

Who we are

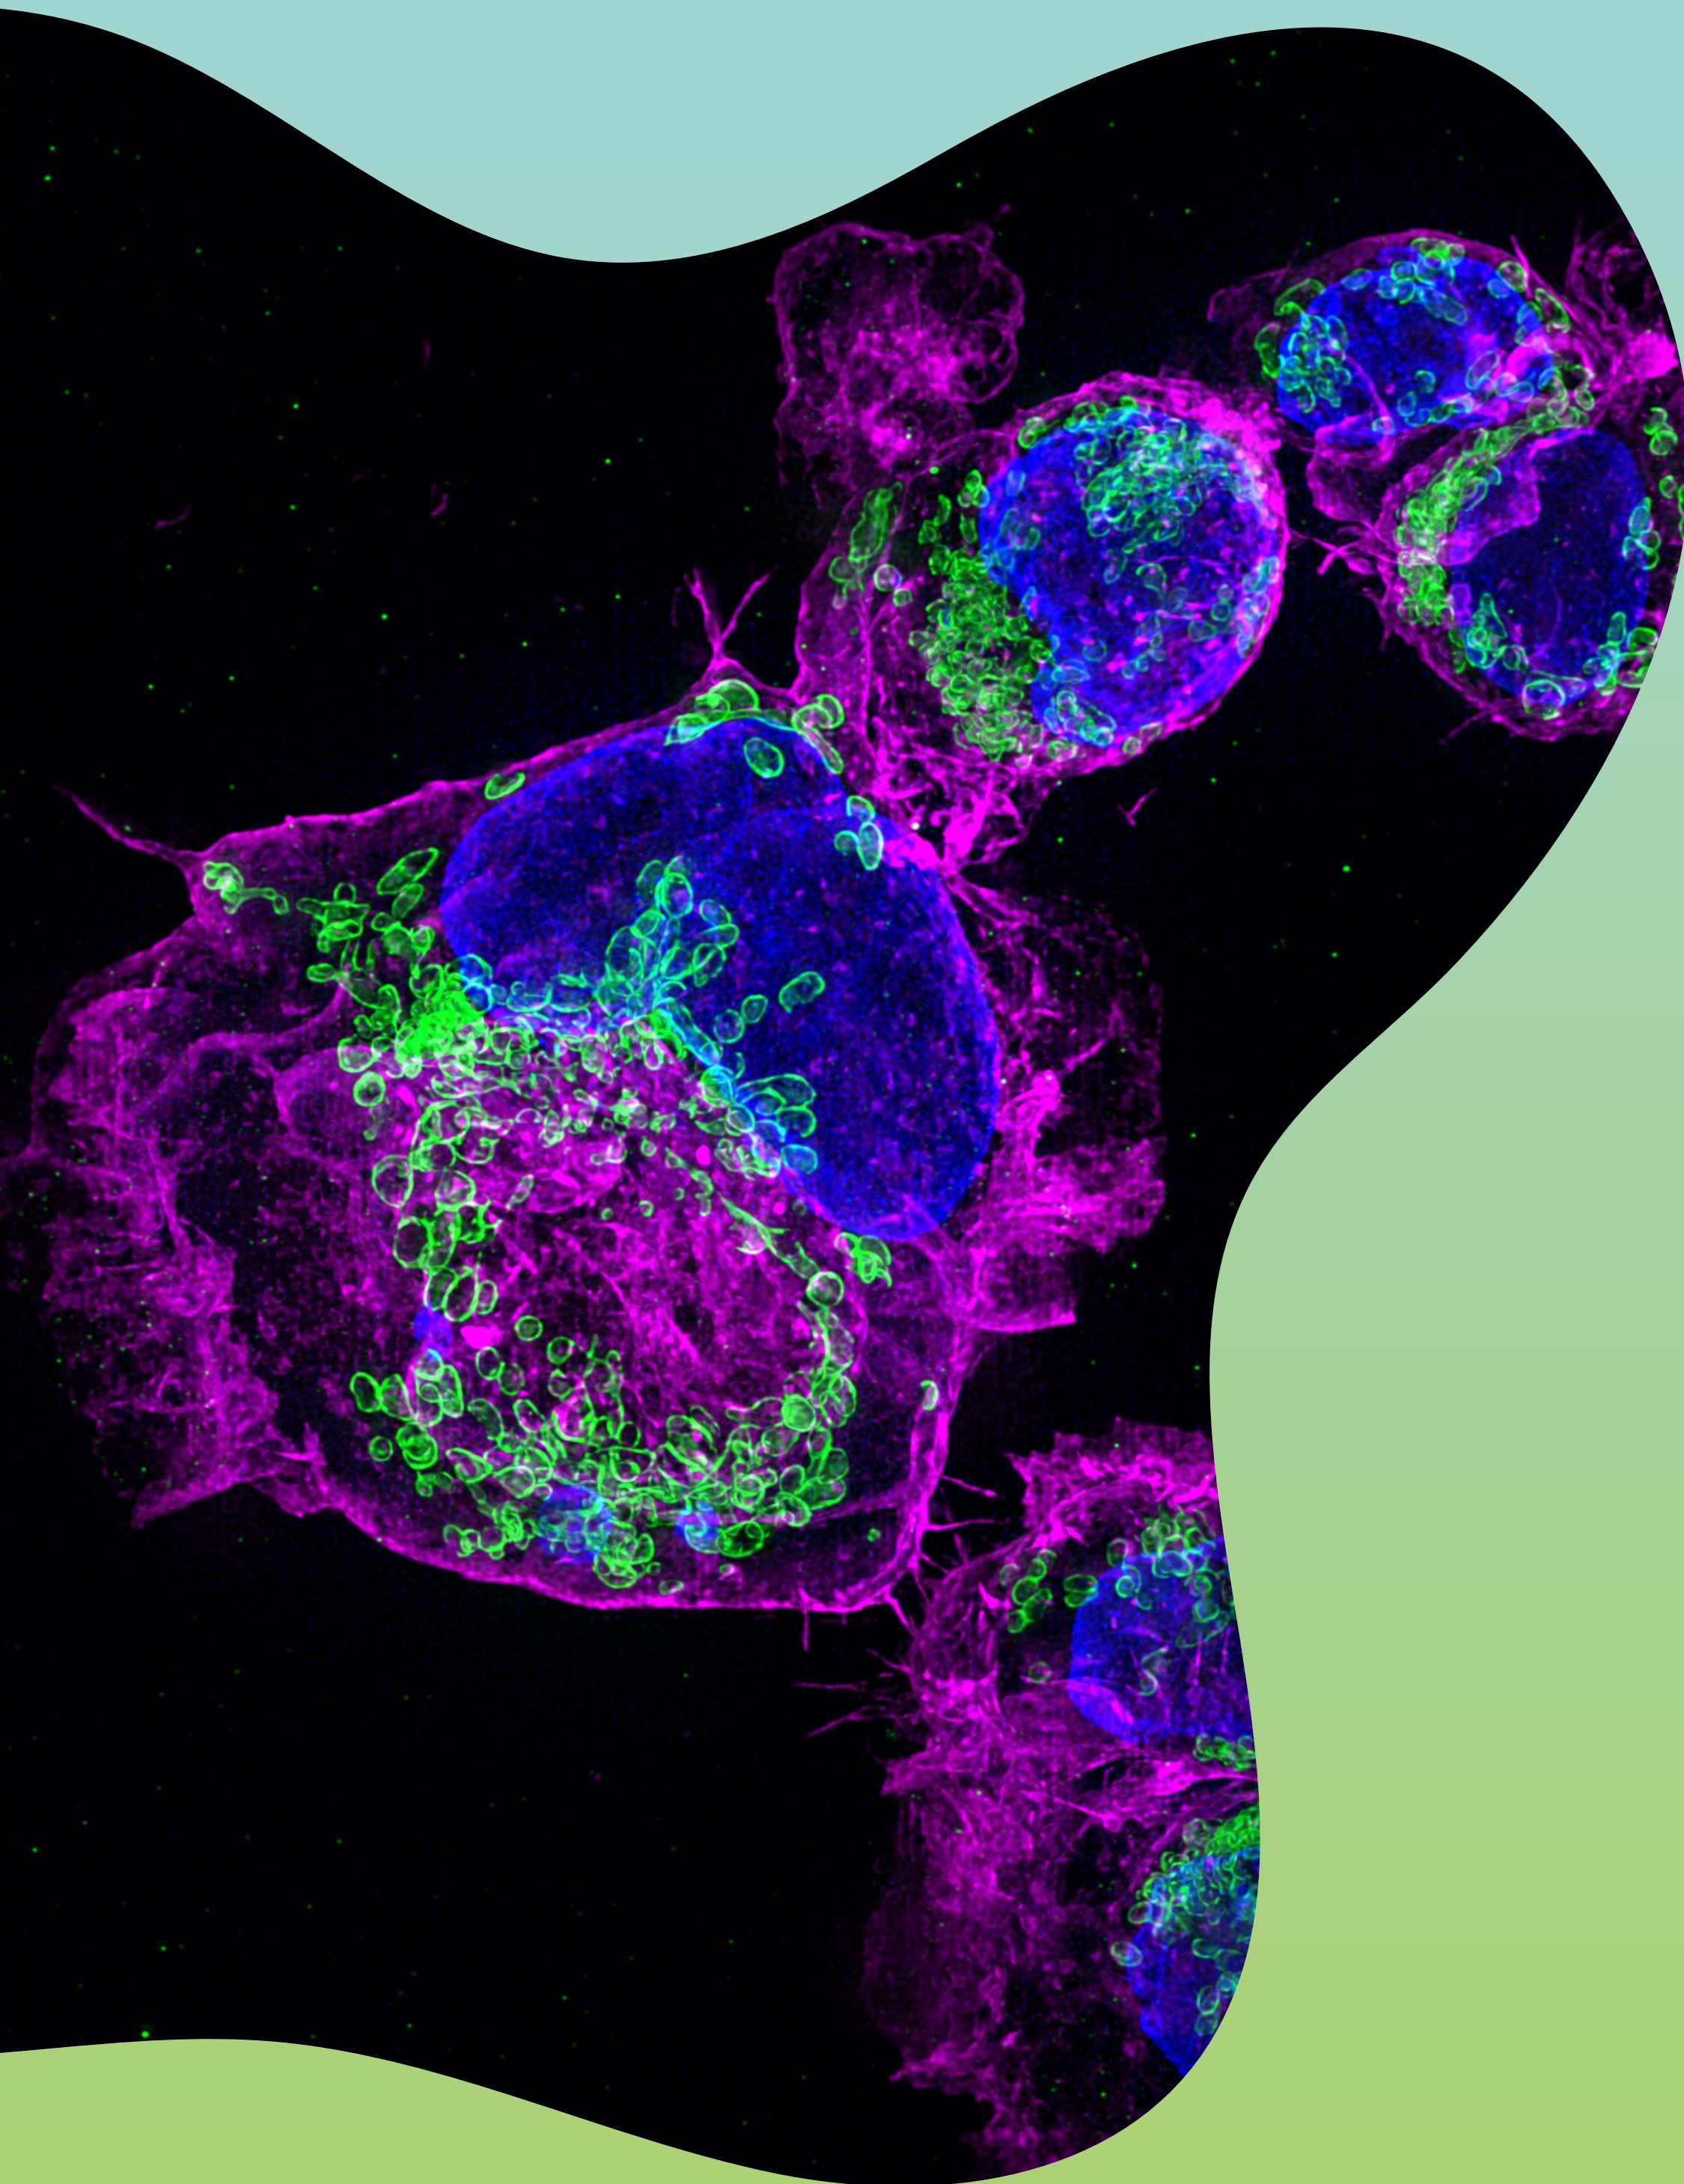

Euro-BioImaging provides open access to biological and biomedical imaging, training and data services through 330 facilities across Europe.

What we are working on

We support cancer research with advanced imaging expertise and contribute to Cancer Image Europe, enabling federated image access for research and AI development.

What's the one thing we need next

We need sustained, coordinated funding for equitable access to imaging infrastructures and interoperable cancer image data, preserving long-term European research services.

5 years Mission Cancer:
Stronger Through Connection
