LastMileOS platform for delivery orchestration,
automation and post-purchase customer engagement

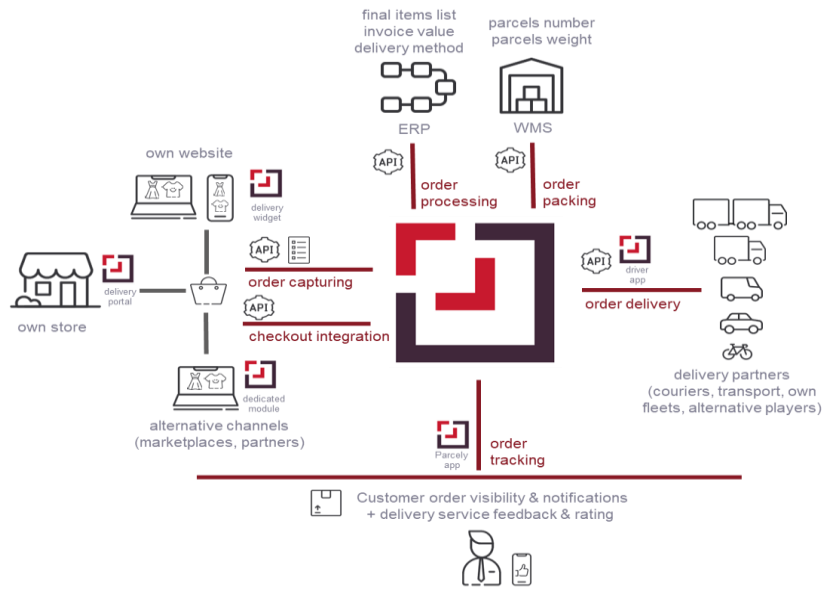

Integrated digital platform for all your delivery and distribution

- **Multiple carrier options:** use one courier, your own fleet, or a mix where you choose from hundreds of carriers already integrated and available
- **Integrated management** and data driven decisions for all your delivery processes and transport solutions
- **Automated selection** of the best delivery option for every order, through the use of AI and parameters related to product, price, destination, customer choice, carrier performance etc.
- **Superior delivery experiences** through operational excellence, real-time customer communication and feedback
