WHO IS REKEN?

Reken is a team of specialists who design and implement modern technological lines for receiving, sorting, weighing, and packaging vegetables and bulk products.

Our solutions are developed based on real needs, specific goals, and with investment efficiency in mind. We combine technological knowledge with practical experience and market awareness. Our goal is to create well-thought-out, reliable, and integrated solutions that not only function efficiently but also bring measurable production and economic benefits.

Collaboration, partnership, responsibility, and timeliness are our top priorities, which is why we support your company at every stage of the implementation process.

CONVEYORS

Each device can be manufactured according to individual specifications. We can customize the machine parameters to meet the client's needs. We also supply spare parts for every conveyor we produce.

BELT CONVEYOR

Belt conveyor (flat, incline, curved) – designed for transporting small goods with various properties.

MODULAR CONVEYOR

Modular conveyor (curved, straight) – designed for transporting small goods that require resistance to temperature and mechanical damage.

OVERHEAD CONVEYOR

Overhead conveyor – used for transporting lightweight items.

SERVICE AND SPARE PARTS

Our company offers comprehensive service support, providing fast and effective equipment repairs. We maintain a wide range of spare parts, allowing us to efficiently carry out maintenance and repairs. Thanks to our experienced team and high-quality components, we ensure long-lasting equipment performance.

MOTORS AND GEARBOXES

Our assortment includes a wide selection of high-quality components and parts. We offer single-phase and three-phase motors with rotational speeds of:

- 2800, 1400, 1000, 700
- RPM Power range: from 0.09 kW to 800 kW
- Shaft height: from 56 to 400 mm

Gearboxes:

- Worm – efficient and compact solutions for power transmission
- Feed – tailored for agricultural industry applications
- Furnace – robust designs for high-temperature environments
- Helical – ideal for transmitting large loads
- Planetary – precise and durable mechanisms for a wide range of uses

SPARE PARTS

We provide access to essential components, including:

- **Bearings** – a wide selection of types and sizes
- **Chains** – durable and resistant to heavy use
- **Pulleys** – precisely manufactured

Transport and industrial belts

Our offer includes belts made from a variety of materials, tailored to meet the specific demands of different industrial sectors: PVC, PU, PE, silicone, rubber, modular, Teflon, mesh, cotton.

With our extensive range of products and professional support, we provide precisely tailored solutions that meet your specific requirements.
