aws

Clinical trial problems

We are the solution

Cost

Drug development is increasingly expensive. Avg cost $1-2.6 billion.

Delays

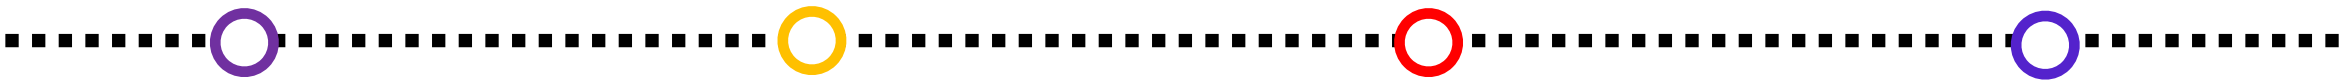

Approval from Phase I is only 9.6%. Timelines can exceed a decade.(1)

Recruitment

80% of trials face recruitment delays,(2) Minority populations represent only 5% of participants 40% of U.S. population.(3)

Regulatory

Long and complex approval processes across regions add delays.(4)

AI Optimization

Insight streamlines trial design with original AI models, saving time and costs.

Predictive Models

Insight forecasts outcomes, reduce amendments, optimizes dosing, and shorten timelines.

Targeted Recruitment

Insight identifies diverse populations, improving representation and recruitment.

Regulatory Assistance

Insight automates the regulatory submission process, predicting obstacles.

Connected Health

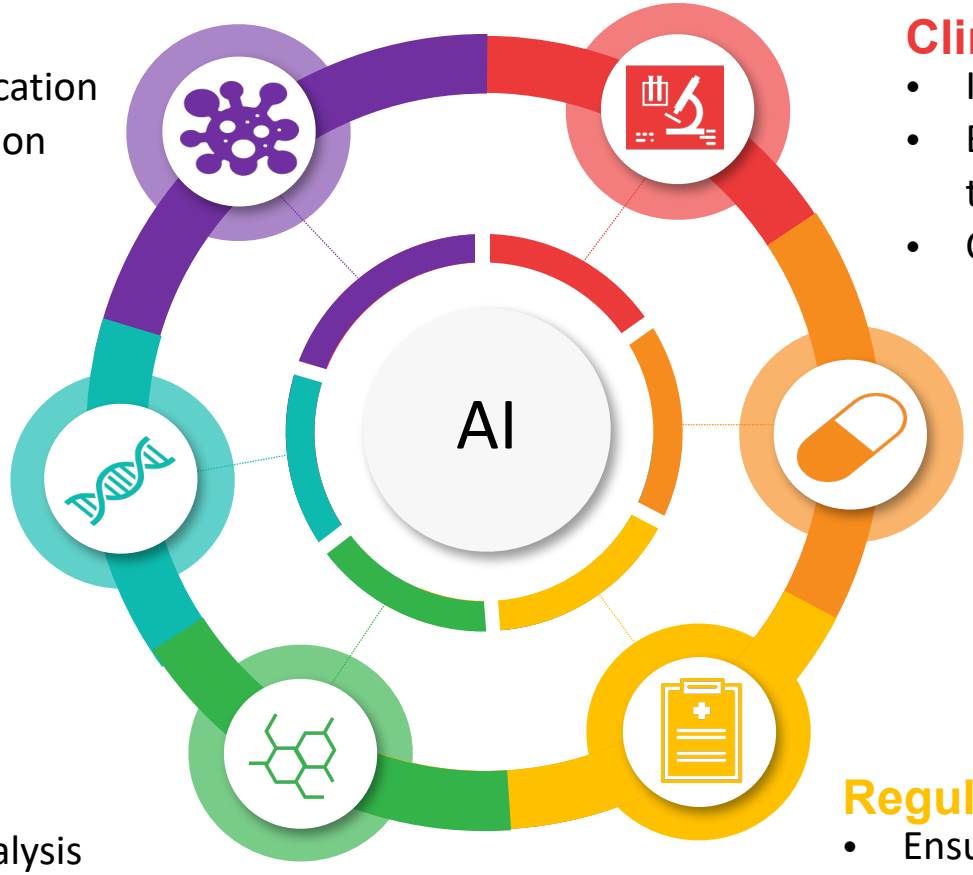

Revolutionising clinical trials with data depth

Diseases

- Pathways and targets identification
- Medical and clinical information

Clinical Trials

- Improve quality of clinical data
- Built to support fair access to treatments
- Collaborate investigators and sponsors

Targets

- Identification of potential hit molecules active on the targets.
- Support Sequence-based drug design

Drugs

- Support novel ideas for drugs & therapies
- Support optimization of formula design.

Compounds

- Identification and analysis
- Assist SAR studies and understanding

Regulatory

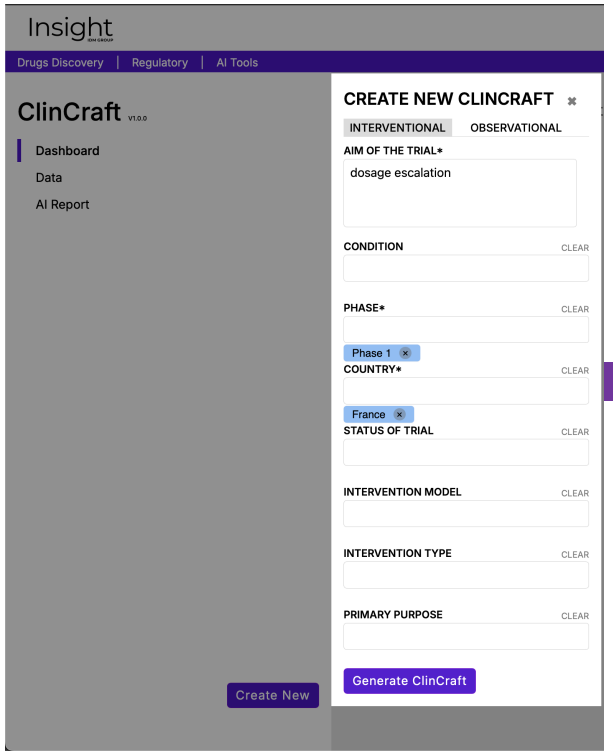

- Ensuring global regulatory compliance in drugs and biologics

The Opportunity

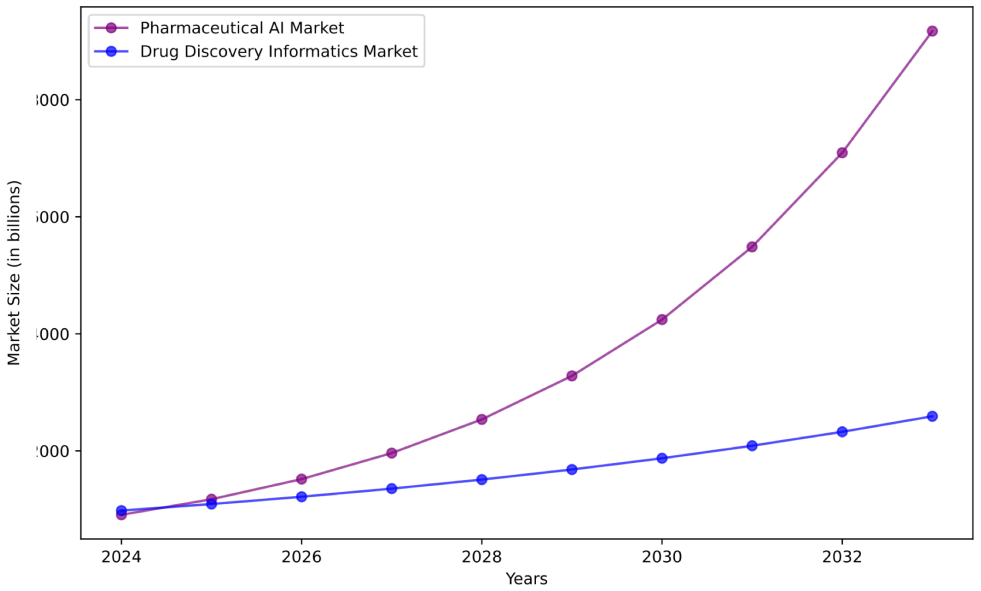

Total addressable market $260B

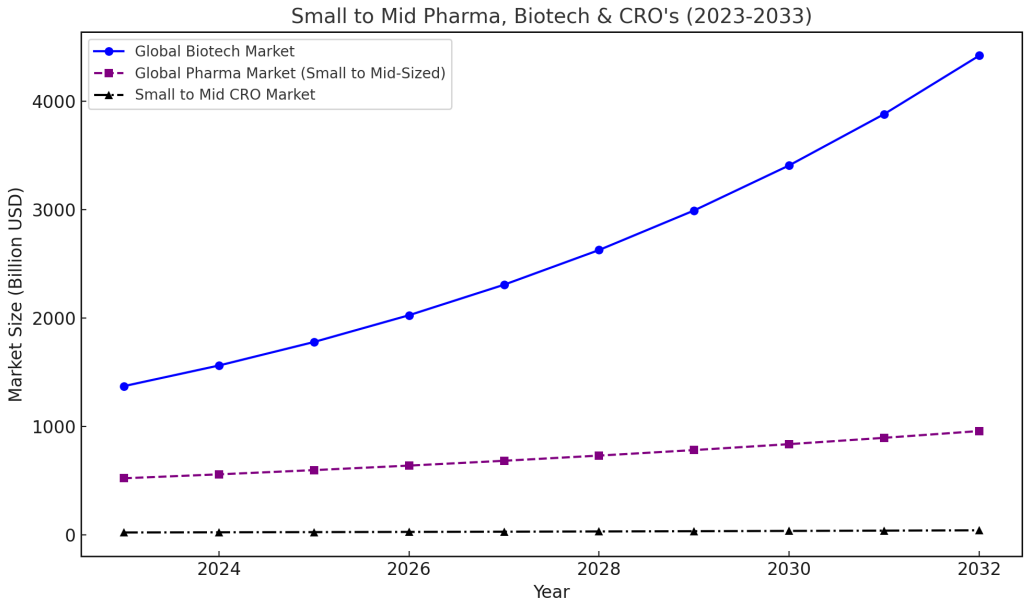

Market focus

Biotech, Pharma Companies and Clinical Research Organization
Market capitalization: Up to 10B $
Annual revenues: up to 1B $
Active/located in US and Europe
Focus on Clinical trials (Products ready to enter clinical phase)

10 Year Growth Outlook

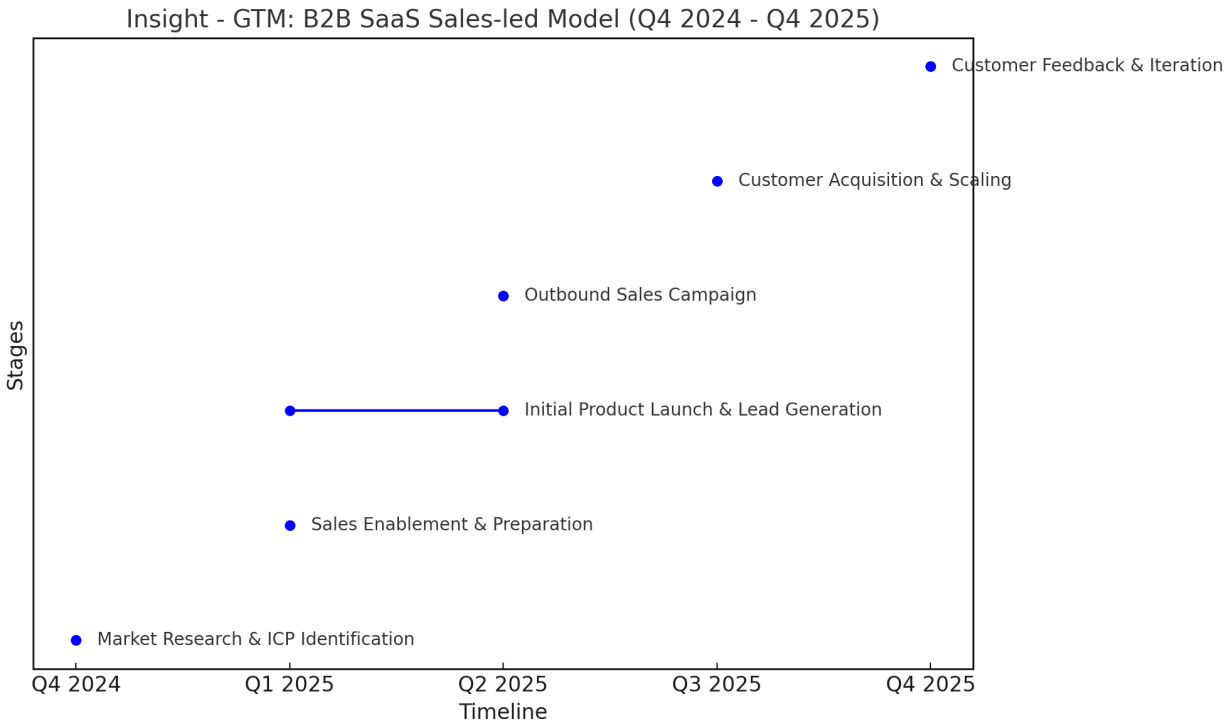

Drug Discovery Informatics CAGR of 11.41%
Pharmaceutical AI CAGR of 42.68% (5)

Competition

The other end of the telescope

At A Glance

- Low competition in clinical trials
- 9 month average time save (cost as high as 500k per day)
- AWS, Nvidia partner developed solution
- Original algorithmic generation models
- Complete industry data coverage
- One of the first to market

Company	Focus Area
Exscientia	AI Early Drug Discovery
Insillico	AI Early Drug Discovery
