

# RIPO Fabrika - aluminium railings, balcony glazing, and prefabricated balcony platforms

Founded in 1993, RIPO is the leading producer of aluminium railings in Latvia, offering everything from design and manufacturing to installation on the building site. RIPO has been operating successfully in Norway for more than ten years, working on large scale residential building projects.

## Balcony railings

- Aluminium spindle railings.
- Aluminium railings posts with glass, perforated sheet, and other material infill.
- Glass balustrades with aluminium bottom profile and no posts.

## Balcony glazing

- Installation: full height or on top of railings.
- Opening type: sliding or sliding + opening on sides.

## Aluminium prefabricated balcony platforms

- Suspended - balcony suspended from the building facade using high-strength steel tension rods.
- Cantilevered - balcony supported on projecting steel cantilever beams anchored into the main building structure.
- Column-supported - aluminium SHS columns located at the corners.
- Decking type: concrete tiles / timber / composite boards.

## Other products for balconies

- Glass canopies.
- Partition walls.
- Juliet balcony railings.
