COMMUNITIES THAT SUPPORT

A strengthening program that activates the economic potential of recycling communities, providing them with training, technology, and markets to transform post-consumer plastic into concrete business opportunities.

What is it about?

WASTE THAT HAS VALUE HANDS THAT TRANSFORM

In Colombia, thousands of women and young recyclers are already sustaining the circular economy system from the ground up.

They do so without training, without tools, without a market.

This program exists to change that. We strengthen circular economy ecosystems in priority areas: we train, equip with technology, organize, and connect local production units based on the transformation of post-consumer recycled plastic.

POST-CONSUMER PLASTIC TRANSFORMATION

We promote urban models that strengthen local recycling and manufacturing chains, transforming waste into raw materials with market value.

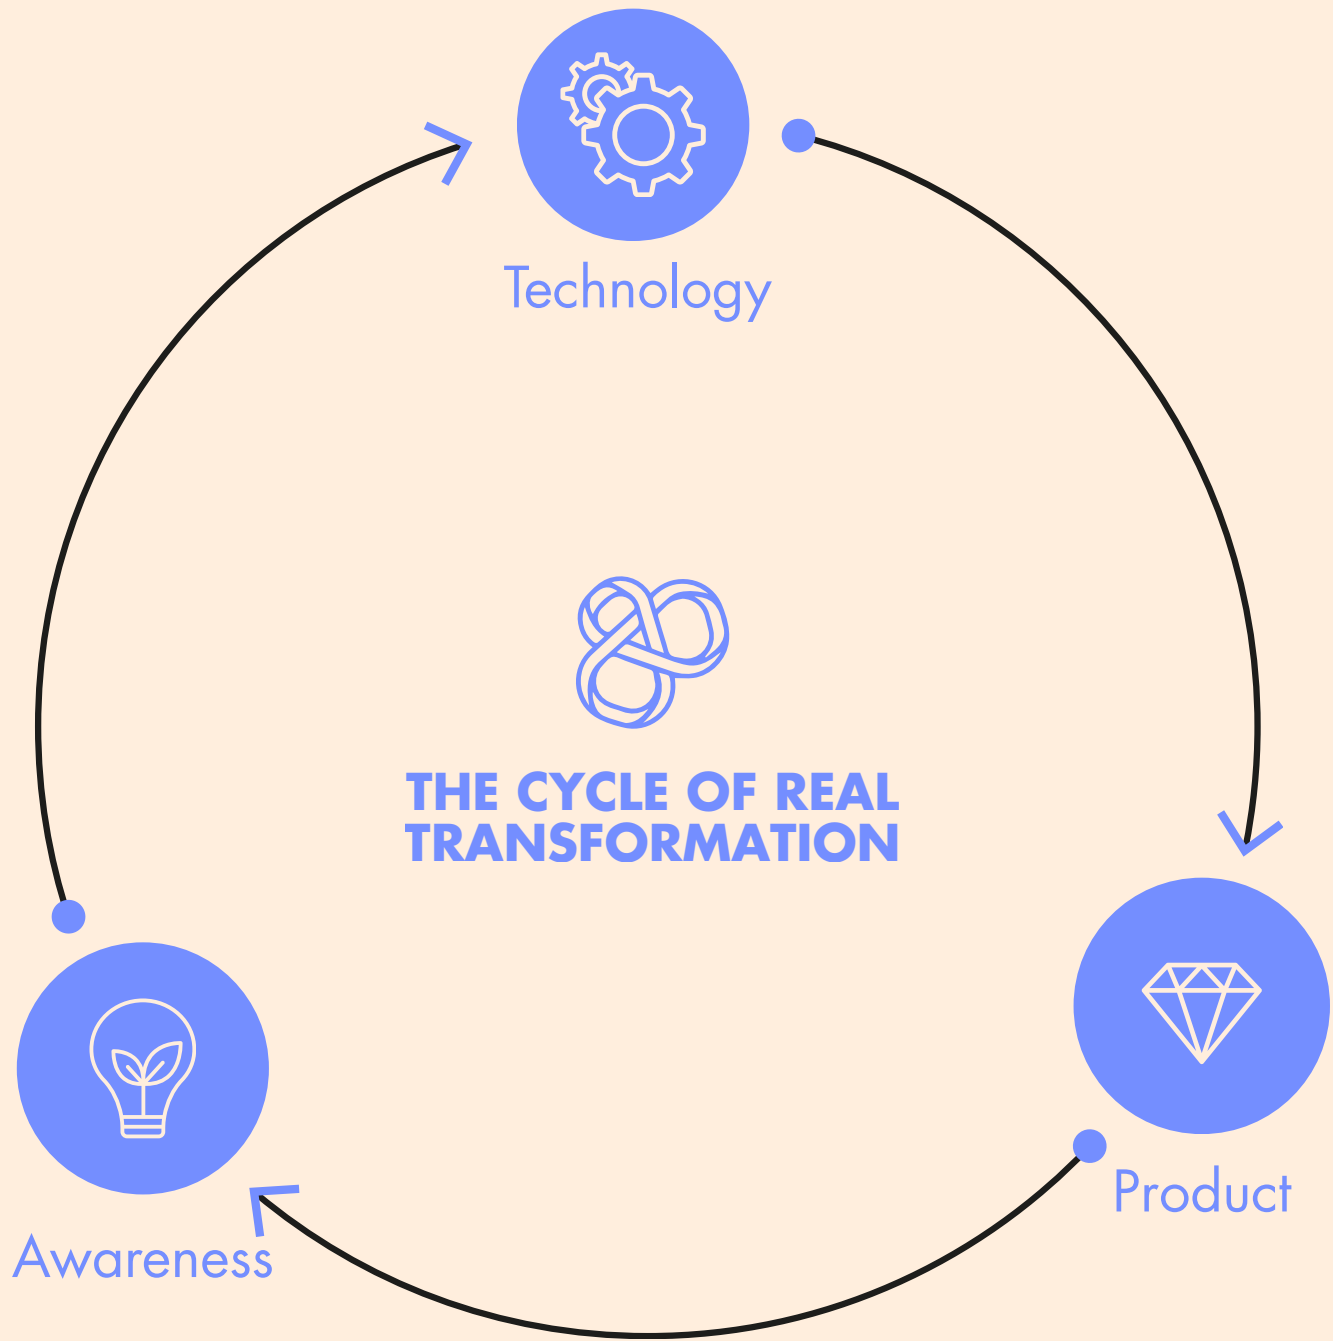

LOCAL ECONOMY WITH TERRITORIAL ROOTS

Each strengthening route is co-designed with the community, recognizing the local productive ecosystem and its natural allies.

ACCESSIBLE TECHNOLOGY + KUIICA LAB

Recycling machinery designed for communities: accessible, scalable, with training included. Kuiica doesn't just provide equipment—it transfers capacity.

**SINCE
2022**

We have built

**20
MACHINES**

Have recovered
approximately

9000 KG

of single-use
plastics

PLASTICS OUR MACHINES CAN TRANSFORM

 **HDPE**
High-Density Polyethylene

Mostly from detergent containers

 **LDPE**
Low-Density Polyethylene

Mostly from bags and transparent film

 **PP**
Polypropylene

Mostly from food containers

 **PS**
Polystyrene

Mostly from disposable cutlery

 **OTHERS**

Mostly from snack packaging

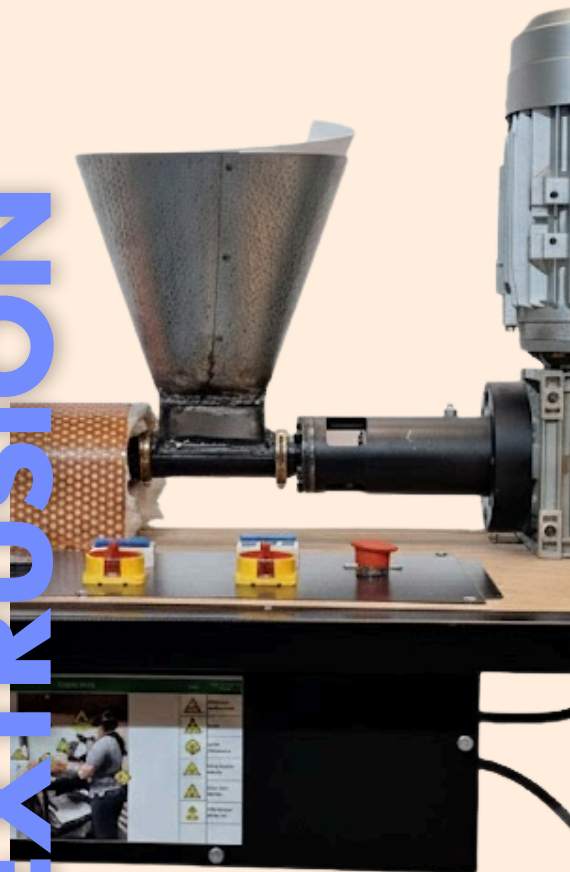

MACHINES

SHREDDER

EXTRUSION

SHEETPRESS

Why invest?

*THIS IS NOT CSR.
IT'S A
**COMPETITIVE
ADVANTAGE**
WITH A
TRACEABLE
IMPACT.*

By partnering with this program, your company not only meets expectations, it leads the way.

MEASURABLE IMPACT

Productive inclusion and
reduction of plastic waste

TERRITORIAL VISIBILITY

Your brand present in
communities, circular fairs,
digital showcases and
social impact media
throughout Colombia.

CIRCULAR VALUE CHAIN

Access formalized local
suppliers with recycled raw
materials and circular
products for your operation
or portfolio.

Ultimately, their
collaboration activates
an ecosystem that
**generates employment,
reduces plastic waste,
and creates real
economic activity** in the
areas where it is most
needed.

This program has the
potential to **become a
benchmark** for the
community-based circular
economy in Colombia
and South America.
