

CONSULTING FIRM FOR INNOVATIVE PROJECTS IN YACHTING INDUSTRY

Hydrogen

Electricity

Bio-fuels

Bio-methanol

HY-Plug is a **consulting firm** for innovative projects in yachting industry for **yachts** and **ports**. It was born of a desire to contribute to the **energy transition** by connecting the players involved.

We study :

Generators

Engines

Refueling stations

*We research, analyze and monitor
the latest technologies and
energies for yachts and ports.*

Combining **environmental** values, **commercial** know-how and a **network** of over **1 300 experts** and **suppliers**, HY-Plug will be the ideal partner for the deployment of **sustainable solutions** in **yachting, marine industry** and **inland waters**.

They trust us

SANLORENZO

CONSULTING FIRM FOR INNOVATIVE PROJECTS IN YACHTING INDUSTRY

Hydrogen

Electricity

Bio-fuels

Bio-methanol

Our services

*We do not buy, sell or
develop technologies. We
analyze, study and advise*

Ports & marinas

We research refueling stations and power generation. We also carry out research and interviews on industry innovations, market trend analyses, and global or catchment area studies.

Yachting

We study propulsion and generator(s). For motorization and re-motorization, we can look for a fuel cell, an electric motor, or a combustion engine (H₂, bio-fuels, bio-methanol, bio-combustion)

Suppliers

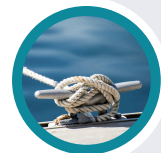

Market analysis of potential users, study of market needs, research into existing products. The objective of this service is to allow you to better understand the needs in a strategic area.

Training

The course is about Fundamentals of Energy Transition in Yachting and taking place at La Belle Classe Academy at the Yacht Club of Monaco.

Regulatory

We can help you understand the regulatory framework applicable to ports, depending on the solution you choose.
