01 About Us

At Trabzon Plywood Industry & Trading Co. Ltd. , we specialize high-quality birch plywood under our trusted brand, A PLY. With a focus on durability, precision and sustainability, we deliver products that meet the highest international standards.

Our 13-layer birch plywood is designed to perform flawlessly in demanding environments from construction and formwork systems to furniture and interior design applications. Each panel is carefully manufactured using %100 birch wood and premium bonding technology, ensuring maximum strength, water resistance, and long-term performance.

Driven by innovation and costomer satisfaction, A PLY continues to grow as a reliable partner for industries seeking excellence, consistency and quality you can trust.

02 Vision&Mission

Vision

To be a leading global brand in the plywood industry by combining innovation, sustainability, and superior quality, setting new standards in durability and performance across every field of use.

Mission

To produce high-performance birch plywood that meets international standards, using advanced technology and environmentally responsible methods.

We aim to provide our customers with reliable, long-lasting, and sustainable solutions for construction, furniture, and industrial applications.

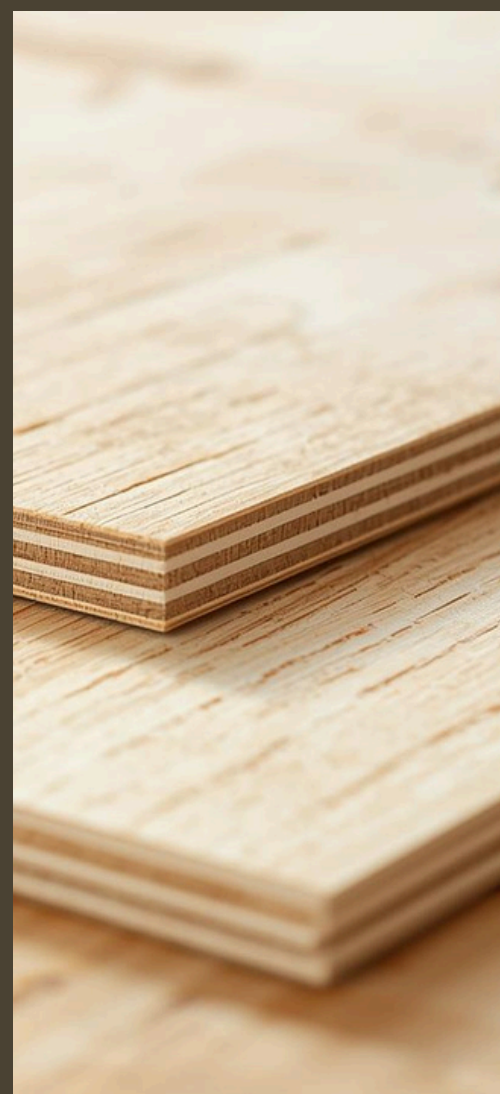

"A strong solution
for tough
conditions!"

04 our products

- WIDTH X LENGTH: 1250x2500mm
- THICKNESS: 12 – 30 mm
- NUMBER OF LAYERS: 9 – 21
- GLUE TYPE: WBP – Water Boiled Proof
- SURFACE FILM: Dark Brown Phenolic Film

05 Highlights

06 informations

Known for its multi-layered structure and superior strength, Plywood is produced by carefully selecting wood from sustainable sources. This provides an ideal, durable, and aesthetic solution for every project.

Plywood consists of layers pressed under high pressure and temperature, making it an extremely durable and flexible material. Its high resistance to moisture and water makes it an excellent option for outdoor projects as well. Whether it is large-scale construction projects or small DIY projects, Plywood adapts to every need.

The most ideal solution for construction!

High durability and long-lasting use advantages with its 13-layer structure!

Sustainable and Eco-Friendly

At Şafes, we prioritize sustainability in Plywood production. By managing our resources responsibly, we minimize our impact on the environment and aim to leave a livable world for future generations. Our Plywood maintains high quality while protecting ecological balance.

"Reinforce your structures!"

Versatile Use

The aesthetic and functional structure of Plywood makes it suitable for a wide range of uses, from furniture design to interior decoration, from exterior cladding to flooring applications. Its easy-to-process structure allows designers and architects to showcase their creativity.
