zefort

Why companies choose Zefort

✅ Take control of your contracts. **Eliminate all extra effort in creating, signing, storing, and managing** them.

✅ Zefort is AI-native: **save time and effort by finding the right contract instantly** and sharing it among different stakeholders.

✅ You'll **never miss a deadline again**. Receive reminders for important contractual dates.

✅ Stay compliant with **bank-level security** for all your contract data.

zefort

Bank-level security for your contracts

Keeping your data secure and private are our top priorities. Zefort ensures security on many levels, from meeting strict regulatory requirements to software architecture and physical security.

All data and servers located in Finland, EU.

+ Zefort is **ISO/IEC 27001:2022 certified** and we apply strict security requirements to all our 3rd party vendors as well.

+ Zefort utilizes **AES256 data encryption, 2-factor authentication and secure server-to-server communication**. All activity is traceable through a separate access log system.

+ **IP and email whitelisting** allows you to manage access for your organization and your partners.

+ **Single sign-on (SSO)** and two-factor authentication increase security while keeping using the service simple.

+ Get the ability to permanently delete the personal data to meet the **GDPR requirements**.

+ **Third-party penetration tests** conducted regularly

Integrate easily with everything

Several in-build integrations and limitless possibilities with the secure Zefort API https://developers.zefort.com

Software as a Service

✅ **Effortless adoption** – Zefort is quick to deploy and easy to use, with no need for external consultancy or complex IT projects.

✅ **Smart configuration** – Comes with a ready-made, best-practice setup (like Apple), while still allowing full customization to match customer processes.

✅ **Guided onboarding** – Includes four structured training packages designed to equip key users with the knowledge and skills to get the most out of Zefort.

✅ **Optional migration project** – When needed, Zefort provides a dedicated migration service to import and organize existing contracts from Sievo's legacy system.. The process is handled primarily by Zefort, requiring minimal effort from the customer and ensuring data integrity and a seamless transition.
