

# IT'S ON Your streaming on set platform.

Optimize your shoots with technology designed by and for professionals. A solution to reduce time, costs, and travel in audiovisual production.

## Optimized shoots.

- Camera signal on any device, **eliminates monitors**.
- **Instant playbacks** generated with an AI TRIGGER.
- Remote access from anywhere in the world.
- Direct communication with the set in real time.
- Simultaneous supervision of **multiple shooting units**.

## More efficient productions.

- Save unnecessary trips to the set, up to **€15,000 in savings per week**.
- Reduce carbon footprint:
  - 125 kg CO<sub>2</sub> in domestic travel.
  - 2,100 kg CO<sub>2</sub> in international travel.
- Set up remote “video villages” for shoots in isolated areas.
- Compatible with drones, camera cars, and special productions.

## Platform features.

- Access from any device (mobile, tablet, PC).
- Encrypted signal and secure connection.
- Ultra-low latency (~1 second).
- Integrated communication and chat.

**Transform the way you shoot: more agile, more connected, and more eco-friendly.** Ideal for production companies, agencies, and international teams looking for efficiency without sacrificing quality.
