

# SOLAR POLAR

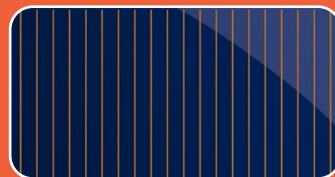

## SOLAR COSY TABLE

**Warm feet, legs,  
knees & thighs.**

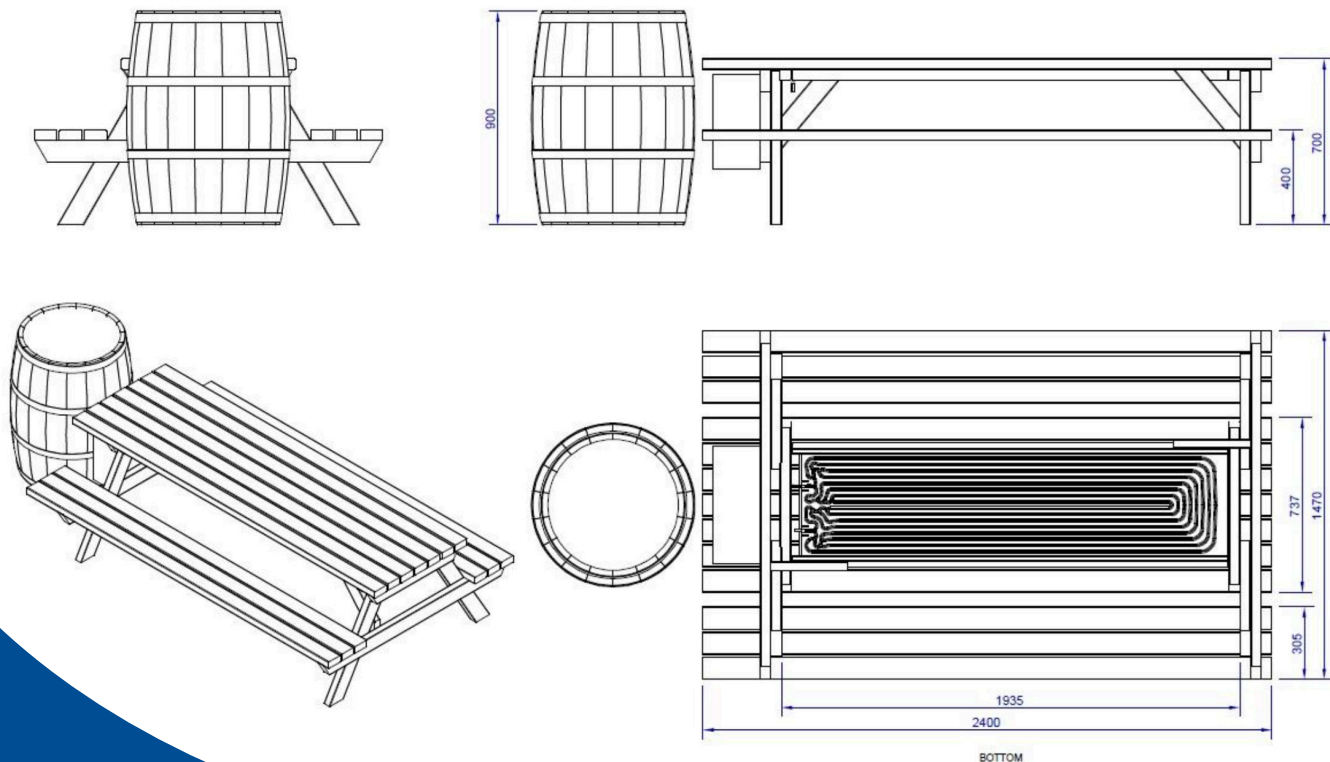

**Heat the parts other heaters fail to reach.**

- Heat from under the table
- Store the sunshine and heat when you need it. Electrical backup for those few dark winter weeks. Even then it uses much less electricity than radiant patio heaters
- Feels really nice – book to come and try it
- Looks just like an ordinary table next to a barrel but the magic is underneath.

< 2x1m High efficiency solar collector can be fixed to a wall, a roof, a fence or the top of an existing pergola.

# Specification

Garden bench table max capacity	8-seater
Material	Wood, pressure treated
Average Electrical power usage	0-3.5 kWh/day (0.7 kWh/person)**
Comparative usage 2x2kW radiant heaters	20 kWh/day (4.0 kWh/person)**
Mains power feed requirement	230 Vac 13A 1-ph
Heat store storage capacity	3.5 kWh
Working air temperature range	-10 to 25°C
IP Rating	IP65
Certification	CE/UKCA
Shipped dimensions	Table 2500 x 1550 x 300 mm Barrel 1020 x 550
Weight	Table 90kg, Barrel empty 70kg

**\*\*Based on 5 hours of use per day and average occupancy of 5. Numbers will vary according weather and sunshine availability.**
