Short description

We are manufacturing company with more than 60 years of experience in aluminium processing, specialized for technical and aesthetic components. We bring to life demanding high-end aluminium components acc. to customers requirements.

Typical applications: design parts, speaker grills, trim parts, profiles, frames, covers, handles, housings, front panels, knobs, etc.

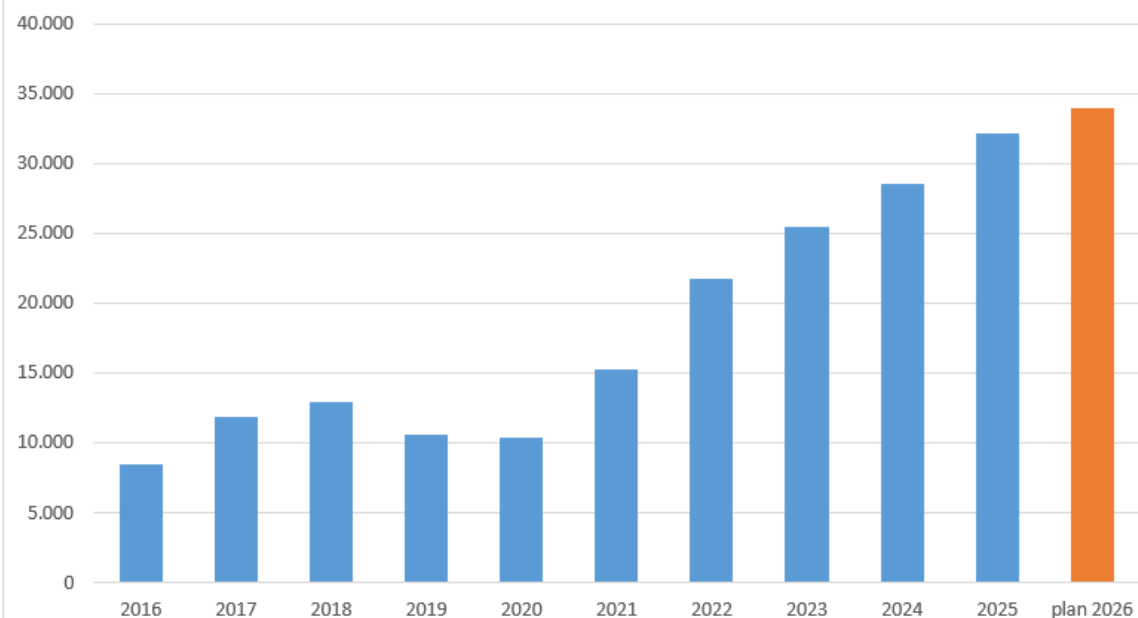

We take care of extruded profiles, machining, forming, sheet metal, mechanical treatment, surface finishing, engraving, joining, assembly and surface treatment (anodizing – colouring, hard anodizing), that our customers get complete solution from one hand.

Company profile

Turnkey solutions

All in one place 'from idea to product'

Your idea

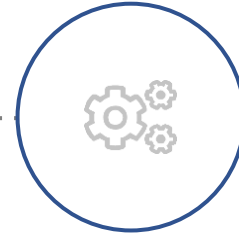

We listen to your ideas and requests

Consultation & development

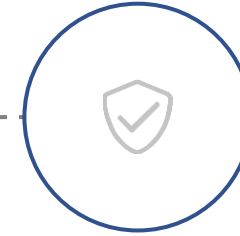

Based on our knowledge and experience we propose the appropriate technological solution.

Production

Modern automated production allows for fast and quality implementation.

Quality control

Modern automated production allows for fast and quality implementation.

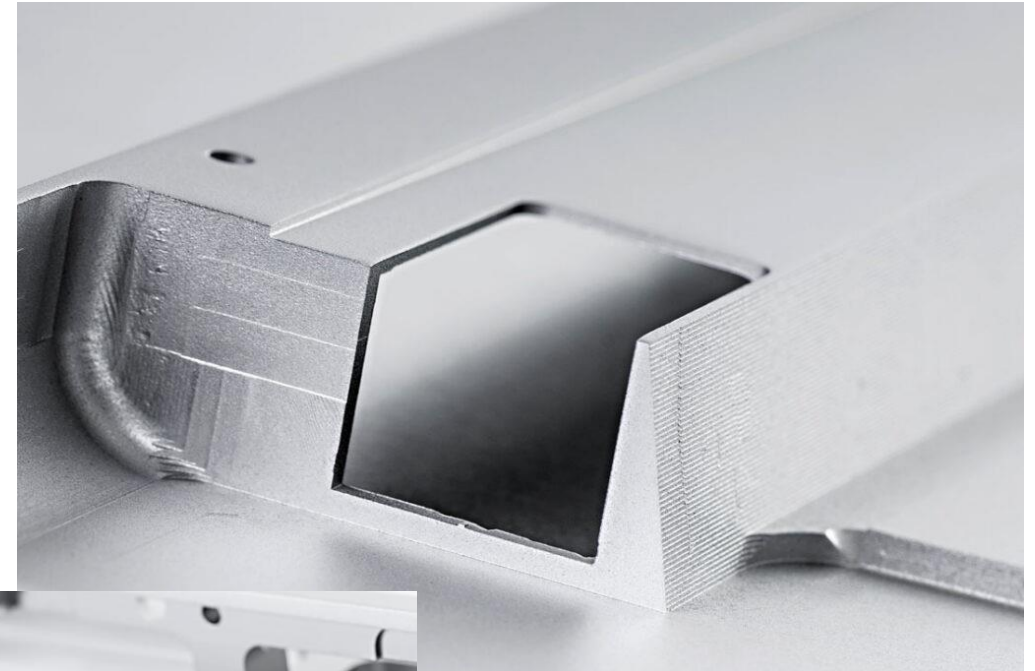

Business areas

- Professional and domestic appliances
- Automotive
- e-Mobility
- HVAC
- Home Automation
- Consumer Electronics
- Audio
- Lighting
- Industrial Automation
- Recreational Products
- Baby Care

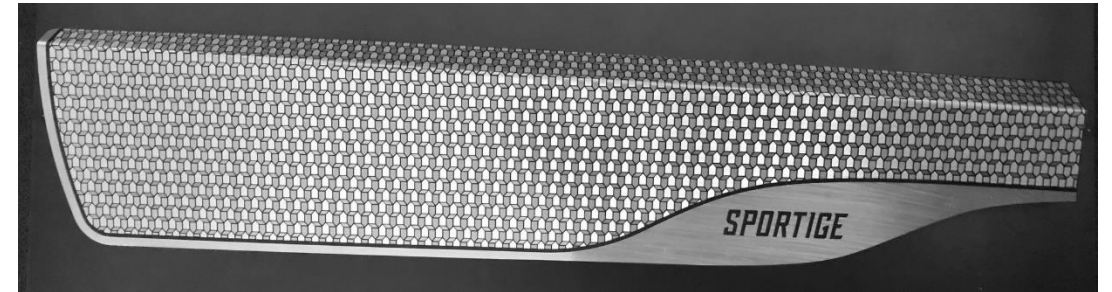

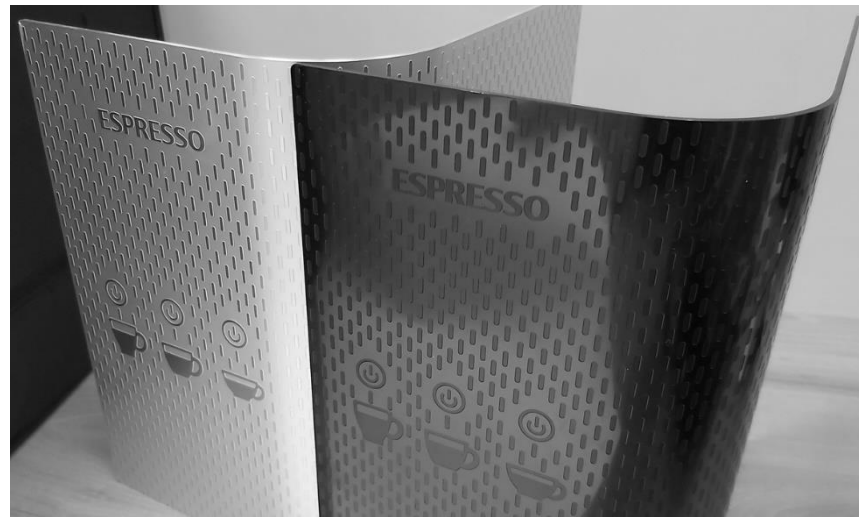

Mechanical treatment of aluminium

- Bending
- Stamping
- Stud welding
- Turning
- Glueing / assembling
- Milling
- Deep drawing
- Cutting

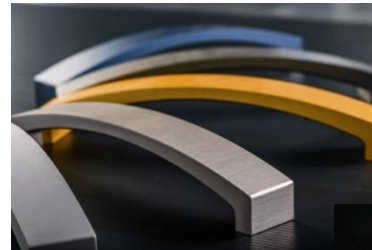

Mechanical surface treatment of aluminium

- Grinding
- Brushing
- Bead blasting
- Polishing

Surface treatment of aluminium

- Anodizing
- Alu spectral (special electrolytic colouring)
- Hard-coat anodizing

Signation

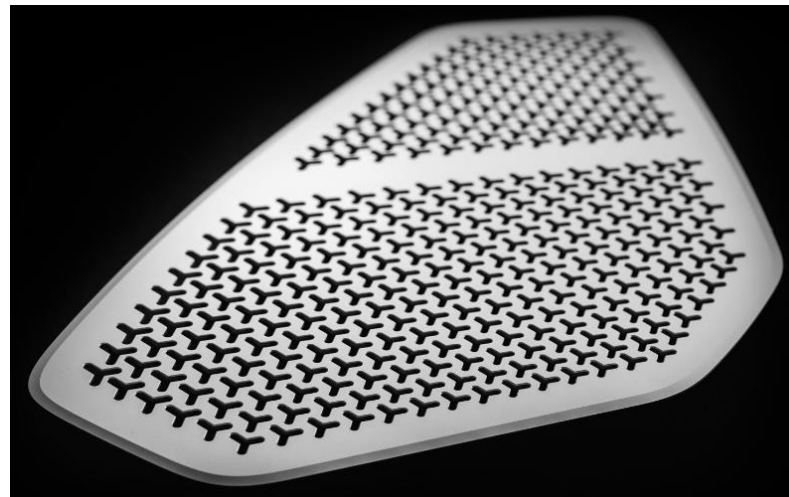

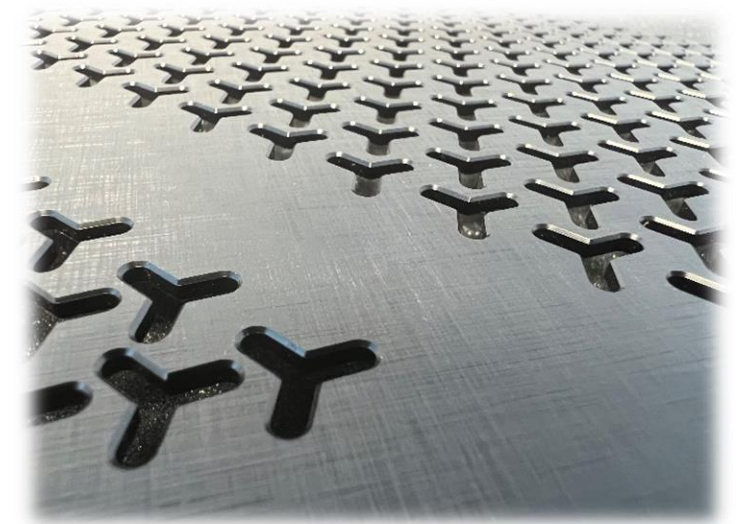

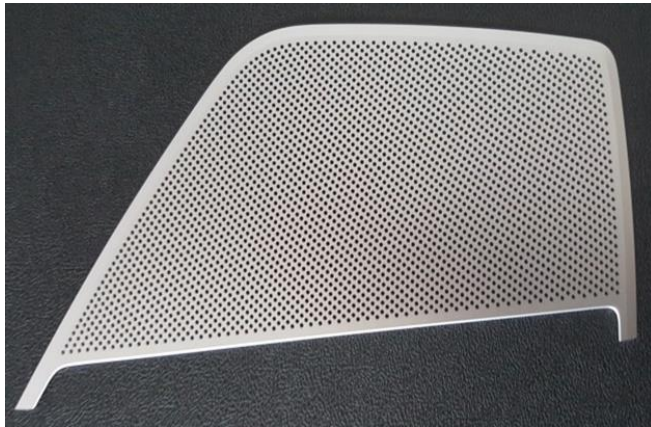

- Laser engraving
- Mechanical engraving
- Tampo printing
- Screen printing

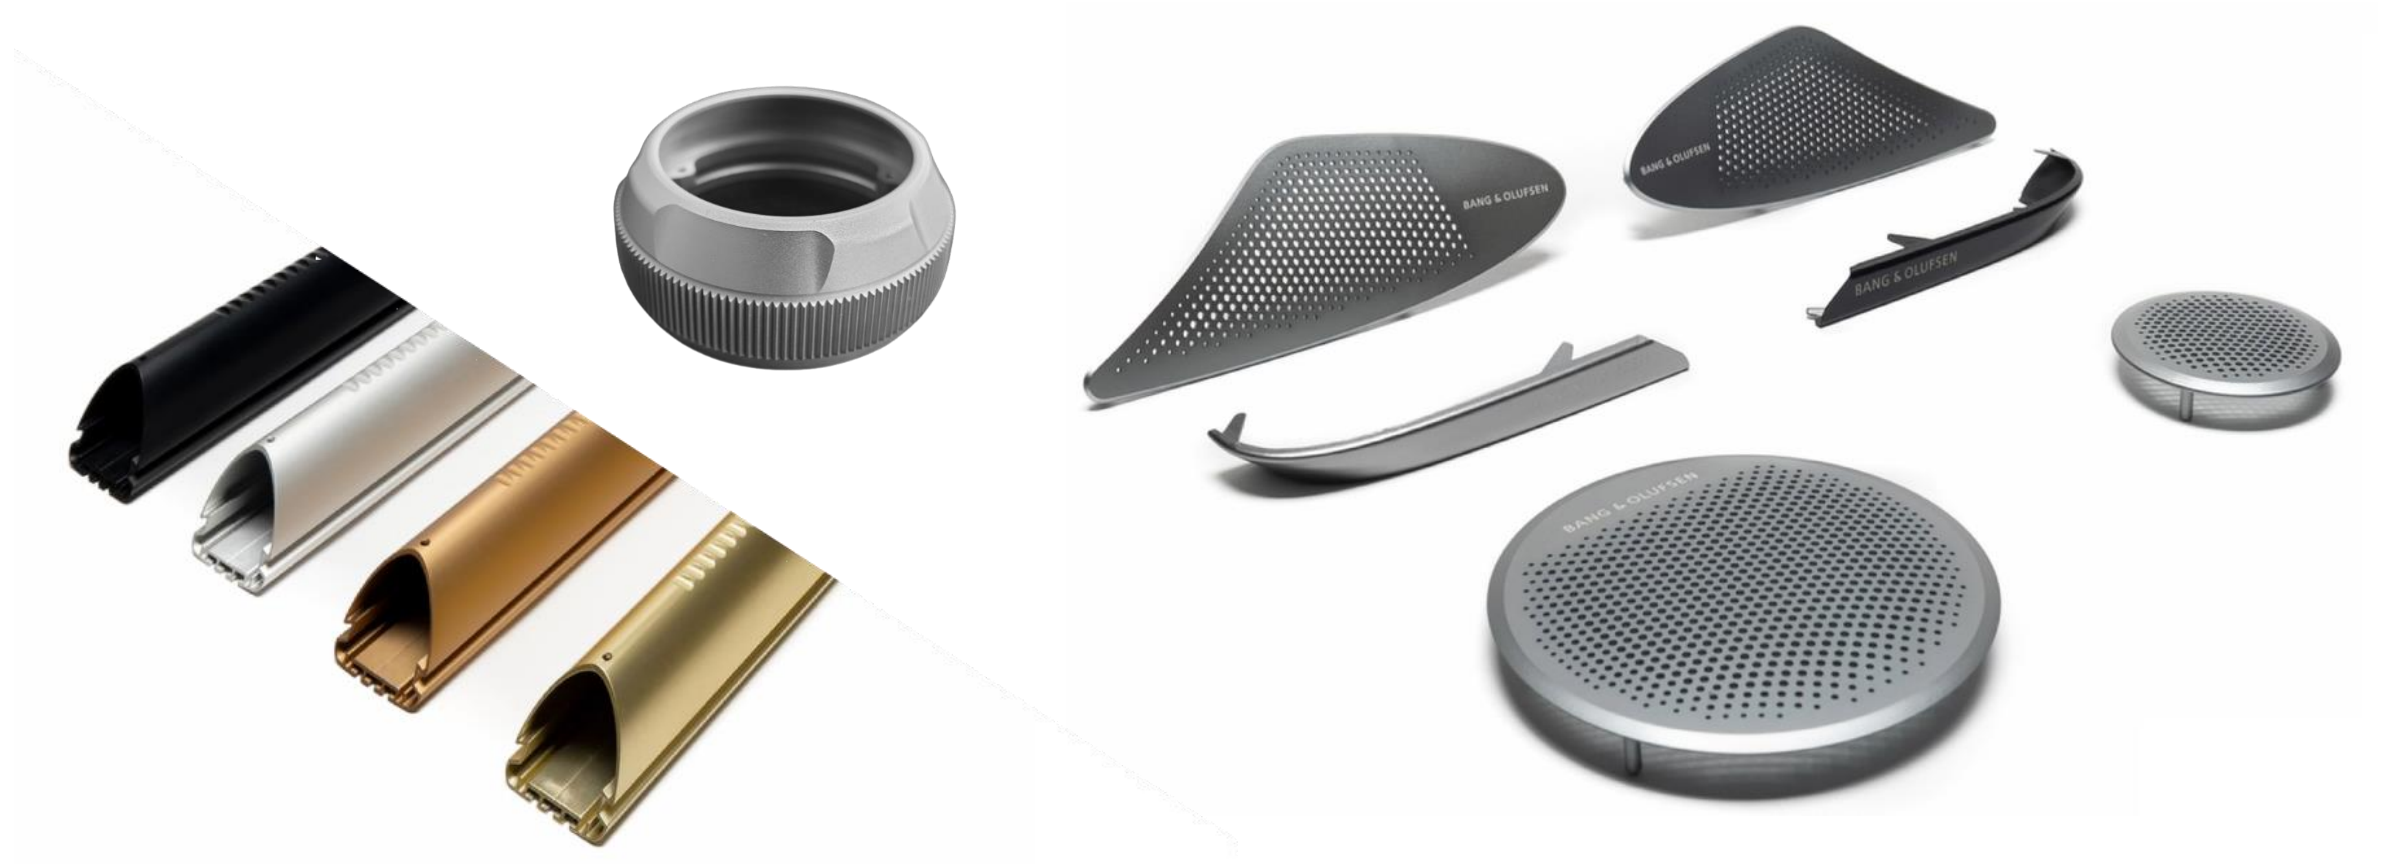

Machine park

- 3-axis CNC milling machines - 30+ machines
- 4-axis CNC milling machines – 5 machines
- 5-axis CNC milling machines – 2 machines
- CNC Lathe machine – 2 machines
- Bandsawing Machines – 2 lines
- Anodisation – 3 anodisation plants

New Surface Designs & Technologies

Gabrijel Aluminium developed new surface treatment technologies in order to achieve special design effects, which could be very individual.

This technology allows designers to set new design guidelines and to get customized interior parts.
