

About Kobe Hydrogen Cluster

The cluster was established in August, 2015 with 20 companies.

Now the cluster consists of 34 companies,
which are located in Hyogo prefecture and also member of
Kobe Machinery and metal Firms Association.

All members are targeting to enter the hydrogen business
with their own unique technology and products.

Workshop (4,5 times/yr)

- Seminars by university professor/specialist in hydrogen field.
- Information Exchange with each member to share updated Hydrogen topics.

Site Tour (1or2 times/yr)

- Visit Latest Hydrogen Facility and R & D institutes to have a real experience of the development.

To
achieve
the target

Consortium Activity

- Members in a special technology come together in order to develop new hydrogen product.

Support for sales promotion, PR activities

- Do PR for members at exhibitions and seminars.
- Provide opportunities of business matching for members.
