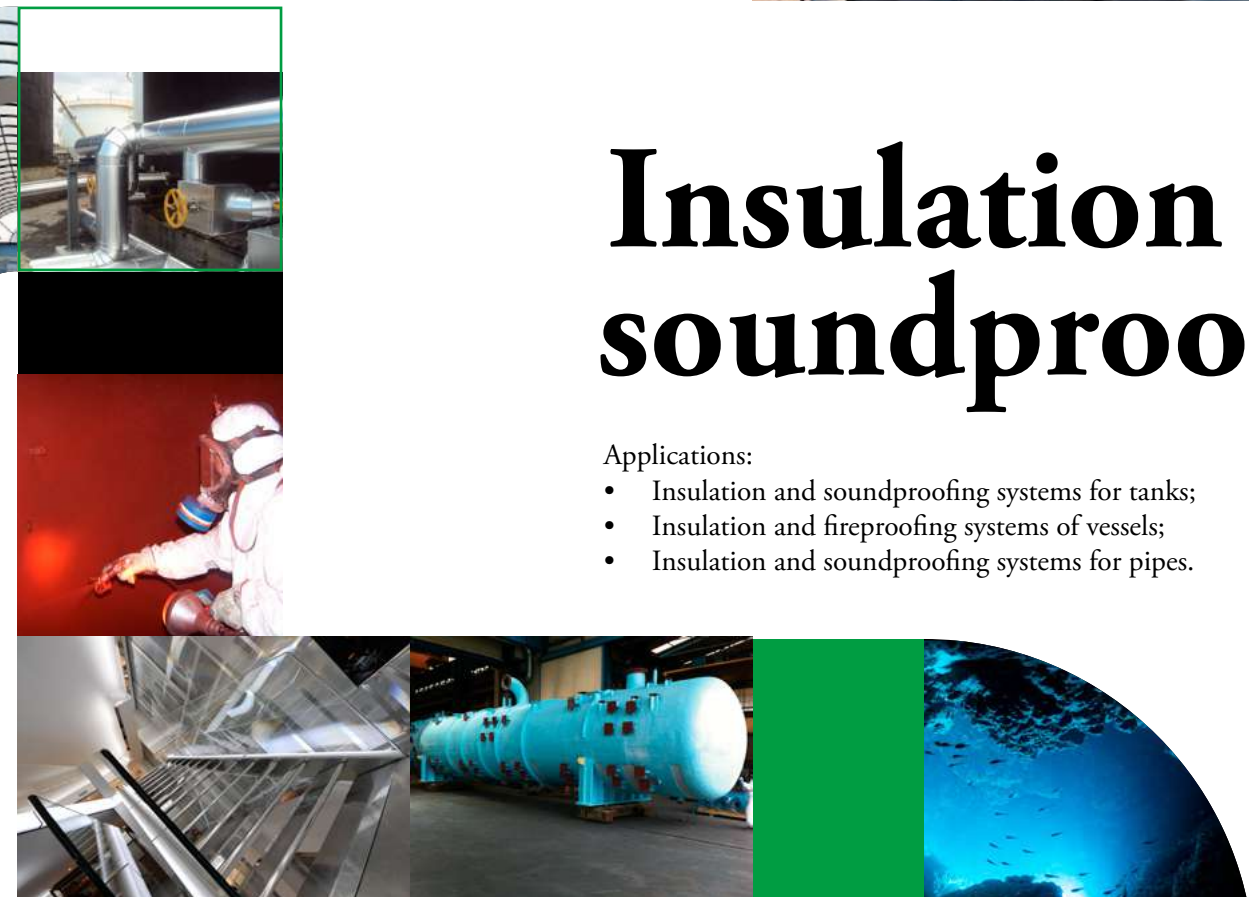

- Cellulosic fire proofing;
- Commercial building finishing;
- Office building maintenance and renovation;
- Infrastructure maintenance;
- Restoration of facades with rampant bridges;
- Sport facilities maintenance;
- Carbon fiber structural reinforcement;
- Maintenance and energy saving enhancement;
- Artistic restoration;
- Insulation of facades.

Insulation and soundproofing

Applications:

- Insulation and soundproofing systems for tanks;
- Insulation and fireproofing systems of vessels;
- Insulation and soundproofing systems for pipes.
