# 01 INTRODUCTION

Blackfish is a company specialized in the audiovisual services sector with headquarters in Barcelona, Madrid, and the Canary Islands.

We provide technical solutions encompassing productions, live streaming, LED screen installations, and augmented and extended reality integration.

We collaborate on various projects, ranging from television productions to corporate events.

# 02 SERVICES

## SCREEN MANAGEMENT

Through custom mediaservers for each production, we design content and manage LED screens using operating systems such as Resolume, Disguise, or Pixera, among others.

## LED SCREENS

We have rental LED screens to provide a comprehensive 360° service. We offer installation and content management services.

## MAPPING

We provide a comprehensive service from content creation to projection management using specialized programs such as Disguise, Resolume, or Pixera.

## AR / XR CONTENT

We create high-quality virtual experiences by combining immersive technology with real environments designed with Unreal Engine.

## EQUIPMENT RENTAL

We have audiovisual equipment available for various types of productions, including large sensor cameras, broadcast cameras, production systems, audio equipment, lighting, etc.
