

unique 3D structured biomaterials for easy oil cleanup

oil & gas

leaks polluting ground and water

industrial machines

work security leaks

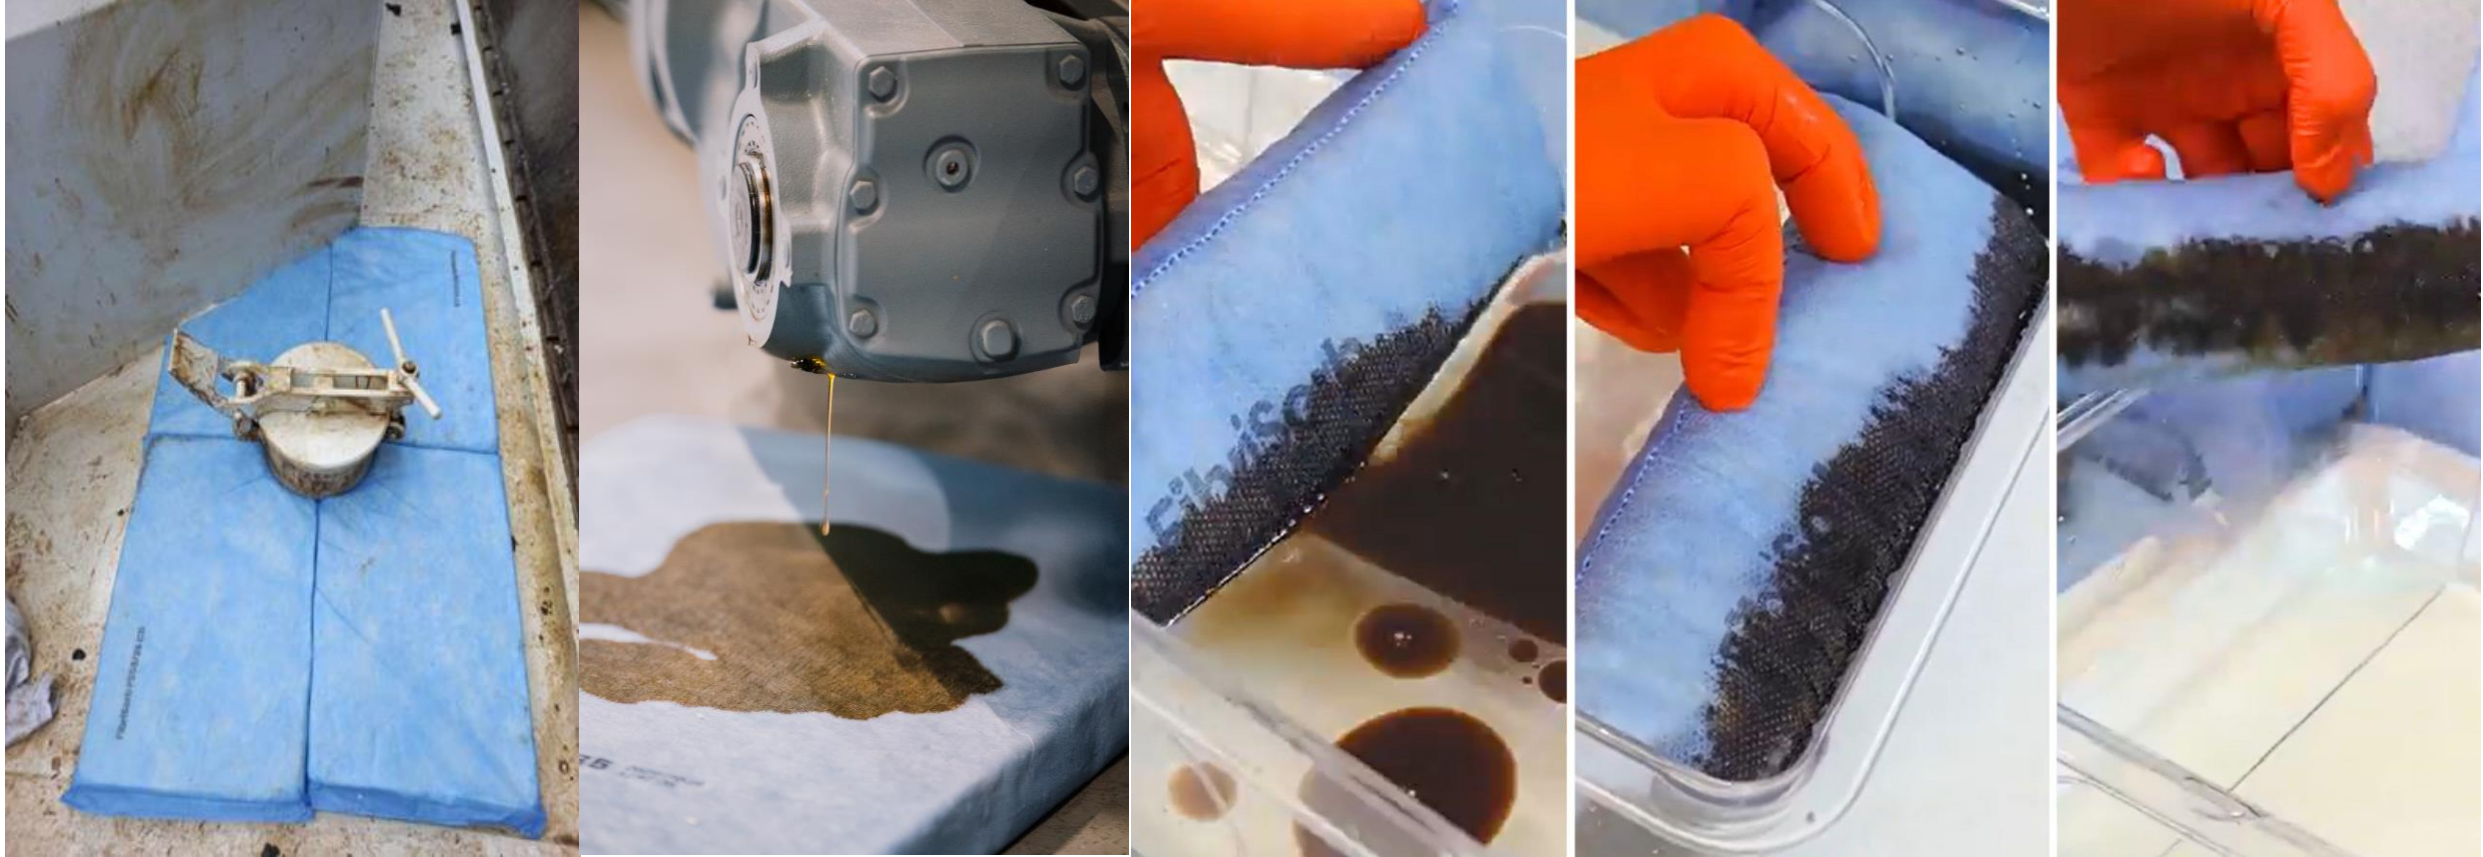

wind power industry

turbines leaks & maintenance

FibriSorb

FibriSorb – oil cleanup use cases

Oil&Gas sector - dedicated solution

FibriSorb

Industry sector - sourcing leaks close to its source

FibriSorb

Oil cleanup from water – dedicated solution

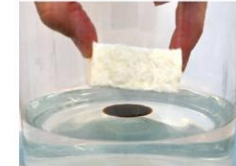

FibriSorb

Oil cleanup from water

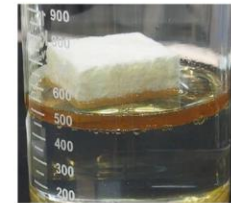

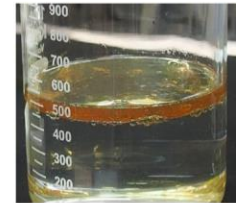

Strong Hydrophobic Properties

efficient

~1 sec

1g absorbs
15g of oil

~120 sec

Usage examples (click to play videos)

FibriSorb

Continuous leak protection

Effective containment and removal of the spill

Spill fix in hard to reach place

Clean & Easy

Product		Description	Dimentions	
1	RS5/150	Sorption sleeve 5x150	5 cm diameter x150 cm	
2	RS8/150	Sorption sleeve 8x150	8 cm diameter x150 cm	
3	PS55/35	Sorption pad	55 x 35 x 4 cm	

Tabele 2. Our products

FibriSorb Properties

FibriSorb

Fast sorption of oils and petroleum derivatives: 75% diameter in 5 min, up to 95% diameter after 50 min for oil 10W40/30°C

High efficiency – 1 kg FibriSorb absorbs 15 liters of oil

Strong hydrofobic properties – do not absorb water

Very low product density – 40-60kg/m³

Mechanical stability after absorption – no secondary leakage

No dusting

Business benefits of using FibriSorb

FibriSorb

Shorter employees working time

Decreasing utilisation cost thanks to low mass and high efficiency
(the cost for granular materials is +50%, and for polypropylene materials up to +15%)

Less storage space – up to 50% comparing with competition

Easiness of usage and transportation

Ecological aspects to highlight in ESG reporting and building the company's image

FibriSorb – oil sorbent
