

Secure Your Data and Systems with

Multi-Factor Authentication

Rublon is a cybersecurity solution that provides employees secure access to their organization's IT resources using **modern Multi-Factor Authentication**. After entering the correct password, the user is asked to authenticate with a second factor, such as confirming a mobile push notification on their phone.

By **securing employee access**, Rublon helps your company comply with data protection regulations, cyber insurance requirements, and information security standards. Rublon protects logins **to networks, servers, endpoints and applications** against cyber threats like ransomware and authentication attacks.

Achieve Compliance

Rublon helps **meet regulatory requirements** and standards for cybersecurity, such as **GDPR, FTC Safeguards Rule, NIS2 Directive, HIPPA, ISO 27001, SOC 2, and NIST guidelines**, among others.

Technology Compatibility

Using native connectors and APIs, Rublon **integrates with business technologies** like Windows, Active Directory, Entra ID, Remote Desktop, AD FS, VPN, SSH, as well as LDAP, RADIUS, and SAML protocols.

Hardware Authentication

On top of software authentication methods like Mobile Push and Mobile Passcode, Rublon offers strong authentication using **phishing-resistant FIDO security keys** and **OTP tokens**.

Scalable & Flexible

Rublon is a modern solution that provides **high availability, reliability, and scalability**. It can protect any number of users and devices, and adapt to changing needs using **security policies**.

Components

Rublon Prompt

View displayed after entering correct login credentials. Users can select their preferred authentication method and self-enroll new authenticators, such as mobile apps and security keys.

Rublon Authenticator

Mobile application available for Android, iOS, and HarmonyOS. It can be downloaded directly from Google Play, App Store, or AppGallery.

Rublon Admin Console

Control center for managing the organization's security. Administrators can configure and manage applications, users, user groups, devices and security policies.

Why Rublon?

- ✓ Centrally managed MFA for the entire IT infrastructure
- ✓ Wide selection of authentication methods
- ✓ GDPR compliant – personal data processed within the European Union
- ✓ ISO 27001 certified in the scope of security of software and IT cloud services
