

Who we are

EquityCancer-LA unites seven institutions across Europe and Latin America to improve access to cancer care, in collaboration with local healthcare networks and oncology experts' support.

What we are working on

Using a participatory approach, an intervention was adapted to the local context and implemented combining primary-care training, fast-track referral and patient information to reduce cancer diagnostic delays.

What's the one thing we need next

We need to sustain and expand the intervention beyond 2026, sharing results widely to support long-term adoption across healthcare networks and countries.
