The All-in-One ESG Powerhouse

EnGage

Next-Gen AI-powered ESG Data Management

(!) A purpose-built ESG platform
EnGage brings clarity, structure, and expert direction from day one.

Consulting

EnGage

... from A to Z →
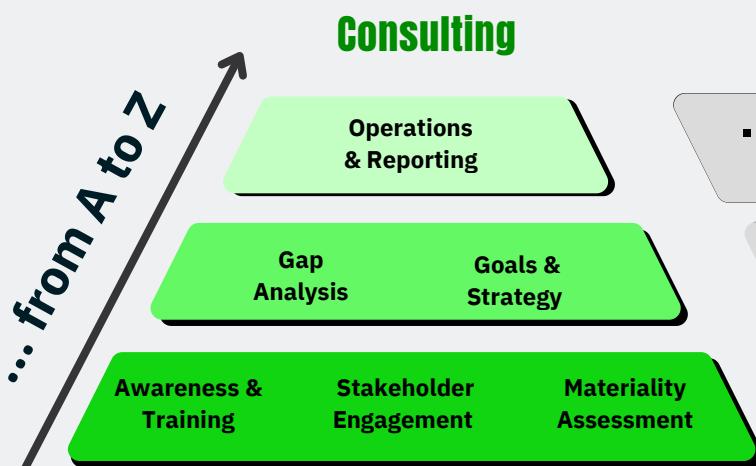

| Operations & Reporting | ■ Automatic Data Collection, Multi-Level Dashboards, and Report Generation |

| Gap Analysis | Goals & Strategy | ■ Target Setting & Monitoring, Automatic Gap Analysis, KPI Monitoring, Task Management, CAPAs* |

| Awareness & Training | Stakeholder Engagement | Materiality Assessment | ■ Stakeholder registry/engagement tools, (guided) IRO-enabled assessment |

* Corrective & Predictive Action Management

The EnGage platform toolkit

E1 - ESG Compliance Reporting
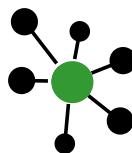

Centralized ESG Data Hub

An ESG data lake that stores all data formats in one place and transforms them into ready-to-use reporting outputs, reducing errors & manual effort

✓ Integrates with ERPs, HRMs, EMS, DMS, cloud platforms and even IoT sensors or smart meters, across all company entities.

✓ Leveraging AI, EnGage can extract data from PDFs and images, converting it into narratives and quantitative KPIs. [AI]

Clarity in Structured ESG Operations

ESG integration organized in a clear structured process improving accountability, saving time, and making data immediately actionable.

✓ A digital Double Materiality view provides insights into impacts, risks, and opportunities, linking them to KPIs across selected reporting frameworks.

✓ EnGage supports key ESG data management processes, including task progress monitoring, overdue alerts, and a four-eye review to ensure data accuracy.

Regulatory-Compliant Report Generation

ESG data is daily transformed into ready-to-use, framework-compliant report, providing transparency and enabling timely decisions.

✓ ESG reporting in multiple formats, including ESRS annual reports, GHG carbon emissions submissions, and KPI updates for management.

✓ Runs multiple automated report generation processes in parallel, ensuring efficiency, consistency, and time savings.

E2 Carbon Emission Calculator & Reporting

CO_2

"E2 automates carbon accounting across Scope 1, 2, and 3 with accurate, audit-ready data. It uses AI to collect, calculate, and standardize emissions from meters, bills, and supplier data in one platform, powered by verified national and global emission factor databases

✓ Automated emissions data collection & calculation for Scope 1, 2, and all 15 Scope 3 categories

✓ AI-powered Scope 3 data extraction from invoices, PDFs, and procurement files **AI**

✓ One-click compliant reporting aligned with GHG Protocol, ESRS, CDP, ISO 14064, and TCFD

+62%
Faster Carbon Footprint Completion

-68%
Time on Scope 3 supplier data processing

+75%
Improvement in accuracy & consistency

E3 - Supplier Management

✓ E3 provides configurable questionnaire templates for supplier sustainability assessments, aligned with widely used ESG frameworks such as ESRS, GRI, and VSME.

✓ It analyzes supplier responses to identify ESG-, reliability-, and business continuity–related risks, to assess and rank supplier performance according to customer-defined criteria.

"E3 turns supplier data into actionable insights, helping organizations manage risks, strengthen supply chain resilience, and drive sustainable performance.

It also provides flexible data collection for accurate upstream Scope 3 emission calculations

Tailored process for all procurement needs

✦ Yodi Assistant   ⧉ ✕

Hello Annie B!
I am Yodi Assistant!

I am here to answer questions about ESG.
What can I help you with today?

💡 Discover the Essentials: Find Basic Questions about ESG Standards   ˅

What are the most widely used ESG frameworks and standards?

How do ESG standards define and measure Scope 1, 2, and 3 emissions?

How does the principle of double materiality influence ESG reporting under EU CSRD?

ⓘ Browse Common Inquiries: Popular Questions asked by users about biodiversity

How is biodiversity measured?

How does climate change affect biodiversity?

How do company-led conservation areas restrict local access to resources like food and water?

E4 - ISO Management

" E4 digitizes and automates all processes required for energy & environmental ISO standards, reducing manual work, ensuring accuracy, and keeping organizations always audit-ready.

✓ Automated ISO 50001, 14001, and 14064 management with end-to-end energy and environmental data collection, predictive analysis, EnPI monitoring, and tracking improvements across sites.

✓ Everything is automatically organized & audit-ready, with direct auditor access for faster and more transparent certification.

35%
Improvement in on-time action closure

50%
Reduction of Audit Preparation time

100%
training traceability & audit-ready staff

E5 - Sustainability Process Management

✓ A user-friendly app for your employees to manage their tasks and track task progress with access to rich analytics

✓ Audit-ready task history and evidence with exportable reports for compliance

" E5 fosters seamless collaboration among the company's sustainability stakeholders through an advanced task management system, fully adapted to their needs, while tracking internal and external auditors' observations and improvement actions from initial registration through to final resolution.
