

Production Control Panel

The application is designed for employees who manage and assign tasks, monitor production and system performance in a production facility. Its primary purpose is to enable efficient creation, tracking, and management of production plans.

- Production Planning
 - Purchase Order
 - Work Order Management
 - Master Production Schedule
 - Activity Plan
 - Asset management
- Production Real-Time Monitoring
 - Overall System monitoring
 - OEE Machine monitoring
 - Work Order Closure
 - Employee and Systems Logs
- Application configuration
 - Working and Non-working days
 - Employees, Shifts
 - Machines, Sensors
 - Operations, Processes

Production Operators Panel

The screenshot displays the eFabrika Production Operators Panel interface. The top header shows the eFabrika logo, the user name 'Filip Maric', and the machine ID 'UTT-200/dd7cdb66cf3b3a73'. The main interface is divided into several sections:

- Status Section:** Includes a 'CANCEL TASK' button, a progress gauge, and buttons for 'MY TASKS', 'LOAD', 'LOGOUT', 'DOWNTIME', and 'COMPLETE'. The status is 'Running'. Job order is '24296/2025-204'. Current time is '14:25:03'. Actual start time is '16.09.2025 13:32'. Planned start time is '16.09.2025 15:00'. Planned end time is '16.09.2025 16:00'. Phase duration is '60 min'. Total number of phases is '1'. Machine running time is '00:53:00'. Total downtime is '00:00:00'.
- Technical Drawing:** Displays a detailed drawing of a part with dimensions and a section view labeled 'SECTION VIEW A-A'.
- Calendar View:** Shows a weekly schedule for tasks assigned to Filip Maric and Dejan Jakovski. The tasks are scheduled for Tuesday, Wednesday, and Thursday.

The application serves employees working on machines by providing insight into work plans, i.e., schedules of assigned activities (tasks), as well as for obtaining information about the task they need to work on and recording specific actions within the task they are performing. Modules of the Operator application are:

- Login/Logout
- Weekly Schedule
- CIMCO integration
- Production Real-Time Monitoring
 - View details
 - Technical documents
 - Activities (starting job on assigned task)
- Report Downtimes (Operational interruption)
- Activities Cancellation
- View next Activities
