ABOUT THE COMPANY

LIFTING EQUIPMENT FOR ANY SITUATION

BSV Krantilbehør A/S was established in 1960, and the company specializes in developing, producing and selling lifting equipment for cranes within mechanics, hydraulics and electro-hydraulics.

We are a Danish company operating globally. Production takes place in our factory in Vejen, Denmark, and all processes take place in-house, which gives us the opportunity to have control over the entire manufacturing process and deliver quality products that last for many years.

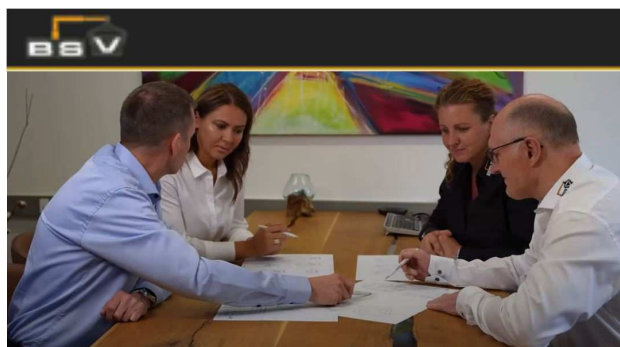

We offer a range of high-quality products to entrepreneurs, concrete industry, builder's merchants, industrial companies and WTE sector. All our products are tested before delivery and are supplied with full documentation.

Our products are divided into 4 main categories

- Electro-hydraulic grabs
- Mechanical scissor grabs
- Crane forks
- Hydraulic grabs

As BSV customer, you can expect

- High quality products and solutions
- Over 60 years of experience
- Serious partnership
- Expertise and advice throughout the whole process
- Customized solutions
- Safety and certificates
