

Who we are

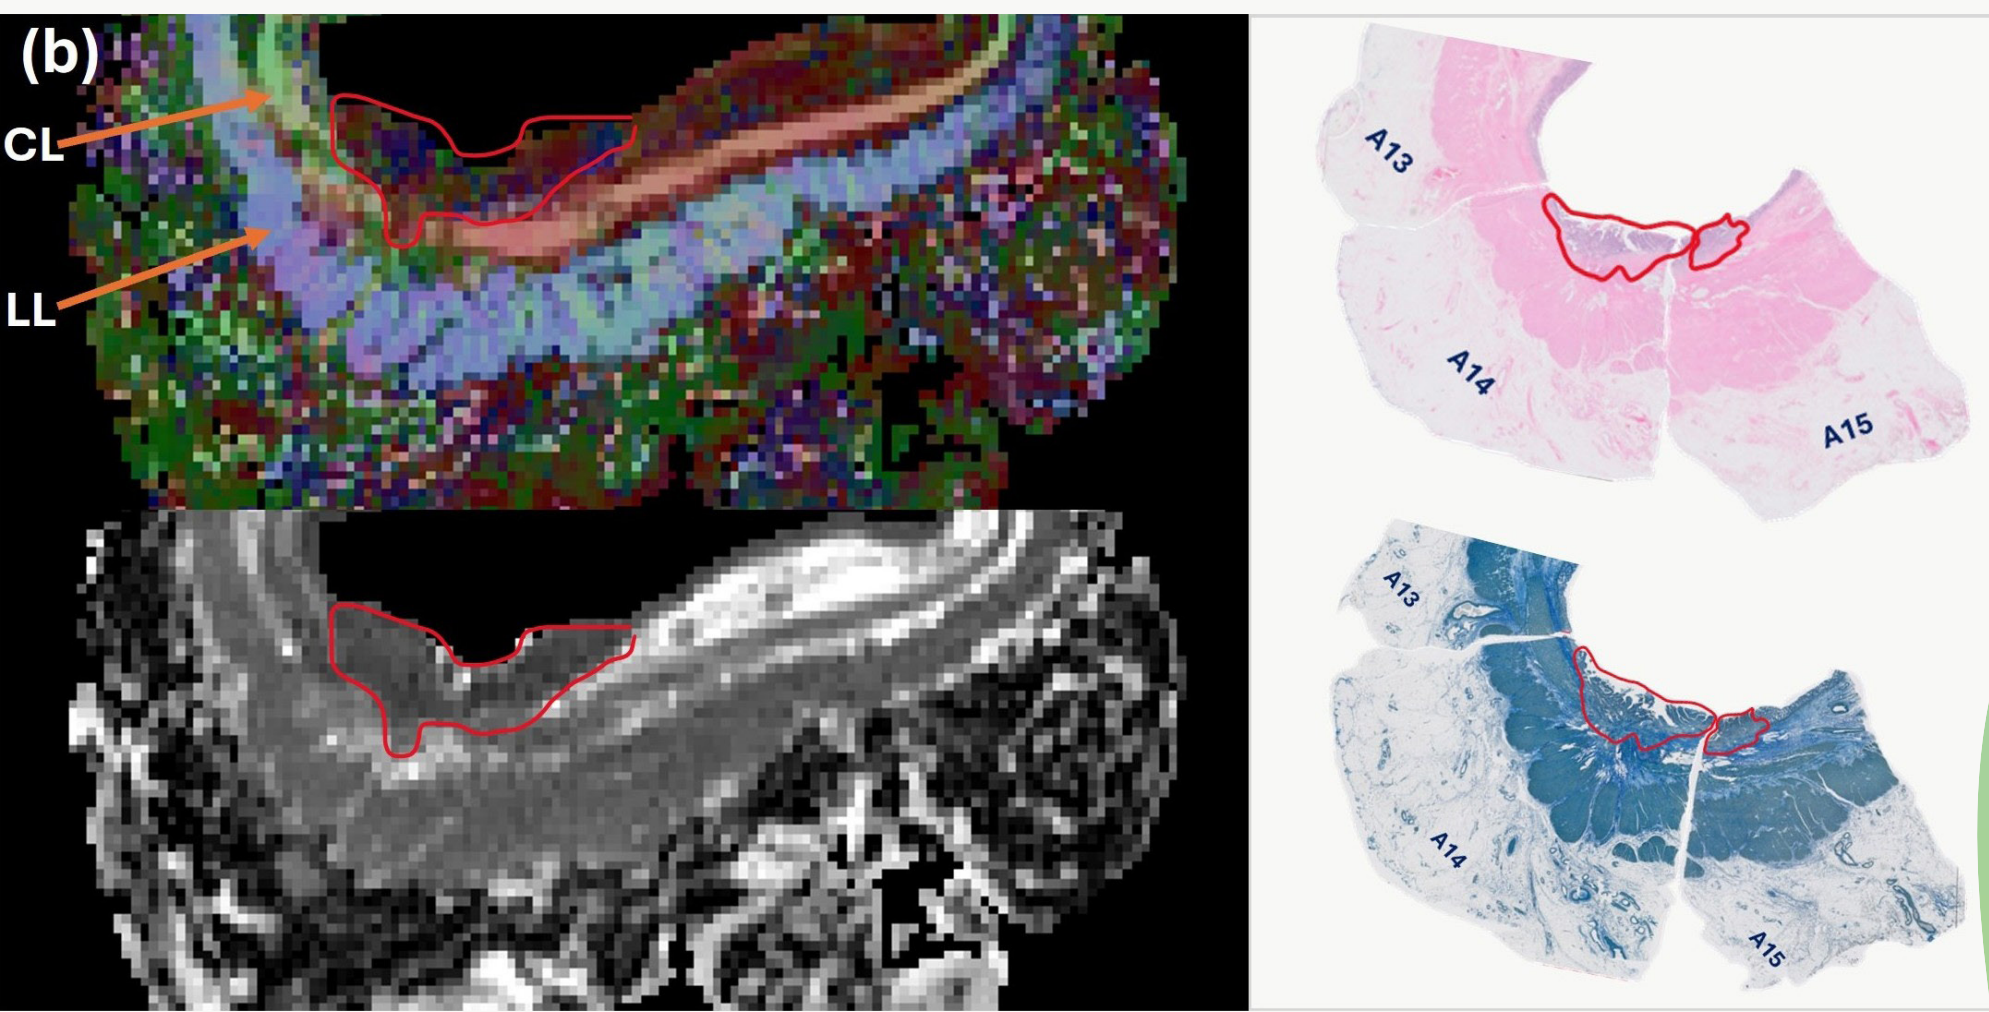

We are ReSTAGE, a multidisciplinary European consortium funded by the THCS Partnership. Our team unites scientists, clinicians, patient representatives, and industry partners across Portugal, France, and Romania.

What we are working on

We develop high-resolution MRI, machine learning, patient digital tools and a European repository to personalise rectal cancer management and support organ preservation.

What's the one thing we need next

We need broader European data sharing, clinical-imaging collaboration and patient-policy engagement to validate models and integrate advanced MRI approaches into routine care.

**5 years Mission Cancer:
Stronger Through Connection**
