welcome!

Business travelers have specific requirements. Foremost among these is the need for a flexible partner who adapts to their individual desires. This is precisely what harry's home embodies. Whether it's just an overnight stay for a business meeting in the city, a longer stay, or even a full group trip, whether you want to use our Flexrooms for work, or directly book our seminar rooms for your event, we offer numerous possibilities for the modern needs of our business travelers.

Especially for seminars and conferences, we understand that individual requirements can vary greatly, which is why we specialize in providing tailored solutions. To optimally cater to you and your guests during the event, we offer various coffee types and fresh snacks. And if you desire an extended culinary offer or a business meal, you will find first-class restaurants close to each of our locations.

Our primary goal is to provide you with top-notch service and make your event an unforgettable experience.

Best regards,
Harald „Harry“ Ultsch

Our special offers for those who are busy start with **breakfast**: If you're in a hurry and need to get to your first meeting, we'll happily pack a „coffee to go“ with a croissant and apple for you to take along.

Snacks, drinks, washing machines, dryers, and ironing stations are available around the clock.

One of the small details that ultimately make a big difference is our service point. If you arrive late or your meeting runs long, our service point provides you with simple meals and drinks. And if you need to stay longer in a city, we offer apartments with their own kitchen.

Arrival

All our locations have direct public transport connections to the nearest airport or main train station. If you're arriving by car, we have ample parking spaces in our underground garages or outdoor parking lots.

Interior design since 2006 ...

Each harry's home is modern and stylishly furnished. But beauty is not an end in itself for us, but a means to make you feel comfortable.

The 1st Generation: poppy, orange, and green.

Right from the start, we placed importance on spaciousness, so all our rooms have been and will continue to be generously sized. The furnishings are practical and modern. The green color of our logo has been incorporated into the interior design, and the refreshing orange accents give a vibrant effect.

The 2nd generation: focuses on being stylish and innovative.

It uses muted colors, a gentle lighting concept, and a natural appearance to emphasize the „home“ theme. It aims to combine coziness with modern interior design so that guests feel comfortable in their modern and cozy rooms.

The 3rd design generation: focuses on being modern, cozy and urban.

It represents an evolution and adaptation to the current zeitgeist. These hotel rooms feature a lot of warm wood, gentle colors, and modern „subway tiles“ to create a comfortable ambiance.

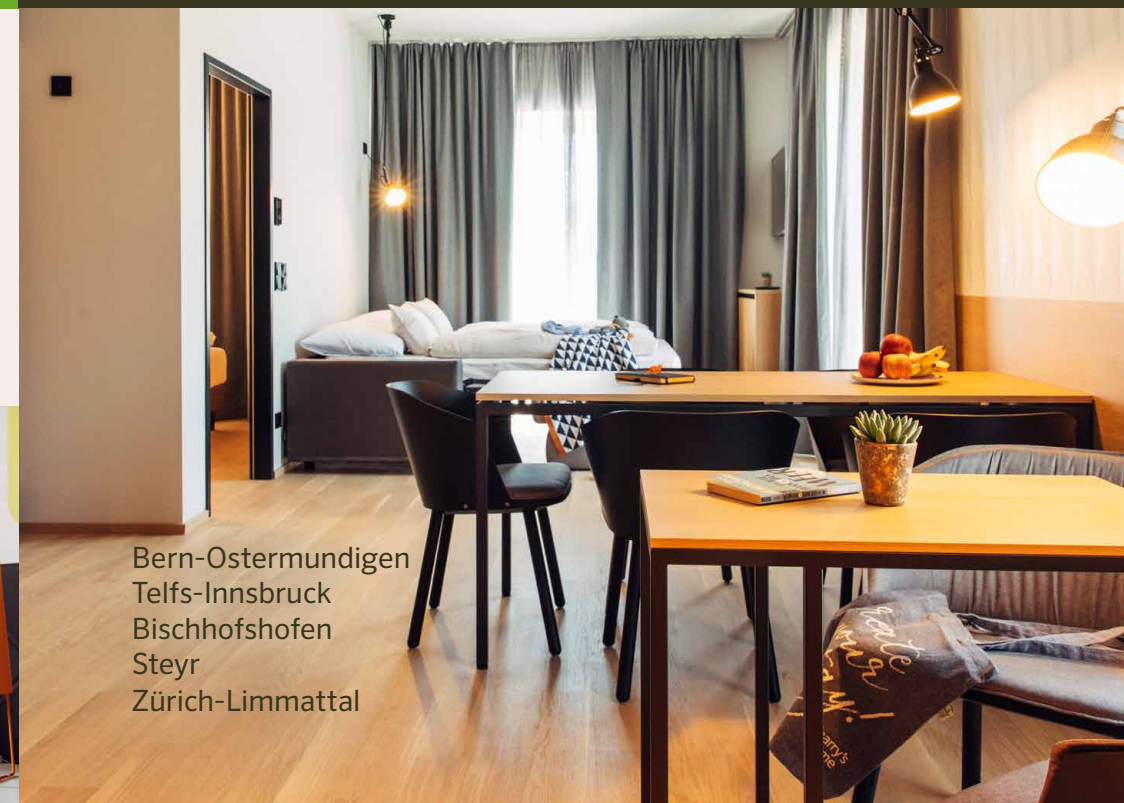

For today's nomads.
