

## lamelat™ C – the power of vitamin C

The lamelat™ C cosmeceuticals series has been designed to provide the skin with the strongest antioxidant (vitamin C) in its most stable form - the C-LipoAqua™ complex.

Due to its antioxidant properties and neutralizing the negative effects of free radicals, **vitamin C** (also known as "the vitamin of youth"), proves strong **anti-ageing** effect. It stimulates the process of collagen synthesis, protects collagen and elastin fibers against degradation, improves skin firmness and smooths out wrinkles. It is an intensive moisturizer, provides skin regeneration and also restores its natural glow.

The implementation of the **liposomal** skin penetrating system makes **vitamin C** and other active substances contained in the lamelat™ C series penetrate into deeper skin layers. This ensures the lasting effect of their release and substantial increase in the cosmeceuticals effectiveness.

a product without liposomal technology

lamelat™ C series with vit. C in liposomal technology

## lamelat™ C – the power of vitamin C active ingredients

### C-LipoAqua™ complex

An innovative liposomal complex of 100% stable form of vitamin C – composed of VC-IP (Ascorbyl Tetraisopalmitate), SAP (Sodium Ascorbyl Phosphate) and L-Ascorbic acid. Protects collagen and elastin fibres, and stimulates collagen synthesis. Refines the skin's elasticity and minimizes fine lines and wrinkles. Protects the skin from the adverse impact of environmental factors. It inhibits melanogenesis and brightens discolorations. Does not cause irritation.

### Whitening biomimetic peptide

A highly advanced and unique ingredient with brightening properties, delivered deep into the skin in a liposomal technology. It inhibits the entire melanogenesis process by reducing the activation of tyrosinase, TRP1, TRP2 and MITF. This allows for obtaining optimum skin brightening effects, skin tone alignment and inhibits the formation of pigmentation changes, freckles, age spots or sunburn, post-inflammatory and acne discolorations.

### Cryptomeria Japonica Bud Extract (Japanese Cryptomeria Bud Extract)

It restores the epidermal renewal, stimulates microcirculation and slows down the ageing process. It acts in all skin layers - from deep layers to epidermal corneocytes.

### Glycyrrhiza Glabra Root Extract (Licorice Root Extract)

It has very potent antioxidative and brightening properties. It contains glabridin - the melanin inhibitor - which reduces the activity of tyrosinase, thus inhibiting the production of melanin. It protects the skin against UV radiation, minimizes collagen degradation and prevents skin photo-ageing.

### Betaine

A natural moisturising factor. Helps the skin maintain its water balance – by inhibiting evaporation. It reduces transepidermal water loss (TEWL). Protects the skin against environmental stress (UV radiation, dehydration, etc.) and boosts the epidermis regeneration.

### Hyaluronic acid

A natural component of the skin's intercellular space, of very strong hygroscopic properties - thus playing a fundamental role in maintaining good skin condition. It improves the absorption of other active ingredients.

**Low molecular weight hyaluronic acid** - penetrates the *stratum corneum* and reaches deep layers of the skin. Retains water, improves skin hydration, moisturization and elasticity.

**High molecular weight hyaluronic acid** – remains on the skin surface, forming a protective film that strengthens the hydrolipidic barrier of the skin, thus limiting water loss. It hydrates and delicately tightens the skin.

# lamelat™ C

## the power of vitamin C

# lamelat™ C 30% vitamin C serum

- ▶ day and night **care serum** for face, neck and decollete use
- ▶ **brightens, rejuvenates** and **regenerates** the skin
- ▶ includes the effective combination of active ingredients:
  - **C-LipoAqua™ complex** - a liposomal, **100% stable** form of **vitamin C**
  - **provitamin B5, the extracts of** Vaccinium Myrtillus Fruit, Saccharum Officinarium, Citrus Aurantium and Acer Saccharum
- ▶ **stimulates collagen and elastin** synthesis and protects the collagen and elastin fibers from damage
- ▶ **firms the skin and shallows wrinkles**
- ▶ shows high **antioxidant** potential: **neutralizes free radicals** and **reduces skin photo-ageing process**
- ▶ effectively inhibits melanin synthesis, **minimizes discolorations and aligns the skin tone**, boosting its radiance
- ▶ dedicated to **skin** with **visible ageing signs** and **discolorations**

**the skin revival booster**

## lamelat™ C hydration serum

- ▶ day and night **hydration serum** for face, neck and decollete use
- ▶ guarantees the optimum skin hydration level
- ▶ includes the effective combination of active ingredients:
  - **C-LipoAqua™ complex** - a liposomal, **100% stable** form of **vitamin C**
  - **hyaluronic acid** in freeze-dried microspheres technology
- ▶ reduces transepidermal water loss (TEWL)
- ▶ strengthens skin's lipidic barrier and regenerates its structure
- ▶ increases skin elasticity, tightens and smooths it
- ▶ dedicated to **skin** that is **dehydrated, prone to drying, needs protection against** the adverse impact of **external factors** (e.g. air-conditioning)

## lamelat™ C illumination serum

- ▶ day **illumination serum** for face, neck and decollete use
- ▶ provides the skin with natural glow and illumination effect
- ▶ includes the effective combination of active ingredients:
  - **C-LipoAqua™ complex** - a liposomal, **100% stable** form of **vitamin C**
  - **whitening peptide** in liposomal technology, Glycyrrhiza Glabra Root Extract
- ▶ improves the skin appearance and aligns its tone
- ▶ helps it restore its natural glow
- ▶ improves skin's elasticity
- ▶ minimizes crow's feet, wrinkles and imperfections
- ▶ effectively brightens up discoloration
- ▶ dedicated to **skin** that is **tired, dull and sallow**

## lamelat™ C regeneration serum

- ▶ day and night **regeneration serum** for face, neck and decollete use
- ▶ provides comprehensive skin revitalization
- ▶ includes the effective combination of active ingredients:
  - **C-LipoAqua™ complex** - a liposomal, **100% stable** form of **vitamin C**
  - **Cryptomeria Japonica Root Extract, betaine, hyaluronic acid**
- ▶ restores skin's regeneration capabilities
- ▶ makes wrinkles and crow's feet less visible
- ▶ slows down the skin ageing process
- ▶ improves skin elasticity, firmness and texture
- ▶ protects against the adverse impact of external factors (UVA/B)
- ▶ dedicated to **skin** that is **flabby, lost its firmness** and elasticity, **needs enhancement**
